Since all eligible public safety providers in Region 51 may utilize these frequencies, it is essential that eligible public safety agencies in all areas of government, including state, municipality, county, and Native American Tribal be represented in order to ensure that each agency's future spectrum needs are considered in the allocation process. Administrators who are not oriented in the communications field should delegate someone with this knowledge to attend, participate, and represent their agency's needs.

The Region 51 Public Safety RPC meetings are open to the public. All interested parties wishing to participate in planning for the use of public safety spectrum in the 700 MHz and 800 MHz bands within Region 51 should plan to attend. For further information, please contact:
