	)	
Implementation of Sections 3(n) and 322	)	
of the Communications Act	)	GN Docket No. 93-252

**SECOND ERRATUM**

Released: November 8, 1995

1. This Erratum corrects Section 90.665(c) of the Final Rules, set forth in Appendix A of the *Second Order on Reconsideration and Seventh Report and Order* in the above-captioned proceeding, FCC 95-395 (rel. Sept. 14, 1995). This correction is necessary to clarify that the Commission adopted two distinct options to satisfy construction requirements for MTA licensees in the 900 MHz Specialized Mobile Radio Service. Under the first option, the MTA licensee must demonstrate coverage of 1/3 of the MTA's population three years from the date of license grant, and demonstrate 2/3 coverage of the MTA's population five years after license grant. The second option requires an MTA licensee to demonstrate five years after license grant that it is providing substantial service to the MTA. To implement Section 90.655(c), an MTA licensee must, three years from license grant, either submit a showing that the 1/3 population coverage standard has been satisfied, or provide written notification that it has elected to show substantial service to the MTA five years from license grant. In addition, as part of the election to provide a substantial service showing, each MTA licensee must, three years from license grant, indicate how it expects to demonstrate substantial service at five years. Corrected Section 90.665(c) of the Commission's Rules, 47 C.F.R. § 90.665(c) should read as follows:

**§ 90.665 Authorization, construction and implementation of MTA licenses.**

\* \* \* \* \*

(c) Each MTA licensee in the 896-901/935-940 MHz band must, three years from the date of license grant, construct and place into operation a sufficient number of base stations to provide coverage to at least one-third of the population of the MTA; further, each MTA licensee must provide coverage to at least two-thirds of the population of the MTA five years from the date of license grant. The MTA licensee must meet the population coverage benchmarks regardless of the extent to which incumbent licensees are present within the MTA block. Alternatively, an MTA licensee must demonstrate, through a showing to the Commission five years from the date of license grant, that it is providing substantial service.
