

3. High-Cost Support

The high-cost support mechanisms enable areas with very high costs to recover some of these costs from the federal universal service support mechanisms, leaving a smaller remainder of the costs to be recovered through end-user rates or state universal service support mechanisms. In this manner, the high-cost support mechanisms are intended to hold down rates and thereby further one of the most important goals of federal and state regulation -- the preservation and advancement of universal telephone service. This section of the report outlines the high-cost support mechanisms and provides data for these mechanisms. The high-cost support mechanisms include embedded high-cost loop support (HCLS),¹ forward-looking non-rural high-cost model support (HCMS), long-term support (LTS), interstate access support (IAS) for price-cap carriers, interstate common line support (ICLS) for rate-of-return carriers, and local switching support (LSS). Table 3.1 summarizes the annual amounts for the high-cost programs for 1998 through 2003.² It is based on information provided by the Universal Service Administrative Company (USAC).

Historically, HCLS was provided to all incumbent local exchange carriers (ILECs) based on their embedded costs. Such support provides assistance for non-traffic sensitive (NTS) local loop costs -- a term that refers to the costs of outside telephone wires, poles, and other facilities that link each telephone customer's premises to the public switched telephone network. NTS costs are allocated between the state and interstate jurisdictions because all local loops can be used for making and receiving both intrastate and interstate telephone calls. Historically, the interstate allocation was made using the Subscriber Plant Factor (SPF).³ This factor is now 25% for all companies. Today, carriers are eligible for different forms of interstate high-cost loop support, depending on whether they are considered rural or non-rural carriers.⁴

1 This was formerly referred to as the Universal Service Fund, and still bears that name in the Commission rules. It is now referred to as high-cost loop support to avoid confusion with the new, more comprehensive universal service support mechanisms that the Commission developed to implement the 1996 Act. *See* 47 C.F.R. § 36.601. *See also* 47 C.F.R. Part 54.

2 The 2003 numbers are based on the assumption that fourth quarter projections will be the same as those for the third quarter. Historical administrative costs and interest earnings are included on a cash basis.

3 The Subscriber Plant Factor is defined in section 36.154(e) of the Commission's rules. 47 C.F.R. § 36.154(e). It was frozen in 1981 and then transitioned to 25% between 1985 and 1993, subject to the limitations in section 36.154(f) of the Commission's rules. 47 C.F.R. § 36.154(f).

4 *See* 47 C.F.R. § 51.5 for the definition of a rural carrier. Generally, they either have less than 100,000 lines or serve predominantly rural areas.

If an ILEC is deemed a rural carrier, it continues to receive high cost support based on embedded costs. The expense adjustment allows those study areas⁵ with an average unseparated cost per loop that exceeds 115% of the national average to allocate an additional portion of their NTS costs to the interstate jurisdiction and to have those costs recovered by HCLS.⁶ Table 3.2 shows the percentages of additional NTS costs recovered by HCLS.⁷ HCLS was implemented during a period in which the basic interstate allocation of loop costs was shifted from a level based on the historical SPF to the present flat allocation factor of 25%. Both of these changes were phased in between 1985 and 1993, during which the HCLS was increased by one-eighth of the formula amount each year.

Table 3.3 shows the payments that have been made through HCLS since its inception. The first column indicates the year in which the NTS costs were incurred. The second column indicates the year in which HCLS payments were made. The third column indicates the amount of those payments, based on the product of the transition factor⁸ shown in the fourth column and the full amounts (calculated from the formulas in Table 3.2).⁹ The last column of the table shows the annual growth rate in the payments.

-
- 5 A study area is usually an operating company's operations in one state. Holding companies may own multiple operating companies and thus have multiple study areas in a state. Study area boundaries were frozen as of November 15, 1984. Any subsequent change requires a Commission waiver of this freeze.
 - 6 In January 1988, high-cost assistance was retargeted to increase benefits to small and medium sized LECs. The old and new high-cost formulas are compared in Table 3.1 of the *Monitoring Reports* in CC Docket No. 87-339.
 - 7 For example, suppose the national average cost per loop is \$240 and a company with 10,000 loops has a cost per loop of \$420, or 175% of the national average. Then for the portion of their costs between \$276 (115% of the national average) and \$360 (150% of the national average) they would receive 65% of those costs [.65 times (\$360 - \$276) = \$54.60], plus they would receive 75% of their costs over \$360 [.75 times (\$420 - \$360) = \$45], resulting in HCL support totaling \$99.60 per loop, or \$996,000 total support.
 - 8 The transition factor represents the proportion of the calculated HCL support that was actually paid during the transition period between 1985 and 1993. This transition was designed to compensate for the allocation of costs to interstate based on the transitional SPF during that period, which on average was greater than the present 25%.
 - 9 As discussed below, beginning in 1994 the payments are subject to a cap. Payments since 2000 include only hold-harmless support for non-rural companies.

In December 1993, the Commission, at the recommendation of the Joint Board in CC Docket 80-286, imposed a cap on HCLS payments.¹⁰ The cap was indexed to the rate of growth in the national total of working exchange loops. It is implemented by adjusting the national average cost per loop used to calculate each study area's high-cost assistance (using the current formula from Table 3.2) from the true average value to whatever base value is required to achieve the cap. For example, in 2003, the cap is achieved by adjusting the base value 2001 cost per loop from the national average of \$240.00 to \$267.15. In addition, when exchanges are sold or transferred to another company, the new owner is limited to the same support for those exchanges that they had under the old owner.¹¹

The Commission modified the high-cost support mechanism to provide additional support to rural carriers on May 23, 2001. Implementation of the modified support mechanism began July 1, 2001 and will continue for a five year period.¹² The Commission rebased the HCLS fund for rural carriers, revised the corporate operations expense limitation formula,¹³ and modified the indexed cap. Accordingly, beginning July 1, 2001, the caps for non-rural hold-harmless and rural HCLS are calculated separately.¹⁴ For rural carriers, the national average annual loop cost is now frozen at \$240.00 and the cap is indexed to the rate of growth in working loops of rural carriers plus the rate of inflation as measured by the Gross Domestic Product – Chained Price Index (GDP-CPI).¹⁵ To encourage new investment in rural infrastructure, safety

10 *Amendment of Part 36 of the Commission's Rules and Establishment of a Joint Board*, CC Docket No. 80-286, Report and Order, 9 FCC Rcd 303 (1993). The amount of the payments for 1996 was below the cap.

11 47 C.F.R. § 54.305. This applies to sales and transfers initiated after May 7, 1997. In August 2000, the Common Carrier Bureau adopted an order removing similar older caps for individual study areas that were subject to them at that time, effective January 1, 2000. *Petitions for Waiver Concerning the Definition of "Study Area" Contained in Part 36 Appendix-Glossary of the Commission's Rules*, CC Docket No. 96-45, Order, 15 FCC Rcd 23491 (2000).

12 *See Federal-State Joint Board on Universal Service, Multi-Association Group (MAG) Plan for Regulation of Interstate Services of Non-Price Cap Incumbent Local Exchange Carriers and Interexchange Carriers*, CC Docket Nos. 96-45, 00-256, Fourteenth Report and Order, Twenty-Second Order on Reconsideration, and Further Notice of Proposed Rulemaking in CC Docket No. 96-45, and Report and Order in CC Docket No. 00-256, 16 FCC Rcd 11244 (2001) (*Rural Task Force Order*).

13 Previously, in 1998, the Commission had adopted limitations on the amount of allowed corporate operations expense. The limitations are specified in section 36.621(a)(4) of the Commission's rules. 47 C.F.R. § 36.621(a)(4).

14 47 C.F.R. §§ 36.602 and 36.603.

15 This replaces the indexing of the cap to the rate of growth of the national total of working

net additive support was made available for rural carriers whose telephone plant in service per loop increased by over 14% in one year. This additional loop support equals the difference between what its HCLS would have been uncapped and what it is capped in the qualifying year less the difference between the uncapped and capped amounts in the base year. For new sales or transfers of rural exchanges, the acquiring carrier is required to keep separate cost information for the acquired exchanges to determine the eligible support for those exchanges. Safety valve support is available for new investments in infrastructure for the acquired exchanges. On June 13, 2002, the Commission adjusted the rural HCLS cap by changing the base year for the calculations to 2000 for purposes of recalculating the cap for 2002 and subsequent years.¹⁶

If a carrier is deemed to be a non-rural carrier, it now receives high-cost support based on forward-looking costs, as estimated by an FCC cost model. The Commission adopted a new high-cost support mechanism for non-rural carriers on October 21, 1999, based on recommendations from the Joint Board.¹⁷ This HCMS mechanism is based on the forward-looking costs of providing supported services¹⁸ as determined by the Commission's cost model.¹⁹

exchange loops.

- 16 *See Federal-State Joint Board on Universal Service, Multi-Association Group (MAG) Plan for Regulation of Interstate Services of Non-Price Cap Incumbent Local Exchange Carriers and Interexchange Carriers*, CC Docket Nos. 96-45, 00-256, Order on Reconsideration, 17 FCC Rcd 11472 (2002) (*Rebasing Order*).
- 17 *See Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Ninth Report and Order and Eighteenth Order on Reconsideration, 14 FCC Rcd 20432 (1999) (*High-Cost Methodology Order*), *rev'd in part and remanded*, *Qwest v. FCC*, 258 F.3d 1191 (10th Cir. 2001), and *Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Order on Remand, Further Notice of Proposed Rulemaking, and Memorandum Opinion and Order, FCC 03-249 (released October 27, 2003).
- 18 The services eligible for federal universal service support are listed in section 54.101 of the Commission's rules. 47 C.F.R. § 54.101.
- 19 The cost model consists of: (1) a model platform, which contains a series of fixed assumptions about network design and engineering; and (2) input values for the model platform, such as the cost of network components, e.g., cables and switches, as well as various capital cost parameters. The Commission adopted the model platform in the *Platform Order* released in October 1998. *Federal-State Joint Board on Universal Service, Forward-Looking Mechanism for High-Cost Support for Non-Rural LECs*, CC Docket Nos. 96-45, 97-160, Fifth Report and Order, 13 FCC Rcd 21323 (1998) (*Platform Order*). The Commission adopted input values in the *Inputs Order* released in November 1999. *Federal-State Joint Board on Universal Service, Forward-Looking Mechanism for High-Cost Support for Non-Rural LECs*, CC Docket Nos. 96-45, 97-160, Tenth Report and Order, 14 FCC Rcd 20156 (1999) (*Inputs Order*).

For each state, the cost model calculates the wire center forward-looking cost per line incurred by non-rural carriers to provide supported services. The statewide average cost per line is then compared to the national average cost per line to determine eligibility for support. The forward-looking support mechanism provides support to non-rural carriers in those states that have a statewide average forward-looking cost per line greater than the national benchmark, which was set at 135 percent of the national average forward-looking cost per line for the period of time covered in this report.²⁰

After determining the total amount of forward-looking support provided to non-rural carriers in a particular state, the support is then targeted to individual wire centers that have forward-looking costs in excess of the benchmark.²¹ Under the targeting approach, the amount of support provided to a non-rural carrier serving a particular wire center depends on the relative costs in that wire center and the number of lines served by the carrier. By comparing the relative costs in various above-benchmark wire centers, the targeting approach enables the Commission to provide greater amounts of support to carriers serving lines in wire centers with costs further above the benchmark. Thus, unlike providing a uniform per line statewide support amount, the targeting approach provides support in an amount commensurate with the cost of service, thereby encouraging carriers to serve high-cost areas.

The Commission also adopted a transitional “hold-harmless” measure to prevent rate shocks and disruptions in state rate designs when the new mechanism took effect. As adopted, no non-rural telephone company would receive less support than it received under the LTS plus embedded HCLS mechanisms during the transition period. The Joint Board recommended that interim hold-harmless support be phased down beginning January 1, 2001.²² On December 8, 2000, the Commission adopted measures to phase down interim hold-harmless support, through

20 *High-Cost Methodology Order*, 14 FCC Rcd 20432 at paras. 10 and 55. The forward-looking support mechanism provides support for all intrastate costs that exceed the benchmark. *High-Cost Methodology Order*, at paras. 60 - 63. Intrastate costs account for 76 percent of all forward-looking costs estimated by the model. *High-Cost Methodology Order*, at para. 63. Therefore, the forward-looking mechanism provides support for 76 percent of the forward-looking costs that exceed the benchmark. *High-Cost Methodology Order*, at para. 63. In October 2003, the Commission adopted an order modifying the national benchmark. *Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Order on Remand, Further Notice of Proposed Rulemaking, and Memorandum Opinion and Order, FCC 03-249 (released October 27, 2003).

21 *High-Cost Methodology Order*, at paras. 68-76.

22 *Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Recommended Decision, 15 FCC Rcd 14714 (2000).

\$1.00 reductions in average monthly per-line embedded HCLS, beginning January 1, 2001, and every year thereafter until there is no more interim embedded hold-harmless HCLS.²³

LTS is related to interstate non-traffic sensitive costs. LTS provides support to the members of the National Exchange Carrier Association (NECA) common line pool, to allow them to charge a below-cost carrier common line (CCL) rate that is uniform for all companies in the pool. Prior to 1989, all ILECs were required to be part of the NECA common line (CL) pool, and CCL rates were uniform nationwide. On April 1, 1989, companies were permitted to withdraw from the NECA CL pool and provide jurisdictionally specific CCL access charges; however, carriers must remain in the pool to received LTS.²⁴

To reduce disparities in CCL rates among ILECs after companies were permitted to withdraw from the CL pool, LTS was set up. LTS originally consisted of payments to the NECA CL pool from companies that withdrew from the NECA CL pool. Companies remaining in the NECA pool charge CCL rates, pursuant to the NECA tariff, which were formerly equal to the average CCL rate of the price cap companies. Effective January 1, 1998, the funds for LTS come from the federal universal service support mechanisms. At the same time, the NECA pool rate no longer was made equal to the average price cap rate. Rather, the amount of LTS that a NECA pool member was eligible to receive in 1998 was the 1997 level of LTS (the difference between 1997 CCL revenue requirements and the sum of 1997 CCL revenues using the NECA pool rate and 1997 subscriber line charge revenues) multiplied by the rate of growth of the national average NTS cost per loop. The 1999 level of LTS was similarly adjusted from the 1998 level by the national average loop cost growth rate. Beginning January 1, 2000, LTS is adjusted for inflation to reflect the annual percentage change in the GDP-CPI.²⁵ After the implementation of ICLS (see below), the Commission determined that it was necessary to reduce LTS for some carriers to prevent over earning by those carriers whose ICLS would otherwise have fallen below zero.²⁶

23 *Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Thirteenth Report and Order and Further Notice of Proposed Rulemaking, 15 FCC Rcd 24422 (2000).

24 See previous *Monitoring Reports* for a detailed list of which companies are no longer in the NECA CL pool.

25 See 47 C.F.R. § 54.303.

26 See *Multi-Association Group (MAG) Plan for Regulation of Interstate Services of Non-Price Cap Incumbent Local Exchange Carriers and Interexchange Carriers*, *Federal-State Joint Board on Universal Service*, CC Docket Nos. 00-256, 96-45, Order and Second Order on Reconsideration, 17 FCC Rcd 11593 (2002) (*MAG Reconsideration Order*).

Nationwide pool results provided by NECA for 2001 are shown in Tables 3.4 and 3.5. Table 3.4 summarizes the CL pool revenues and expenses for the year 2001, as well as a comparison with the corresponding figures for 2000. Table 3.5 has comparable figures for NECA's traffic sensitive pool.

Table 3.6 provides a history of LTS payments. The data are based on the annual NECA NTS pool report (see Table 3.4) from February of the following year and on information provided by USAC.

In response to the 1996 Act, the Commission also has removed implicit support from interstate access charges. On May 31, 2000, the Commission established an explicit interstate access (IAS) support mechanism for price cap carriers to replace the implicit support previously collected through interstate access charges.²⁷ Like LTS, the purpose of this mechanism is to provide explicit support to ensure reasonably affordable interstate rates. This is in contrast to the Commission's other high-cost support mechanisms, which provide support to enable states to ensure reasonably affordable and comparable intrastate rates. The IAS mechanism provides support to carriers serving lines in areas where they are unable to recover their permitted revenues from the newly revised subscriber line charges. The support is fixed at an aggregate annual amount of \$650 million. It is targeted to the density zones that have the greatest need for it. It is provided on a portable, per-line basis. It is available on a competitively neutral basis to any eligible telecommunications carrier serving a supported customer, regardless of the technology used by that carrier.

In November 2001, the Commission created the ICLS mechanism for rate-of-return carriers to convert implicit support in the access rate structure to explicit, portable support.²⁸ ICLS recovers any shortfall between the allowed common line revenues of rate-of-return carriers

FCC*, 265 F. 3d 313 (5th Cir. 2001), and *Access Charge Reform*, CC Docket No. 96-262, *Price Cap Performance Review for LECs*, CC Docket No. 94-1, *Low-Volume Long Distance Users*, CC Docket No. 99-249, *Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Order on Remand, 18 FCC Rcd 14976 (2003).

28 *Multi-Association Group (MAG) Plan for Regulation of Interstate Services of Non-Price Cap Incumbent Local Exchange Carriers and Interexchange Carriers, Federal-State Joint Board on Universal Service*, Second Report and Order and Further Notice of Proposed Rulemaking in CC Docket No. 00-256, Fifteenth Report and Order in CC Docket No. 96-45, 16 FCC Rcd 19613 (2001) (*MAG Order*).

and their subscriber line charge revenues and gradually replace the carrier common line charge. Under the *MAG Order*, the ICLS mechanism was implemented beginning on July 1, 2002.

LSS provides support for traffic sensitive local switching costs. The LSS is now recovered through the universal service support mechanisms, rather than through higher traffic-sensitive access charges. Until 1997, this support was based on dial equipment minute (DEM) weighting. LSS provides support to ILECs with study areas of 50,000 or fewer access lines, to help defray the higher switching costs of small ILECs. The portion of these costs that are normally allocated to interstate is determined by the ratio of interstate to total dial equipment minutes, known as the DEM factor. However, ILEC study areas with 50,000 access lines or fewer had that portion multiplied by a weighting factor, which was determined by the number of access lines in the study area.²⁹ The resulting weighted DEM factor (which was not permitted to exceed .85) allowed these study areas to recover a greater portion of their local switching costs from interexchange carriers in the form of higher access charges.³⁰

Since 1998, the LSS factor has been calculated as the difference between the 1996 weighted DEM factor and the 1996 unweighted DEM factor. It is subject to the limit that the sum of the DEM factor and the LSS factor shall not exceed .85. Also, if the number of lines has increased since 1996 across one of the limit values of 10,000 or 20,000 or 50,000 lines, the 1996 weighted DEM factor used for computing the LSS factor is adjusted to reflect the weighting factor appropriate for the new number of lines. The LSS is the product of a carrier's annual unseparated local switching revenue requirement multiplied by its LSS factor. The Commission's rules require that the LSS be true-up with actual costs no later than 15 months after the end of the calendar year for which historical data are submitted.³¹ Table 3.7 provides a history of LSS payments since 1993. This table incorporates the true-ups that have been made.

Competitive local exchange carriers (CLECs) are eligible to receive support from the universal service support mechanisms provided that they provide service using their own facilities, either partially or completely. Thus pure resellers are not eligible. To be eligible to receive support, a carrier must be designated as an eligible telecommunications carrier (ETC) by the state regulatory commission of the state in which it operates.³² A CLEC that is designated as

29 The weighting factors, which became effective in 1993, are shown in Table 3.6 of the December 1998 and June 1999 *Monitoring Reports*.

30 The weighted and unweighted DEM factors are shown in section 8 of this report. The DEM factors were frozen in 2001 for a five year period. *See Jurisdictional Separations Reform and Referral to the Federal-State Joint Board*, Report and Order, CC Docket No. 80-286, FCC 01-162, 16 FCC Rcd 11382 (2001) (*Separations Freeze Order*).

31 47 C.F.R. § 54.301(e)(2)(iv).

32 47 C.F.R. § 54.201.

an ETC will receive high cost support that is determined by the number of lines it serves, the support per line received by the ILEC against which it is competing, and the degree to which it uses its own facilities to provide its services.³³

All of the universal service support mechanisms are administered by USAC, an independent subsidiary of NECA. As part of its administration of these support mechanisms, USAC files quarterly reports with the Commission, at least 60 days prior to the start of each quarter. These reports include quarterly projections of the amounts to be paid for each program, along with true-ups (differences between actual payments and projections) for prior periods, administrative expenses and interest income. The reports for the fourth quarter of 2002, filed on August 2, 2002, and the report for the third quarter of 2003, filed on May 2, 2003, were the primary ones used to compile the tables in this section. Other reports were also used, including those filed on May 2, 2002, November 1, 2002, and January 31, 2003.³⁴ Tables 3.8 through 3.15 provide a summary by state of the total amounts of these projected payments. Each table summarizes the annual amounts for the high-cost programs for 1998 through 2003. The 2003 numbers are based on the assumption that fourth quarter projections will be the same as those for the third quarter. Table 3.8 summarizes HCLS payments,³⁵ Table 3.9 summarizes safety net additive support payments, Table 3.10 summarizes HCMS payments,³⁶ Table 3.11 summarizes LTS payments, Table 3.12 summarizes IAS payments, Table 3.13 summarizes ICLS payments, and Table 3.14 summarizes LSS payments. Table 3.15 summarizes the total of these seven payments. Table 3.16 shows, by support mechanism, for 2002, the payments per loop to carriers.³⁷

33 47 C.F.R. § 54.307.

34 The filing dates for projections for previous quarters can be found in previous *Monitoring Reports*.

35 The high-cost loop support projections for 2000 and 2001 in Table 3.8 were reduced from the amounts reported in the USAC filings to account for implementation of the forward-looking non-rural high-cost model support mechanism. Under sections 54.309 and 54.311 of the Commission's rules, non-rural carriers are eligible for the greater of interim hold-harmless support (*i.e.*, phased down high-cost loop support) or forward-looking non-rural high-cost model support. *See* 47 CFR 54.309,54.311. In 2000 and 2001, USAC included all potential interim hold harmless payments in its high-cost loop support projections, regardless of whether non-rural carriers were eligible for such payments. Because USAC now includes interim hold-harmless payments actually made in its high-cost loop support projections, this adjustment is no longer necessary.

36 The projections for the forward-looking high-cost model support only include payments actually made based on the model. In cases where the HCL hold-harmless payment was made because it exceeded the model amount, the model amount was not counted.

37 There is no column for safety net additive support because the first payments did not

Pursuant to Part 36 of the Commission's rules, NECA collects certain cost data from ILECs that provide service to approximately 98% of the nation's subscribers.³⁸ Each year NECA collects NTS cost and loop data from the previous year, and files all such data with USAC and the Commission. USAC, as administrator of the high-cost support mechanism, uses that information to distribute high-cost assistance in the following year. On October 1, 2002, NECA reported new data for 2001, and revised data for the four previous years. State totals, based on that report, covering cost data for 2001, are presented in Table 3.17. This table shows unseparated NTS costs (revenue requirement), the number of loops, and costs per loop. It also shows the expected HCLS payments for 2003, based on 2001 data, using the high-cost formula and the cap discussed above. The costs shown are embedded costs for all companies, and the payments shown include only hold-harmless payments to non-rural companies.³⁹ The final column shows the percentage of the total payments that go to companies in the state.

Table 3.18 shows the changes, from the revised data for 2000 to the newly reported data for 2001, for state totals, of the unseparated NTS revenue requirement, the number of loops, the revenue requirement per loop, and the HCLS payments. The phrase, "payments in later year" in the last column refers to the fact that the payments are made two years after the costs are incurred; in this case, in the years 2002 and 2003. In the payments column in this table, the entry "INFINITE" indicates that the payment was zero in the first year and positive in the second year.

Tables 3.19 through 3.22 present state summaries of the revised historical information filed for 1997 through 2001 in the 2002 filing. Table 3.19 shows the unseparated NTS revenue requirements for each year. Table 3.20 shows the number of loops. Table 3.21 shows the unseparated NTS revenue requirement per loop. Table 3.22 shows the HCLS payments for 1999 through 2003.

The next several tables in this section are data for individual study areas. Tables 3.23 through 3.30 are derived from the quarterly USAC filings of projected payments. Table 3.23 has HCLS payments.⁴⁰ Table 3.24 has safety net additive support payments. Only those study areas

begin until 2003.

38 These are the carriers that settle on a cost basis. Costs for the remaining ILECs, which settle on an average schedule basis, are attributed by NECA on the basis of those carriers' average number of loops per exchange.

39 The data submitted by NECA included payments that would have been made if the forward-looking high cost model had not been implemented. These have been replaced for non-rural companies by USAC hold-harmless data.

40 The high-cost loop support projections for 2000 and 2001 in Table 3.23 were reduced from the amounts reported in the USAC filings to account for implementation of the forward-looking non-rural high-cost model support mechanism. Under sections 54.309

that qualify for these payments are included in the table. Table 3.25 provides estimates, by non-rural study area, of the high cost support using the forward-looking high-cost model support mechanism, along with the hold-harmless support for the years 2000 through 2003.⁴¹ Table 3.26 has LTS payments. Table 3.27 has IAS payments for price-cap companies. Table 3.28 has ICLS payments. Table 3.29 has LSS payments. Table 3.30 has the total support payments for all seven programs. Each of these tables (except 3.31) contains the annual amounts for 1998 through 2003. The 1998 amounts in Tables 3.23, 3.26, and 3.29 are the actual payments after processing the final true-ups for 1998.⁴² Table 3.29 has the final LSS true-ups for 1999 through 2001.⁴³ The other numbers are based on the latest revisions filed by USAC, which in most cases is from the *USAC Filing for the Fourth Quarter* of each year. In all cases the 2003 total is based on the assumption that the fourth quarter amount will be the same as the third quarter projection. CLEC areas listed in the *USAC Filing for the Third Quarter of 2003* as being ineligible for support (because they applied for, but have not yet received, ETC status) have been excluded from these tables.

and 54.311 of the Commission's rules, non-rural carriers are eligible for the greater of interim hold-harmless support (*i.e.*, phased down high-cost loop support) or forward-looking non-rural high-cost model support. *See* 47 CFR 54.309,54.311. In 2000 and 2001, USAC included all potential interim hold harmless payments in its high-cost loop support projections, regardless of whether non-rural carriers were eligible for such payments. Because USAC now includes interim hold-harmless payments actually made in its high-cost loop support projections, this adjustment is no longer necessary.

- 41 The apparent anomaly of Qwest Corp.-Wyoming getting both high-cost model support and hold-harmless support in 2000 is the result of the hold-harmless amount being greater in the first quarter and the model amount being greater for the rest of the year. Similarly, for Verizon South of Alabama (now CenturyTel of Southern Alabama), the study area received high-cost model support in the first two quarters of 2001 and hold-harmless support in the last two quarters of 2001. Consequently, separate columns are shown for model support amounts and model payment amounts for these two years. The NA entries for a time period for some companies are due to changes in the rural vs. non-rural status of those companies between the time periods, or to the changes as to which CLECs were competing with the ILECs as eligible telecommunications carriers.
- 42 These are from Universal Service Administrative Company, *Federal Universal Service Support Mechanism Fund Size Projections (USAC Filing) for the First Quarter 2002* (November 2, 2001), Appendix HC7.
- 43 These are from the *USAC Filing for the Third Quarter 2001* (May 2, 2001), Appendix HC6; *USAC Filing for the Fourth Quarter 2002* (August 2, 2001), Appendix HC17; and *USAC Filing for the Third Quarter 2003* (May 2, 2003), Appendix HC18.

Tables 3.31 through 3.36 are derived from NECA's 2002 filing.⁴⁴ Table 3.31 contains individual study area data for 2001 for unseparated NTS costs (Revenue Requirement), the number of loops, and costs per loop. It also shows the expected HCLS payments for 2003, based on 2001 data, and the percentage of the national total HCLS that goes to the study area. For study areas that acquired exchanges from another study area and had to report the amounts for the acquired exchanges separately, the study area code is appended with an A for the data for the acquired exchanges. In the second column of Table 3.31, the types are cost (C) and average schedule (A), indicating the form of settlements used by that study area. The third column indicates whether the study area has been designated as rural (R) or non-rural (N). In addition to the name of the study area, the name of the holding company (if any) is also shown. The costs shown are embedded costs for all companies, and the payments shown include only hold-harmless payments to non-rural companies.⁴⁵ Table 3.32 shows the percentage changes from the previous year for each of these amounts for individual study areas. In the payments column in this table, the entry "INFINITE" indicates that the payment was zero in the first year and positive in the second year.

Tables 3.33 through 3.36 present individual study area data for the historical information filed for 1997 through 2001 in the 2002 filing. Table 3.33 shows the unseparated NTS revenue requirements for each year. Table 3.34 shows the number of loops. Table 3.35 shows the unseparated NTS revenue requirement per loop. Table 3.36 shows the HCLS payments.⁴⁶

44 National Exchange Carrier Association, Inc., *Universal Service Fund 2002 Submission of 2001 Study Results* (October 1, 2002).

45 The data submitted by NECA included payments that would have been made if the forward-looking high cost model had not been implemented. These have been replaced for non-rural companies by USAC annualized hold-harmless data. Also, NECA did not provide data for one company: 220381 Public Service Tel. of Georgia. Data for this company are based on subtracting the amounts for all other companies from the national totals.

46 The differences between the values in Tables 3.23 and 3.36 are due to the facts that the amounts reported by USAC in Table 3.23 are based on fourth quarter projections which include updates for the previous quarters, while the amounts reported by NECA in Table 3.36 are based on payments for the first quarter of each year, that do not take into account subsequent quarterly updates. Neither can be taken as the amount actually paid during the year, except for the 1998 values in Table 3.23, which have been revised by USAC to reflect actual payments. The data for 2000 to 2003 for non-rural companies have been adjusted to reflect only hold-harmless payments for non-rural companies. The payments were changed to zero if USAC reported that only forward-looking high-cost model payments were made instead.

In compiling the historical data, it is necessary to account for changes that have occurred in the study areas over time. These changes are noted in Table 3.37.⁴⁷ In cases where study areas have merged, the pre-merger data for all of the merged study areas have been combined and reported as the data for the surviving study area in Tables 3.33 through 3.36. In cases where there has been an ownership change resulting in a code number change, the pre-change data is reported under the new code number and name. In the case of newly created study areas, pre-creation data is reported as 0. In Table 3.32, percentage changes in the case of mergers are comparisons of the surviving study area data with the consolidated pre-merger data. In the case of sales of exchanges, for comparison purposes the data for the sold exchanges are consolidated with the data for the study area that divested them.

Each year NECA submits detailed account data used to calculate the unseparated revenue requirement per loop for each study area that settles on a cost basis, and total attributed revenue requirements for study areas that settle on an average schedule basis. In its filings since 1993, in addition to submitting such information for the latest year, NECA also submitted revised information for the four preceding years. The detailed account data are not reported here, but the most recent revision of the data for each year since 1988 is available in electronic form on the **FCC-State Link** web site.

47 Because the study areas were matched between years by study area code number, changes in only the name of the company are not included in this list. However, for name changes between 2000 and 2001, Table 3.32 shows the old name in parentheses.

Average Schedule Company Settlements	\$278,571,219	\$364,985,002	31.02%
Common Line Expenses and Other Taxes	\$897,209,167	\$1,103,094,650	22.95%
Common Line Adjusted Federal Income Tax	\$74,963,263	\$87,097,282	16.19%
Total Common Line Expenses	\$1,273,303,272	\$1,579,412,040	24.04%
Common Line Residue for Distribution (Note 5)	\$268,497,561	\$301,165,008	12.17%
Common Line Average Net Investment	\$2,191,409,596	\$2,270,534,326	3.61%
Common Line Residue Ratio (Note 6)	12.25%	13.26%	8.26%

Note 1: All of the individual line items include some estimates and are subject to further adjustments under current NECA procedures.

Note 2: The pool year is the calendar year. The 2001 pool year data are reported as of February 28, 2002. The 2002 pool year data are reported as of February 28, 2003.

Note 3: Year-to-year changes are affected by changes in the number of companies participating in NECA tariffs, sales and acquisitions of assets by participating companies, average schedule to cost conversions, and mid-year tariff changes in rate levels.

Note 4: Amount includes end-user SLC waiver revenues for NECA tariff participants.

Note 5: Residue for distribution is total revenues less total expenses.

Note 6: Residue ratio is calculated by dividing the amount of residue for distribution by the amount of average net investment and multiplying by 100.

1999	\$380.3	-2.54%
2000	\$384.7	1.16%
2001	\$389.9	1.33%
2002	\$401.9	3.09%
2003	\$429.8	6.94%

Notes: Payments for 1993 - 1997 are estimates of DEM weighting impacts.

Payments for 1993 are as estimated in the May 1996 Monitoring Report in CC Docket No. 87-339.

For companies not in NECA's common line and traffic sensitive pools, an estimate was developed using the study area specific 4th quarter 1998 local switching support amounts. The 1998 levels were reduced by 5% per year to determine the 1994 - 1997 amounts.

Payments for 1998 to 2001 are final true-ups provided by USAC.

Payments for 2002 and 2003 are projections provided by USAC.
