RE: DA 00-764

Lake Cedar Group Petition "PETITION FOR EXPEDITED SPECIAL RELIEF AND DECLARATORY RULING" to Preempt Jefferson County Denial of Supertower on Lookout Mountain, Golden CO

Dear Ms. Salas,

We strongly oppose the Lake Cedar Group's petition. We are residents of Jefferson County, we work in the county and our son goes to school in the county. Last year, we the people of Jefferson County spent many hours listening to testimony and giving testimony in public hearings before the Jefferson County Commissioners. It was a long and arduous process. In the end, the Commissioners Holloway, Lawrence and Sheehan, representing the citizens of Jefferson County, made a decision to turn down Lake Cedar Group's application to place a DTV tower on Lookout Mountain in Golden, Colorado. This was a decision made by the democratic process, "of the people, by the people and for the people." Put plainly and simply, a Federal Communications Commission decision to overrule the Jefferson County Commissioners' decision would be completely undemocratic.

Sincerely yours,

Philadelphia Cousins and Robert Edward Moran  
501 Hess Avenue  
Golden, Colorado 80401

Re: Lake Cedar Group "Petition for Expedited Special Relief and  
Declaratory Ruling" to Preempt Jefferson County Denial of Supertower

Dear Mr. Salas:

I am a resident of Lookout Mountain, Colorado and a local practicing attorney. I am writing to express my strong opposition to Lake Cedar Group's (LCG's) request for FCC preemption of the decision by Jefferson County to deny LCG's application relative to the supertower.

The Jefferson County Commissioners reached their decision pursuant to state statutory and local government authority. They did so after considering overwhelming evidence from highly credible sources as to the harmful effects the supertower would inflict on our community. To disregard this evidence and preempt the Commissioners' decision would be an illegal usurpation of the land use authority vested in our state and local governmental bodies.

The evidence presented to the Commissioners indicated a number of compelling reasons for the denial of the application. These included: the potential devastating effects of long term exposure to low dose radiation; the adverse impact on the aesthetics of our environment; the possibility of a tower falling over, especially in the high winds we experience here; the expected interference with business equipment at a number of Jefferson County business establishments; interference with personal items such as garage door openers, wheel chairs, home office equipment and entertainment centers; and property devaluations.

The local authorities are familiar with these issues, themselves, and are best equipped to apply the state laws and local regulations to the facts to reach a decision in this matter that is so important to all of us in the greater Golden area, Lookout Mountain and the surrounding neighborhoods. In their wisdom, the Jefferson County Commissioners have done so, and they have decided to deny LCG's application for rezoning relative to the supertower. The FCC should not preempt this decision.

Sincerely,

Celia A. Alberts

Sirs:

This letter is in response to your request for comments on the Lake Cedar Group (LCG) request for preemption on Lookout Mountain. In my opinion, granting preemption will be a horrible idea from virtually every perspective - but especially for the credibility of the FCC. Your lives will be miserable for years if you grant this LCG request; untold millions of dollars will be wasted.

I write as one who has been actively involved in opposition to LCG for more than three years - during part of that time as chair or co-chair of the opposition led by Canyon Area Residents for the Environment (CARE). I am one of the co-authors of a study coming separately to you comparing Denver-area sites. In my opinion, site comparison is at the heart of this preemption discussion. I have been a Professor of Electrical Engineering (Georgia Tech) and have taught numerous courses in antennas and electromagnetic theory. My doctoral dissertation was on an antenna topic and I have spent many years on public policy matters as well.

The Lookout Mountain site is not the best local site available, as we have shown in our response to the John F. X. Browne site comparison study. I urge that the Commission compare the Browne study with the similar comparison of which I was a co-author. Pay especial attention to the fact that Browne never compares theoretical coverage from Lookout Mountain with coverage from Eldorado Mountain. Browne has also given misleading information about being able to solve the problems at the Quiet Zone from Eldorado - that problem is soluble.

In our study, we have attempted to use all the criteria used locally by our County Commissioners - while including all of the Browne criteria as well. Mr. Browne ignores all the testimony from the Community - as well as the issues raised by the Commissioners themselves. His analysis could have been (maybe was) made before the local hearings. What is worse for LCG and the FCC, he even fails to make the point that LCG is the only site available. Our study shows it is the worst site possible, when viewed from the normal land-use decision criteria that LCG is asking you to preempt.

Given this dispute over siting options, the next key question then

is whether the FCC and its staff are able to better make those site selection decisions that are now made locally. From my experience, the FCC and its staff are competent in handling intra-industry disputes. But you are now way too underfunded to even keep up with minimum expectations involving the general public. For instance, you are already doing a poor job in investigating power overage violations. I am also disappointed greatly in your total and unverified reliance on truthfulness in applications from broadcasters.

Virtually everyone I come into contact with views the FCC as a supporter rather than a watchdog for the Communications industry. It was for this reason that we no longer have a nuclear energy industry. The excesses of the Atomic Energy Commission (AEC) in promoting the nuclear industry over the general populace were so egregious that the AEC eventually disappeared. There were major transfers of regulatory powers to the EPA - a move that I suggest is already overdue now also for the FCC.

From an industry perspective, I acknowledge that Lookout Mountain is a good - maybe even a perfect site (if one ignores their huge costs with continuing to fight local decision-making). But the FCC is charged with a higher duty. As we have shown and Browne has failed to disprove, better sites exist than Lookout Mountain. You in the FCC have an obligation to compare all sites before you accept the statement from a group of five broadcasters that only one site is possible. I therefore urge immediate and total denial of the preemption option - in accordance with all of your preceding preemption statements. If you are ever going to grant FCC preemption, you can certainly find a better candidate site than Lookout Mountain.

Sincerely,

A handwritten signature in black ink that reads "Ronal W. Larson". The signature is written in a cursive, flowing style.

Re: DA 00-764

Lake Cedar Group Petition "PETITION FOR EXPEDITED SPECIAL RELIEF AND  
DECLARATORY RULING" to Preempt Jefferson County Denial of Supertower

Dear Ms. Salas:

Our Association comprises between 65 and 70 households in the earliest-platted subdivision on Lookout Mountain, Colorado, indeed a historic area of our state. Our neighborhood is the site of the world's largest broadcast antenna farm subjecting our neighborhood to electromagnetic radiation levels at or exceeding FCC-mandated limits, which has caused an above-average incidence of cancers in the area. Lake Cedar Group, a group of broadcast corporations, is attempting to install new towers and significantly increase this radiation. **Please** do not allow them to do so.

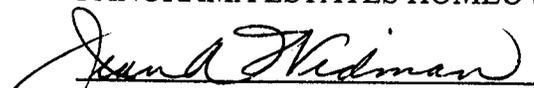

Through our elected officials we expressed our desire for no more enhancement of the tower farm in our backyards and the further electromagnetic radiation that would occur. Our local officials listened and denied the re-zoning attempt by Lake Cedar Group.

Lake Cedar Group is now asking the Federal Government to usurp our local and state laws which protect our health and safety in favor of their interests. This action would render moot the rights and obligations of our elected officials to act on behalf of our health, welfare, and benefit at the local level. A precedent set in this case would be far-reaching to our local governments throughout the nation and usurp our rights as Americans.

We request you uphold your assurances to Senator Allard and Congressman Tancredo that the FCC will not usurp authority of local governments, and that you deny this petition requesting preemption of our local government's decision.

Yours very truly,

PANORAMA ESTATES HOMEOWNERS ASSOCIATION

  
President

Re: DA 00-764  
Lake Cedar Group Petition "PETITION FOR EXPEDITED  
SPECIAL RELIEF AND DECLARATORY RULING" to  
Preempt Jefferson County Denial of Supertower

Dear Ms. Salas:

We have had the privilege of living on Lookout Mountain for the past nine years and enjoy it immensely. Anyone that visits us is overwhelmed by the panoramic view that we enjoy daily (even though our northwesterly exposure allows us a full view of the towers atop the mountain).

Although there have been numerous additions to towers, antennas, etc. over these years (which naturally obstruct our view), we are primarily concerned with the health hazards that we believe these various additions pose.

Even though the residents in this area have opposed a "supertower" being constructed and the Jefferson County Board of Commissioners denied the construction, the FCC has decided to preempt the Commissioners decision and present the petition for public comment. We do not feel the FCC should be allowed to override local land use decisions and strongly oppose this undertaking. (We are the people that live in this "exposure area".)

Respectfully,

*William J. and Iris J. Boyer*

RE: DA 00-764  
Lake Cedar Group Petition "PETITION FOR EXPEDITED SPECIAL RELIEF AND  
DECLARATORY RULING" to preempt Jefferson County Denial of Supertower

Dear Ms. Salas:

I observed over the course of many months in 1998 and 1999 the conscientious process of the Jefferson County Board of County Commissioners in review of an application by the Lake Cedar Group, LLC, to rezone land on Lookout Mountain to allow for the construction of an 854-foot telecommunications supertower and adjacent support building. There was an exhaustive and thorough review. The possibility that our community of more than 9,000 people would suffer the effects of even greater levels of electromagnetic radiation was cause for great anxiety. We were enormously relieved by the Commissioners' rejection of the application.

I am assured that alternative (and, most importantly, non-residential) sites to house the digital supertower do exist and would urge the Lake Cedar Group to explore those sites. Instead, I understand that they have petitioned the FCC to override the local authority in this matter. I ask that you respect the thoughtful decision-making of the Jefferson County Board of County Commissioners over what is a complex set of local zoning and other issues. To do otherwise would set a regrettable and dangerous precedent for our country.

Sincerely,

I, DAVID CLINGER, certify that on this 8<sup>th</sup> day

# CITIZENS PETITION AGAINST LAKE CEDAR GROUP TOWER/RADIATION

We, citizens of Jefferson County and affected residents, petition our Jefferson County Commissioners to:

1. Deny Lake Cedar Group's requested Zoning Change in Case # 98015154RZPI
2. Officially acknowledge that we do not give our consent to Jefferson County to permit any increases of electromagnetic radiation into our residential areas.
