### PLEADING CYCLE ESTABLISHED

**Petitions to Deny Due:** June 3, 2016  
**Oppositions Due:** June 10, 2016  
**Replies Due:** June 17, 2016

## I. INTRODUCTION

Sprint Corporation (Sprint), and T-Mobile USA, Inc. (T-Mobile, and together with Sprint, the Applicants), have filed applications pursuant to Section 310(d) of the Communications Act of 1934, as amended,<sup>1</sup> seeking the simultaneous assignments and exchanges of full and partitioned Personal Communications Service (PCS) licenses by and among certain wholly-owned subsidiaries of Sprint and T-Mobile.<sup>2</sup> The subject licenses cover geographic areas scattered throughout the country. The proposed transactions involve the transfer of spectrum; no customers or networks would be transferred.

According to the Applicants, the proposed transaction involves only intra-market exchanges of spectrum, and in most markets the attributable spectrum holdings of Sprint and T-Mobile would be unchanged. The Applicants indicate that the intra-market exchanges would allow for holding larger blocks of contiguous spectrum and/or aligning spectrum blocks with those already held in adjacent markets, which in turn should permit more reliable and efficient operations.

Our preliminary review of the applications indicates that the PCS spectrum implicated by the proposed transaction covers 166 counties in all or parts of 65 Cellular Market Areas (CMAs), covering approximately seven percent of the population of the United States in parts of Florida, Georgia, Idaho, Montana, New Mexico, North Carolina, New York, Ohio, Pennsylvania, South Carolina, Texas, Washington, and West Virginia.

Pre-transaction, across all the CMAs involved in these transactions, Sprint holds 44 megahertz to 220.5 megahertz of spectrum in total; post-transaction, Sprint would continue to hold 44 megahertz to 220.5 megahertz of spectrum in total. Our preliminary review indicates that in those counties in which Sprint would realize a net gain in its PCS spectrum holdings, it would hold a maximum of 210.5 megahertz of spectrum in total post-transaction. Sprint would newly trigger the spectrum screen in

Sumter County in CMA 363 (Florida 4 – Citrus) and Columbia County in CMA 366 (Florida 7 – Hamilton), and would further increase its spectrum holdings that are currently already above the spectrum screen in an additional nine counties in parts of Florida.

Pre-transaction, T-Mobile holds 40 megahertz to 104.5 megahertz of spectrum across all the CMAs involved in these transactions; post-transaction, T-Mobile would hold 40 megahertz to 102 megahertz of spectrum in total. In those counties in which T-Mobile would realize a net gain in its PCS spectrum holdings, its spectrum holdings post-transaction would not trigger the total spectrum screen.
