PUBLIC SAFETY AND HOMELAND SECURITY BUREAU WORKSHOP ON E911 PHASE II LOCATION ACCURACY RESCHEDULED TO NOVEMBER 18, 2013

PS Docket No. 07-114

The Public Safety and Homeland Security Bureau (Bureau)'s workshop to discuss recent developments in the use of wireless technology to contact emergency services and the provision and quality of 911 location information delivered to Public Safety Answering Points (PSAPs), originally scheduled for October 2, 2013, has been rescheduled.¹ The workshop will be held on Monday, November, 18, 2013, from 9:30 a.m. to 3:30 p.m., in the Commission Meeting Room (TW-C305) at FCC Headquarters, 445 12th Street SW, Washington, DC 20554. The previously announced agenda for the workshop remains unchanged.²

As noted previously, the Bureau has received certain wireless 911 call tracking data from state and local public safety entities regarding the provision of Phase II location information to PSAPs, and has made the data available in the record of PS Docket No. 07-114. The data remains available for public access and review through the Bureau's web page at www.fcc.gov/encyclopedia/phase-2-data-sets. The Bureau invites interested parties to submit any additional call tracking data for inclusion in the record for PS Docket No. 07-114 as part of the *ex parte* process. The Bureau will update the web page to reflect additional submissions.

Audio/video coverage of the meeting will be broadcast live with open captioning over the Internet from the FCC's web page at www.fcc.gov/live. The FCC's webcast is free to the public. Those who watch the live video stream of the event may email event-related questions to livequestions@fcc.gov. Depending on the volume of questions and time constraints, the panel moderators will work to respond to as many questions as possible during the workshop.

Reasonable accommodations for persons with disabilities are available upon request. Please include a description of the accommodation you will need. Individuals making such requests must include their contact information should FCC staff need to contact them for more information. Requests
