**WIRELESS TELECOMMUNICATIONS BUREAU ANNOUNCES WORKSHOPS:
ENVIRONMENTAL COMPLIANCE AND HISTORIC PRESERVATION REVIEW TRAINING
FOR THE CONSTRUCTION OF COMMUNICATIONS TOWERS AND THE COLLOCATION
OF COMMUNICATIONS GEAR AND FOR POSITIVE TRAIN CONTROL
INFRASTRUCTURE**

The FCC Wireless Telecommunications Bureau will host two educational workshops on the environmental compliance and historic preservation review process required for the construction of wireless communications facilities. The first workshop will include information relevant to the construction of all new communications towers and to the collocation of communications gear on towers and other structures. This workshop will take place on Monday, May 19, 2014. An additional workshop will be held on Tuesday, May 20, 2014, on the FCC environmental compliance and historic preservation review process for Positive Train Control infrastructure being installed by the Nation's railroads. Both workshops will run from 9:00 AM – 4:00 PM EDT in the Commission Meeting Room at FCC Headquarters, 445 12th Street, SW, Washington, DC. Both workshops will be webcast.

The first workshop will focus particularly on improving submissions to Tribal Nations and State Historic Preservation Offices as well submissions made within the Antenna Structure Registration process. At the workshop, expert staff will provide guidance to the FCC's licensees, those who construct communications facilities for FCC licensees, and their consultants on the following topics: the environmental notification process for Antenna Structure Registrations, National Environmental Policy Act compliance, Endangered Species Act compliance, and National Historic Preservation Act Section 106 compliance under the *Nationwide Programmatic Agreement for Review of Effects on Historic Properties for Certain Undertakings Approved by the Federal Communications Commission*.

The second workshop will be devoted to the submission and review process for Positive Train Control infrastructure, with a special emphasis on the Section 106 process. The workshop will review the use of the Tower Construction Notification System and the E106 System for batched submissions, as well as the various reporting requirements and deadlines associated with those systems. While this workshop will be most useful for railroads and related consultants, attendance is open to all.

Attendance. These workshops are open to the public. You may attend either or both workshops in person or through the webcast. Preregistration is required for the webcast and encouraged for in-person attendance. All attendees are advised to arrive approximately 30 minutes prior to the start of the workshops to allow time to go through our security process. Please pre-register by submitting your name, company affiliation, and dates of attendance in an email to Cecilia Sulhoff (Cecilia.sulhoff@fcc.gov).

For Additional Information. Steve DelSordo at (202) 418-1986 or by e-mail: stephen.delsordo@fcc.gov. All media inquiries should be directed to Cecilia Sulhoff at (202) 418-0587 or Cecilia.sulhoff@fcc.gov.

Accessibility Information. To request information in accessible formats (computer diskettes, large print, audio recording, and Braille), send an e-mail to fcc504@fcc.gov or call the FCC's Consumer and Governmental Affairs Bureau at (202) 418-0530 (voice), (202) 418-0432 (TTY). This document can also be downloaded in Word and Portable Document Format (PDF) at: <http://www.fcc.gov>.
