Implementation Date: On or after December 31, 2015

Planned Network Change(s) Will Occur at the Cascade, Iowa Office:

<u>Location(s)</u>	<u>Office</u>
106 Taylor Street SE Cascade, IA	CSCDIAXODS0

Description of the Planned Network Change(s):

In connection with the deployment of fiber distribution facilities throughout its service area, Cascade Communications Company is converting all facilities at its above-identified Central Office to fiber to the home (FTTH) network architecture.

Description of Reasonably Foreseeable Impact(s) of the Planned Change(s):

Effective as of the Implementation Date identified above, interconnection at the Cascade, Iowa CO must be via fiber facilities. No new copper distribution facilities will be installed, and all existing copper distribution facilities will be migrated to fiber. There will be limited support of certain copper distribution facilities until all customers are migrated to fiber-based services. Following the complete cutover to a fiber-based services, copper reliant services such as non-loaded copper loops will not be supported. All other types of unbundled loops will still be available.

Notice to Connecting Carriers Pursuant to 47 C.F.R. § 51.333(a):

There are currently no local exchange carriers or other carriers that directly interconnect with Cascade Communications Company. The change will therefore not result in discontinuance, reduction or impairment of any service to any connecting carrier. Because there are no connecting carriers impacted by this network change, a separate public notice to connecting carriers pursuant to 47 C.F.R. § 51.333(a) is not applicable.
