**NOTICE OF UNLICENSED OPERATION**

Case Number: EB-FIELDNER-17-00025137

On September 21, 2017, Region One of the Federal Communications Commission's (FCC's or Commission's) Enforcement Bureau (Bureau) dispatched Agents to investigate a complaint of an unlicensed FM station operating on the frequency 106.5 MHz in Bridgeport, Connecticut. The Agents confirmed by direction finding techniques that radio signals on frequency 106.5 MHz were emanating from your property on Marion Street, Bridgeport, Connecticut. The Commission's records show that no license was issued for operation of a radio station on 106.5 MHz at this location in Bridgeport, Connecticut. The Agents investigated and determined you are the owner or operator of the FM broadcast station on 106.5 MHz in Bridgeport, Connecticut.

Radio stations operating on a range of frequencies,<sup>1</sup> including 106.5 MHz, must be licensed by the FCC pursuant to Section 301 of the Communications Act of 1934, as amended (Act).<sup>2</sup> The only exception to this licensing requirement is for certain transmitters using or operating at a power level or mode of operation that complies with the standards established in Part 15 of the Commission's rules.<sup>3</sup> The field strength of your signal on frequency 106.5 MHz was found to exceed the maximum permitted level of 250  $\mu\text{V}/\text{m}$  at 3 meters for non-licensed devices. Thus, this station is operating in violation of Section 301 of the Act.<sup>4</sup>

You are hereby warned that operation of radio transmitting equipment without a valid radio station authorization, or in violation of the Commission's RF radiation limits, constitutes a violation of the Federal laws cited above and will subject the operator to severe penalties, including, but not limited to, *in rem* seizure of the offending radio equipment without further notice, substantial fines, and criminal sanctions, including imprisonment.<sup>5</sup>
