**NOTICE OF UNLICENSED OPERATION**

Case Number: EB-FIELDSCR-17-00024510

On December 2, 2017, an Agent from the Miami Office (Miami Office) of the Federal Communications Commission's (FCC's or Commission's) Enforcement Bureau (Bureau) investigated an unlicensed FM station operating on frequency 97.7 MHz in Miami, Florida. The Agent confirmed by direction finding techniques that radio signals on frequency 97.7 MHz were emanating from a residential property in Miami, Florida. Through investigation, the Agent determined that you were the operator of the station. The Commission's records show that no license was issued for operation of a broadcast station at this location on 97.7 MHz in Miami, Florida.

Radio stations operating on a range of frequencies,<sup>1</sup> including 97.7 MHz, must be licensed by the FCC pursuant to Section 301 of the Communications Act of 1934, as amended (Act).<sup>2</sup> The only exception to this licensing requirement is for certain transmitters using or operating at a power level that complies with the standards established in Part 15 of the Commission's rules.<sup>3</sup> On December 2, 2017, the field strength of the signal on frequency 97.7 MHz exceeded the maximum permitted level of 250 microvolts per meter ( $\mu\text{V}/\text{m}$ ) at 3 meters for non-licensed devices. Thus, this station is operating in violation of Section 301 of the Act.<sup>4</sup>

You are hereby warned that operation of radio transmitting equipment without a valid radio station authorization constitutes a violation of the Federal laws cited above and could subject the operator to severe penalties, including, but not limited to, substantial monetary fines, *in rem* arrest action against the offending radio equipment, and criminal sanctions including imprisonment.<sup>5</sup>
