THE INCENTIVE AUCTION TASK FORCE AND THE WIRELESS TELECOMMUNICATIONS BUREAU TO HOST WEBINARS TO DISCUSS PROPOSALS PUT FORTH IN THE COMMENT PUBLIC NOTICE

AU Docket No. 14-252
GN Docket No. 12-268

On December 17, 2014, the Commission released the Incentive Auction Comment Public Notice,¹ seeking comment on detailed proposals for conducting the broadcast television spectrum incentive auction, including proposed procedures for the forward auction, the reverse auction, and integration of the forward and reverse auctions. To facilitate public input on those proposals, the Incentive Auction Task Force and the Wireless Telecommunications Bureau will host three webinars about the proposed auction process.

Topics covered in the Forward Auction Webinar will include: how the proposed ascending clock auction works, including bid types and bid processing; proposals for extended round bidding; proposed spectrum reserve implementation, and proposed procedures for the assignment phase.

Topics covered in the Reverse Auction Webinar will include: setting the opening bid prices; auction application and initial commitment; descending clock auction procedures, including single and multiple option bidding and bid processing.

Topics covered in the Integration Webinar will include: setting an initial clearing target, including determining impairments, and the final stage rule.

To participate in the webinars, please follow the registration instructions below:
