## FCC RELEASES 2005 INTERNATIONAL TRAFFIC DATA

Washington, D.C. - The Federal Communications Commission (FCC) today released a report entitled *2005 International Telecommunications Data* regarding traffic between the United States and other countries for international message telephone, private line, and miscellaneous services on a country-by-country basis.

### Statistical Findings

- Facilities-based and facilities-resale traffic together increased 10.0% from 63.7 billion minutes in 2004 to 70.1 billion minutes in 2005. For purpose of categorizing traffic, a facilities-based carrier provides service using its own international transmission facilities, while a facilities-resale carrier provides service utilizing international circuits leased from other reporting international carriers.
- U.S. billed revenues for international telephone, private line, and other miscellaneous services decreased 13.2% from 2004 to 2005.

### **International Services Billed Revenues** (Shown in Thousands of Dollars)

	<b>2004</b>	<b>2005</b>	<b>Percent Change</b>
<b>Telephone</b>	\$8,653,398	\$7,400,098	-14.5%
<b>Private Line and Other Miscellaneous</b>	723,395	737,589	2.0%
<b>Total Billed Revenues</b>	\$9,376,793	\$8,137,687	-13.2%

- U.S. carriers' net settlement payments (the amount they pay foreign carriers to terminate traffic overseas), and retained international revenues (revenues after settlement payments are made) decreased 13.1% for net settlement payments and 13.3% for retained international revenues from 2004 to 2005.

**Total Billed Revenues,  
Net Settlement Payments, and  
Retained Revenues**  
(Shown in Thousands of Dollars)

	<b>2004</b>	<b>2005</b>	<b>Percent Change</b>
<b>Total Billed Revenues</b>	\$9,376,793	\$8,137,687	-13.2%
<b>Net Settlement</b>	(3,611,811)	(3,137,975)	-13.1%
<b>Retained</b>	\$5,764,982	\$4,999,712	-13.3%

- Resale traffic grew from 38.6 billion minutes in 2004 to 46.6 billion minutes in 2005. Billed revenues for resale services increased from \$5.2 billion in 2004 to \$5.8 billion in 2005. The total number of carriers reporting resale services increased 5% from 799 in 2004 to 838 in 2005.

The report is available for reference in the FCC's Reference Information Center at 445 12th Street, S.W., Courtyard Level, Washington, D.C. 20554. # 2005 International Telecommunications Data

## April 2007

### **Introduction**

This is the Federal Communications Commission's (FCC's) annual report compiling data on telecommunications service between the United States and international points. The data compiled in this report are for the year 2005. The data are compiled from reports submitted to the FCC by U.S. carriers pursuant to Section 43.61 of the Commission's rules.<sup>1</sup> Section 43.61(a) directs carriers to file reports by July 31 that summarize international telecommunications service provided during the preceding calendar year. Carriers submit their final data for the preceding calendar year by October 31. The specific filing requirements are set forth in the *Manual for Filing Section 43.61 Data* (June 1995).

### **Statistical Findings**

- U.S. billed minutes increased 10.0% from 63.7 billion in 2004 to 70.1 billion in 2005.
- In 2005, eighty U.S. facilities-based and facilities-resale (see definitions on page 3) carriers together reported that they billed \$7.4 billion for international telephone service, and \$738 million for international private line and other miscellaneous services, compared to \$8.7 billion, and \$723 million respectively, in 2004.
- U.S. carrier's net settlement payments – the amount paid to foreign carriers to compensate those carriers for completing calls – decreased from \$3.6 billion in 2004 to \$3.1 billion in 2005.
- Retained revenues – revenues billed by U.S. carriers, less settlement amounts owed to foreign carriers for U.S. billed traffic, plus settlement amounts due to U.S. carriers for foreign-billed traffic – decreased 13.3% from \$5.8 billion in 2004 to \$5.0 billion in 2005.
- Pure resale providers resell the services of underlying U.S. facilities-based and facilities-resale carriers. The number of reporting carriers grew from 799 in 2004 to 838 in 2005. Pure resale minutes grew from 38.6 billion in 2004 to 46.6 billion in 2005. Billed revenues increased from \$5.2 billion in 2004 to \$5.8 billion in 2005.

Table 1 summarizes the traffic and revenue data reported by all U.S. facilities-based and facilities-resale carriers for 2005, but does not include pure resale service. These categories are explained below.

---

<sup>1</sup> The Commission's data collection rules under 47 C.F.R. § 43.61 are the subject of a pending Notice of Proposed Rulemaking. See *Reporting Requirements for U.S. Providers of International Telecommunications Services; Amendment of Part 43 of the Commission's Rules*, IB Docket 04-112, Notice of Proposed Rulemaking, 19 FCC Rcd 6460 (2004) (*International Reporting Requirements Reform NPRM*)(proposing modifications to the Section 43.61 and 43.82 international data collection rules).

**Table 1. International Telecommunications Revenues, 2005**

	Traffic Measures*	Revenues Billed by U.S. Carriers (millions)	Net Settlements with Foreign Carriers (millions)	Net Retained Revenues** (millions)
Message Telephone (millions of minutes)	91,929	\$7,400	(\$3,138)	\$4,262
Private Line (number of circuits)	29,763	174	None	174
International Other Miscellaneous***		103	(0)	103
<b>Total****</b>		<b>\$8,137</b>	<b>(\$3,138)</b>	<b>\$4,999</b>

\* Traffic measures for international message telephone and other miscellaneous service include both U.S. billed traffic and foreign billed traffic that terminates in the United States, but excludes most traffic that transits the United States.

\*\* Net U.S. carrier retained revenues equal billed revenues plus settlement amounts receivable from foreign carriers less amounts due to foreign carriers. See Table 3, below. Detail may not match totals because of necessary rounding.

\*\*\* In 2005, carriers reported frame relay/ATM, virtual private line, occasional television, and VOIP services as other miscellaneous international services. That information can be found in Section C (International Miscellaneous Services, Page 1) of this report. Carriers use several different traffic measures when reporting the different types of international other miscellaneous services. Therefore, no totals can be calculated for international other miscellaneous traffic measures or total traffic measures.

\*\*\*\* Total above includes \$3.1 billion billed revenues, \$1.0 billion net settlements, and \$2.1 billion net revenues for twenty-four facilities-based and facilities-resale carriers together requesting confidential treatment in the above categories.

## Definitions

International services are provided either on a facilities-based, facilities-resale, or pure resale basis. For categorizing traffic, **facilities-based** traffic refers to services provided using international transmission facilities owned in whole or in part by the carrier providing the service. Facilities-based carriers use one or more international channels of communication to provide international telecommunications service. An international channel is a wire or radio link that facilitates electronic communications between a U.S. point and a point outside the domestic United States (*see* Table 4, below). A facilities-based carrier is “a carrier that holds an ownership, indefeasible-right-of-user, or leasehold interest in bare capacity in the U.S. end of an international facility, regardless of whether the underlying facility is a common carrier or non-common carrier submarine cable or a satellite system.” *See* 47 C.F.R. § 63.09(a). For categorizing traffic, **facilities-resale** traffic refers to services provided by a carrier utilizing international circuits leased from other reporting international carriers. The determination as to whether international private line services are reported as facilities-based or facilities-resale generally is based on the first international link of a circuit. If the carrier has an ownership interest in that link, or leases it from an entity that does not report that link, then service provided over that circuit will be reported as facilities-based. Otherwise, the international private line service should be reported as facilities-resale.

Carriers provide **pure resale** services by switching traffic to (and reselling the switched services of) underlying U.S. carriers. The underlying carriers control the circuit that carries the traffic to the international point, arrange for termination of the traffic, and report the traffic on a country-by-country basis in their own Section 43.61 reports. Table 2 shows that there are reduced reporting requirements for services provided on a pure resale basis. Some carriers report traffic carried over circuits that they own and those that they lease from other carriers, as well as traffic that they handle on a pure resale basis, *i.e.*, by reselling the switched services of underlying carriers. These carriers report detailed data for traffic that they carry over owned and resold circuits and summary data for switched traffic that they route to other U.S. carriers. Section D of this report has information on pure resale services. In 2005, 838 carriers reported that they provided international message telephone service on a pure resale basis. These pure resale providers billed customers \$5.8 billion for 46.6 billion minutes. Fourteen of these pure resale providers also reported international facilities-based and facilities-resale services.

Starting with the 1991 data filings, the Commission required carriers to file facilities-based traffic separately from pure resale traffic. Facilities-resale traffic was not separated from facilities-based traffic. Beginning with the 1995 data filings, the Commission required carriers to provide separate switched service and private line data for facilities-based and facilities resale services. At that time, a few carriers were offering international simple resale (ISR) services<sup>2</sup> which at that time consisted of telephone services provided over resold private lines, *i.e.*, on a facilities-resale basis. The Commission subsequently allowed carriers to provide ISR services using owned circuits as well as resold circuits. Beginning with the 1997 data filings, the Commission required carriers to separate switched services data by the settlement arrangements made with carriers in foreign

---

<sup>2</sup> The Commission eliminated its ISR policy in the *2004 International Settlements Policy Reform Order*. *See International Settlements Policy Reform, International Settlement Rates*, IB Docket No. 02-234, First Report and Order, 19 FCC Rcd 5709, 5723-25, paras. 26-31 (2004) (“*2004 International Settlements Policy Reform Order*”).

countries for terminating that traffic. Carriers now classify switched service traffic as traditional settlement with proportionate return or as non-traditional settlement, including traffic hubbed through an intermediate foreign country (see definitions on page 5).<sup>3</sup> Carriers continue to report facilities-based and facilities-resale private line services separately.

Carriers must report switched traffic in three broad categories: U.S. billed, foreign billed, and transiting. **U.S. billed** traffic includes all traffic billed by U.S. carriers, and includes most calls that originate in the United States, calls that are placed collect or “caller toll-free” to the United States, U.S. carrier “country-direct” and “country-beyond” calls, and U.S. carrier reorigination traffic.

**Country-direct** and **country-beyond services** are U.S. carrier offerings that allow customers in foreign locations to route calls through U.S. carrier facilities to reach the United States (country-direct) or any world point (country-beyond). Country-direct and country-beyond services rely on alternative billing arrangements, such as credit cards, and enable the customer at a foreign point to be served by a U.S. carrier rather than by a foreign carrier. Note that U.S. carriers or their affiliates may operate in many foreign countries as foreign carriers. They do not report section 43.61 traffic for calls that they carry from one foreign country to another unless they carry this traffic through a U.S. point.

**Reorigination traffic** is traffic of a foreign carrier that transits a U.S. carrier’s facilities and terminates with another carrier in a foreign point. The carrier terminating the traffic in the foreign point views the traffic as U.S. traffic. Reorigination allows the originating foreign carrier to take advantage of the U.S. carrier’s accounting rate agreement with the carrier in the terminating country. The U.S. carrier treats reorigination traffic like U.S. billed traffic when it settles with the carrier in the country of termination, and it reports this traffic as U.S. billed traffic for filing purposes.

In their public filings, carriers include country-direct, country-beyond and reorigination traffic with other U.S. billed traffic. In proprietary filings, carriers separate these services from other U.S. billed traffic. Table A1 shows that carriers reported 70.1 billion minutes of U.S. billed traffic in 2005, for which they billed \$7.4 billion. Table A39 shows that 61.8 billion of these minutes and \$6.1 billion of this revenue were for calls that originated in the United States or terminated collect or caller toll-free in the United States. Table A40 shows that 1.1 billion of these minutes and \$0.6 billion of this revenue was for country-direct and country-beyond type services. Table A41 shows that 7.2 billion of these minutes and \$0.7 billion of this revenue was for reorigination services billed to foreign carriers.

**Foreign billed** traffic is all traffic billed by a foreign or correspondent carrier and includes most calls that originate at foreign points as well as collect and caller toll free calls placed by U.S. customers to foreign points. Foreign billed calls do not necessarily originate in the country for which the traffic is reported. In some cases, foreign carriers reoriginate traffic for other foreign carriers. U.S. carriers may not know which calls are reoriginated.

---

<sup>3</sup> See *Annual Section 43.61(a) International Telecommunications Traffic Reports Due by July 31, 2006*, Public Notice, 21 FCC Rcd 6813 (Int’l. Bur. 2006).

**Transiting** traffic is traffic of a foreign carrier that transits a U.S. carrier's facilities and terminates with another carrier in a foreign point. Unlike reorigination traffic, transiting traffic is settled based on the settlement rate between the actual countries of origination and destination. Transiting traffic is billed by the originating foreign carrier, and settlement payments are reported by U.S. carriers for the country in which the service is billed. Where there are so-called “cascade billing arrangements,” U.S. carriers report both settlement receipts and settlement payments for transiting calls. In a cascade billing arrangement, the U.S. carrier collects from the originating foreign carrier both a transit fee and the settlement amount that the originating foreign carrier will owe to the terminating foreign carrier. The U.S. carrier then makes the settlement payment to the terminating foreign carrier.

As explained above, carriers separately report international switched telephone, telegraph, telex, and miscellaneous services based on the financial termination arrangements. **Traditional Settlement** traffic is settled according to the Commission’s International Settlements Policy (ISP). The settlement is based on the accounting rate, which is part of a compensation agreement negotiated between a U.S. carrier and its foreign correspondent on a particular international route. The ISP requires nondiscriminatory accounting rates among U.S. carriers on a given route and that the U.S. carrier and its foreign correspondent share the accounting rate on a 50/50 basis. The ISP also requires that the U.S. carrier agree to accept no more than its proportionate share of return traffic from the foreign carrier. Until recently, all settlement rates and agreements had to comply with the Commission’s ISP.<sup>4</sup> Table A37 shows that U.S. carriers reported 26.6 billion minutes of U.S. billed traditional settlement traffic in 2005, for which they billed \$2.4 billion.

**Non-Traditional** traffic is switched traffic that is routed and settled by the U.S. carrier outside of the traditional settlement process. Table A38 shows that U.S. carriers reported 43.5 billion U.S. billed non-traditional minutes of traffic in year 2005, for which they billed \$5.0 billion. U.S. carriers also reported receiving 13.2 billion foreign billed non-traditional minutes of traffic in year 2005. These tables may understate the total amount of traffic settled under non-traditional arrangements because it appears that carriers continued to report substantial amounts of non-traditional settlement traffic as traditional settlement traffic for year 2005.<sup>5</sup>

---

<sup>4</sup> See 47 C.F.R. §§ 43.51(e), 64.1001 (2003). In 2004, the Commission lifted the ISP agreements involving foreign carriers that do not have market power and on routes where the termination rates for U.S.-international services were below a certain threshold. *2004 International Settlements Policy Reform Order*, 19 FCC Rcd at 5723-24, paras. 27-28. Currently, 165 routes are exempted from the ISP. See *U.S.-Cambodia Route Exempted from the International Settlements Policy*, Public Notice, IB Docket Nos. 02-324, 96-261, 20 FCC Rcd 963 (Int’l. Bur. 2005).

<sup>5</sup> For example, carriers reported 4.8 billion minutes of non-traditional settlement traffic for Canada, and 1.9 billion minutes for the United Kingdom. They also reported 4.1 billion and 1.5 billion, respectively, minutes of traditional settlement traffic for each country. The Commission has permitted non-traditional settlement arrangements for U.S.-Canada and U.S.-U.K. traffic since 1992 and 1994, respectively. It is therefore unlikely that carriers are in fact settling substantial amounts of traffic on these two U.S. international routes under traditional settlement arrangements.

## Reporting Requirements

Different levels of reporting are used for different categories of service. Table 2 shows that carriers must report traffic and revenues on a country-by-country basis for the most commonly used communications services.

**Table 2. International Telecommunications Reporting Requirements**

Service	Level of reporting for traffic and revenues for larger U.S. points *	Traffic Measures
<p><b>Traffic exchanged with foreign carriers under Traditional Settlement, and Non-Traditional Settlement</b> (Includes service provided over owned and resold circuits.)</p> <p>Switched Services Message Telephone Service</p> <p>Miscellaneous and Other International Services ***** Message Telegraph Service Teleprinter Exchange (Telex) Service Occasional Use Television Packet Switching Switched Video</p>	<p>Country-by-country</p> <p>Region and world totals Region and world totals Region and world totals Region and world totals Region and world totals</p>	<p>Messages** and minutes***</p> <p>Messages** and words Messages** and minutes Hours Kilo Segments Sessions and minutes</p>
<p><b>Facilities-Based and Facilities-Resale Services</b></p> <p>Private Line Services</p>	<p>Country-by-country</p>	<p>Circuits at year-end, 64-kilobit equivalent circuits at year-end, revenues for the entire year</p>
<p><b>Pure Resale Services</b> (resale of underlying carrier switched services)</p>	<p>World totals</p>	<p>Minutes</p>

See notes to Table 2 below.

**Table 2. International Telecommunications Reporting Requirements -  
Continued**

Notes:

- \* Carriers may file world totals in lieu of country-by-country data for the smaller U.S. points identified in Table 4.
- \*\* Carriers are not required to file message counts for transiting traffic.
- \*\*\* Many carriers have requested proprietary treatment for country-by-country transiting minutes. Both U.S. and foreign carriers compete for transiting traffic. The minutes data would allow competitors to estimate contract revenues per minute. The published tables therefore contain region and world totals for transiting minutes.
- \*\*\*\* Prior to filing 1995 data, carriers selected their own traffic measures for miscellaneous services.

For private line services, carriers report the number of actual circuits leased to customers at year-end. Beginning with their 1995 international traffic data, carriers also report these circuits in terms of voice-equivalent circuits. For lower bandwidths, this means reporting the number of 64-kilobit-per-second channels that would equal the actual circuits. An 18 megahertz video channel, however, would be reported as 240 voice-equivalent channels; a 24-megahertz video channel would be reported as 288 voice-equivalent channels; and a 36-megahertz video channel would be reported as 630 voice-equivalent channels. This is the same conversion factor used by carriers in preparing circuit data reports filed pursuant to Section 43.82 of the Commission's rules, and to calculate regulatory fees.<sup>6</sup> Voice-equivalent circuits are denoted "64 K" in the attached tables.

Facilities-based U.S. and foreign carriers jointly provide most international services. This is not always apparent to the customer, but is reflected in some of the traffic and revenue data that are filed. For switched services, one carrier collects from customers and then compensates its foreign partners through the settlement process. In the case of traditional settlement traffic, compensation is based on minutes of calling and on accounting rates specified in settlement agreements. The number of minutes used for settlement purposes is generally based on the number of conversation minutes. In many cases, accumulated seconds are used to determine the minutes used in settlements. In the case of Mexico, billed minutes are used to determine settlements. Carriers providing non-traditional traffic may have settlement-like arrangements under which U.S. carriers and their foreign correspondents compensate each other for traffic that originates or terminates at foreign points. Starting in 1991, for facilities-based and facilities-resale services, the Commission directed carriers to report the minutes used for

---

<sup>6</sup> *Manual for Filing Section 43.82 Circuit Data in accordance with the FCC's Rules and Regulations*, October 1995, available from the FCC's Internet site at <http://www.fcc.gov/ib/pd/pf/csmanual.html>.

settlement purposes.<sup>7</sup> Pure resale carriers file billed minutes, since they do not participate in the settlement process and may not have access to settlement minutes data.

Country-beyond calls have two international legs. Our rules direct carriers to report both the originating and terminating legs of such calls. Consequently, approximately two minutes will be reported for each conversation minute. Each leg of the call may have settlement payments and these payments should be reported for the appropriate country. Carriers are instructed to report all billed revenues by the country in which the call originates. Country-direct and country-beyond traffic are treated confidentially and are not identified separately from a carrier’s publicly filed data.

For U.S. billed switched services, the tables show the amount that the customers are billed for service, the corresponding settlement amount that the carrier owes to its foreign partner, and the amount of revenues that it retains. Carriers are instructed to report the actual amount of revenues that they bill for service, net of discounts. Many carriers offer discount plans that entitle customers to discounts based on the customer’s total bill. Some carriers do not recalculate discounted bill amounts on a call-by-call basis. These carriers collect country-by-country revenue totals based on non-discounted rates and must estimate the amount of discounts for each country.

For foreign billed traffic, the tables show the settlement amounts owed to U.S. carriers by foreign carriers. The tables refer to these amounts as “Receipts from Foreign Carriers.” In the case of transiting traffic, the U.S. carrier often receives a transit fee for itself, and a settlement amount which is owed to the terminating carrier. Thus, the tables show receipts, payouts and a net amount for transiting traffic. Table 3 shows the revenue relationships between U.S. carriers and foreign carriers.

**Table 3. International Telecommunications Revenue Relationships**

U.S. Billed Traffic	Billed revenues <u>- Settlements owed to foreign carriers</u> = U.S. carrier retained revenues
Foreign Billed Traffic	Settlements due from foreign carriers = U.S. carrier retained revenues
Transiting Traffic	Transit fee and settlements due from foreign carriers <u>- Settlements owed to foreign carriers</u> = U.S. carrier retained revenues
Total	Retained revenues for U.S. billed + Retained revenues from foreign billed <u>+ Retained revenues from transiting</u> = Total U.S. carrier retained revenues

<sup>7</sup> Prior to 1991, carriers were directed to report billed minutes, rather than settlement minutes. Billed minutes tend to be greater than settlement minutes because some carriers bill in 30-second increments.

U.S. carriers report the number of private line circuits actually leased at year-end. Financial arrangements for private line services are different than for public switched services. Unlike message telephone service, where the rate charged to consumers covers the whole cost of the call, the U.S. carrier's private line rate covers only the half-circuit to the theoretical mid-point. In some cases, each carrier bills for its half of the service; in other cases, one carrier acts as the collection agent. The FCC Filing Manual states that U.S. carriers must report the amount of private line revenues that they record for their half of the service, regardless of who actually collects the revenues.<sup>8</sup> The filing manual also states that U.S. carriers should not report revenues that they collect on behalf of the foreign carriers or amounts that they bill for services that they provide in foreign countries.

International points are grouped into ten regions for reporting purposes. The regions include all countries of the world as well as three maritime classifications - the Atlantic, Pacific, and other oceans. In some cases, international points have been grouped outside the geographic region for reporting purposes. For example, the Azores and Madeira Islands are included with Portugal. Any data reported to these points are included with Portugal traffic and are summarized with Western Europe traffic in the tables.<sup>9</sup>

Carriers are required to file separate data for each U.S. point that they serve. Alaska and Hawaii, for example, are considered distinct U.S. points for this purpose. Table 4 identifies the U.S. points used for reporting purposes. Carriers serving larger U.S. points are required to file detailed country-by-country data on computer disk. Carriers serving smaller U.S. points may file world totals in lieu of country-by-country data. In a few instances, carriers have obtained waivers so that they can consolidate data for Hawaii and the conterminous United States.<sup>10</sup>

---

<sup>8</sup> *Manual for Filing Section 43.61 Data*, June 1995, available from the FCC's Internet site at <http://www.fcc.gov/ib>, under "Industry Information," click "*Section 43.61 International Traffic Data*."

<sup>9</sup> See FCC report titled, *International Points Used for FCC Reporting Purposes*, April 1994, available from the FCC's Internet site at <http://www.fcc.gov/wcb/iatd/intl.html>.

<sup>10</sup> The conterminous United States consists of data from the 48 contiguous states and the District of Columbia.

**Table 4. Reporting Requirements for Facilities-Based and Facilities-Resale Services**

Larger U.S. points for which carriers file country-by-country data	Smaller U.S. points for which carriers file world total data
<u>Domestic U.S. points</u> Alaska Conterminous U.S. (48 States) Hawaii Puerto Rico	American Samoa Baker Island Howland Island Jarvis Island Johnston Atoll Kingman Reef Midway Atoll Navassa Island Northern Mariana Islands Palmyra Atoll Wake Island
<u>Other U.S. points</u> Guam U.S. Virgin Islands	

Table 4 shows which U.S. points are classified as **domestic** and which are classified as **other**. Calls between domestic U.S. points are considered domestic and therefore are not reported. Calls between domestic U.S. points and other U.S. points are defined as international and are reported. For example, a directly dialed call originating in Guam and terminating in Hawaii is reported by the carrier serving Guam as U.S. billed traffic to Hawaii. Note that a carrier serving Hawaii reports this same call as a foreign billed call from Guam.<sup>11</sup>

**Presentation of Data**

Table 5 lists the carriers whose data are presented in the attached tables. Table 6 summarizes the billed revenue data contained in the tables, and Table 7 summarizes the net revenue data contained in the tables (billed revenues net of settlement payments).

This report summarizes Section 43.61 data for all reporting carriers and for all U.S. points. Some tables show totals for all carriers serving individual U.S. points. Other tables show totals for all data filed by individual carriers. Data have been consolidated where a holding company owns more than one carrier. For example, the data Orbitel S.A. E.S.P. reported for its subsidiary, Cinco Telecom Corporation, have been consolidated and included with other Orbitel S.A. E.S.P. data. This report organizes the country-by-country data by region of the world. The foreign points

<sup>11</sup> Thus, our aggregate call statistics double-count both the call and the associated minutes. Table A1 shows that U.S. carriers reported 13.1 billion calls between the U.S. and international points. Of these calls, 28 million (less than 1%) were reported for traffic between U.S. points. Thus, the double-counting is small when compared to the overall number of calls. The *International Reporting Requirements Reform NPRM* proposes to eliminate the requirement that carriers report traffic between U.S. points. See *supra* n.1.

are listed alphabetically in each region.

U.S. carriers are required to file message and minute counts for switched services that originate or terminate at a U.S. point. They are required to report only minutes for traffic that transits U.S. points, though, because U.S. carriers sometimes have difficulty obtaining message counts for traffic billed by foreign telephone companies. As noted in Table 2, transiting minutes are not published on a country-by-country basis. Region totals are provided for those regions where transiting traffic is carried from more than one country.

Carriers file detailed traffic data using a record format contained in the filing manual. For switched services, each record contains a billing type code that signifies the traffic exchange method (*e.g.*, traditional settlement vs. non-traditional settlement) and whether the call was U.S. billed, foreign billed, or transiting. For U.S. billed calls, the billing type code indicates whether the data represents (a) U.S.- originated traffic and U.S.-terminated collect and subscriber toll free traffic; (b) country-direct and country-beyond traffic; or (c) U.S. carrier reorigination traffic. For international private line services, the billing type code signifies whether the data contain facilities-based or facilities-resale circuits. The billing codes used for filing year 2005 data are contained in the International Bureau's Public Notice DA 06-1290, *Annual Section 43.61(a) International Telecommunications Traffic Reports Due by July 31, 2006*, released June 19, 2006.

The table titles use billing types to indicate the type of data aggregated in a particular table. There are two groups of billing type codes for switched services. Billing types 1 through 6 are used for traditional settlement traffic. Billing types 11 through 16 are used for non-traditional settlement traffic. The billing types do not distinguish between a switched service provided over a carrier's owned facilities or a service provided using leased circuits.

The specific billing types allow the following breakdowns.

<u>Billing Type(s)</u>	
1, 11	U.S. billed calls that originate in, or terminate collect or subscriber toll-free in, the United States
2, 12	foreign billed calls
3	traditional transiting calls (there is no billing type 13 because all traditional transiting calls are exchanged under traditional settlement arrangements)
4, 14	U.S. billed country-direct and country-beyond calls
5, 15	terminating leg of calls reoriginated by U.S. carriers and terminated via facilities-based or facilities-resale circuits
35	terminating leg of calls reoriginated by U.S. carriers and terminated via pure resale of another carrier's switched services
6, 16	originating leg of calls reoriginated by U.S. carriers

There are only two billing type codes used for private line services. Billing type 1 signifies facilities-based circuits. Billing type 11 signifies facilities-resale circuits.

Insight Midwest, L.P.	Universal Access, Inc.
Insight Midwest Holdings, LLC	Vanco Direct USA, LLC
Insight Phone of Illinois, LLC	Western Telephone, Inc.
IT Communications, LLC d/b/a Iowa Telecom	YMax Communications Corp.

### Traffic Arrangements: U.S. carriers use the following types of arrangements to govern the exchange of traffic between themselves and foreign carriers.

- 1/ Traditional Settlement & Proportionate Return - Traffic settled according to the Commission's International Settlements Policy (ISP). The ISP requires that the U.S. carrier and its foreign correspondent share the accounting rate on a 50/50 basis. An accounting rate is part of a compensation agreement negotiated between a U.S. carrier and its foreign correspondent on a particular international route. Until recently, all settlement rates and agreements had to comply with the Commission's International Settlement Policy. See 47 C.F.R. §§ 43.51 (e), 64.1001 (2003). In 2004, the Commission lifted the ISP for agreements involving foreign carriers that do not have market power and on routes where the termination rates for U.S.-international services were below a certain threshold. See 2004 International Settlements Policy Reform Order, 19 FCC Rcd at 5723-24 paras. 27-28. Consequently, 163 routes were exempted from the ISP in 2004. See Public Notice, 19 FCC Rcd 24056 (2004).
- 2/ Non-Traditional Settlement & Proportionate Return - Traffic settled outside the Commission's ISP.

### The following companies' section 43.61(a) international telecommunications traffic reports were combined because of mergers, acquisitions, and changes in corporate structure:

- 3/ ABS-CBN Telecom North America, Inc. inadvertently submitted international message telephone pure resale services for previous years. All of ABS-CBN's international traffic is over facilities owned by the company.
- 4/ ACC Telecommunications LLC and ACC Telecommunications of Virginia stopped providing international services after March, 2004. Voice and long distance customers in Buffalo, Charlottesville and Richmond were sold to TelCove, Inc. in 2004.
- 5/ Advanced Network Communications, LLC did not provide any international service in calendar year 2005.
- 6/ AT&T Corp. and SBC Communications, Inc. merged on November 18, 2005. As a result, AT&T, Inc. was formed.
- 7/ Cellular Mobile Systems of St. Cloud sold its customer base and licenses to Verizon Wireless on March 1, 2005. Information submitted in the carrier's 2005 section 43.61(a) submission is for January through February, 2005.
- 8/ Dobson Communications Corporation's submission for calendar year 2005 is on behalf of its wholly-owned subsidiaries Dobson Cellular Systems, Inc. and American Cellular Corporation.
- 9/ Embratel Americas, Inc. discontinued providing international services as of December 31, 2004.
- 10/ Geocomm Corporation discontinued providing international services as of May, 2004.
- 11/ GlobalTel LD, Inc., on June 30, 2006, acquired VeriSign, Inc.'s American Roaming Network.
- 12/ Intelsat General Corporation did not have any reportable common carrier services in 2005.
- 13/ Japan Telecom America, Inc. did not have any active common carrier circuits to report for calendar year 2005.
- 14/ MercedNet, Inc. ceased operations after calendar year 2004.
- 15/ Nationwide Long Distance Service, Inc. submitted a report that it did not provide international services in calendar year 2005.
- 16/ Network Service Billing, Inc. submitted a report that it did not provide international services in calendar year 2005.
- 17/ PT-1 Long Distance's information for August 30, through December 31, 2005 is included with the information reported for Startec Global Communications Corporation. Information prior to August 30, was unable to be retrieved because the company no longer provides service.
- 18/ Questar InfoComm, Inc., discontinued providing international IMTS resale after calendar year 2005.
- 19/ Southern Illinois RSA Partnership d/b/a/ First Cellular of Southern Illinois was acquired by AllTel Corporation on May 1, 2006.

## Addendum to Table 5 -- Continued

- 20/ Sprint Nextel Corporation Wireless Division's submission includes information for the following subsidiaries:  
Nextel Communications, Inc.-CONSOLIDATED      Sprint Spectrum Holding Co. L.P.  
Nextel Partners, Inc.      SprintCom, Inc.  
PhillieCo, L.P.
- 21/ Steelville Long Distance did not provide any international services in calendar year 2005.
- 22/ Telcove, Inc. was acquired by Level 3 Communications, Inc. on July 24, 2006.
- 23/ Teligent Services, Inc., was acquired by Startec Global Communications in year 2004.
- 24/ Transtel Communications, Inc., sold its business operations and its international and domestic 214 authorizations to UCN, Inc. The company has been out of business since mid-2005.
- 25/ United States Advanced Network, Inc. has not provided any international service since calendar year 2004.
- 26/ Universal Interconnect Services, Inc. was sold to a canadian company named WaveCrest in 2005.
- 27/ Wave Division Holdings, LLC's subsidiary Seren Innovations Inc., d/b/a Astound Broadband 2005 section 43.61(a) submission is for January 1, through November 2, 2005. Information for November 3, through December 31, 2005 was submitted by Wave's subsidiary, Astound Broadband, LLC.
- 28/ WiTel Communications was acquired by Level 3 Communications on December 23, 2005.

### The following companies either changed their name or filed a report name different from the previous years:

- 29/ Arizona Telephony Brokers, LLC filed its 2005 section 43.61(a) submission as Broadband Dynamics, LLC.
- 30/ Belgacom International Carrier Services North America, Inc. was previously named Swisscom North America, Inc. On July 1, 2005, Belgacom S.A. and Swisscom Fixnet Limited combined their international carrier services.
- 31/ Brazos Long Distance filed its 2005 section 43.61(a) submission as North Texas Cellular, Inc. d/b/a Brazos Long Distance Int'l.
- 32/ Citizens Telephone Cooperative, Inc. filed its 2005 section 43.61(a) as Citizens Telephone Long Distance.
- 33/ Comanche County Long Distance filed its 2005 section 43.61(a) as Comanche County Telecommunications, L.P.
- 34/ Comcast Phone of New York was formerly known as Carmel Telephone Services, Inc.
- 35/ Deltacom, Inc. was formerly known as ITC^DeltaCom Communications, Inc.
- 36/ Easton Telecom Services, L.L.C. was formerly known as Weston Telecommunications, L.L.C.
- 37/ Farmer's Long Distance, Inc. filed its 2005 section 43.61(a) submission as Oregon Farmers Mutual Long Distance.
- 38/ Goldfield Communications Services Corp.'s subsidiaries, GAN Long Distance and Goldfield Communications Long Distance Services filed their 2005 section 43.61(a) as Goldfield Access Network, LC, and Goldfield Telephone Company respectively.
- 39/ Hector Communications filed its 2005 section 43.61(a) submission as Indianhead Communications Corporation.
- 40/ Long Distance of Michigan, Inc. d/b/a LDMI Telecommunications also d/b/a Fonetel filed its 2005 submission as LDMI Telecommunications.
- 41/ Mabel Long Distance, Inc. was formerly known as Mabel Cellular Inc.
- 42/ Millennium Telcom, L.L.C. d/b/a OneSource Communications filed its 2005 section 43.61(a) as One Source Communications.
- 43/ NTELOS Long Distance filed its 2005 section 43.61(a) submission as NTELOS Network Inc.
- 44/ One Touch India d/b/a Global Respondez, Inc. filed its 2005 submission as Global Respondez, Inc.
- 45/ S&T Telephone Cooperative Association filed its 2005 section 43.61(a) submission as S&T Communications, LLC.
- 46/ Smithville Telecom, Inc. d/b/a Smallville Long Distance filed its 2005 section 43.61(a) submission as Smithville Telecom, LLC.
- 47/ SRT Communications Inc. was formerly known as Souris River Telecommunications d/b/a SRT Long Distance
- 48/ Tri-County Telcom, Inc. was formerly known as Tri-County Communications, Inc.
- 49/ Trilogy International Enterprises, LLC was formerly known as Western Wireless International Enterprises.
- 50/ Verizon Communications, Inc.'s subsidiary, CODETEL International Communications Incorporated (CIC), on August 2, 2006, changed its name to Verizon International Communications Services Inc. (VICSI).
- 51/ Western Communications, Inc. filed its 2005 section 43.61(a) submission as Logix Communications, LP.
- 52/ Western Wireless International Enterprises, Inc. changed its name to Trilogy International Enterprises, LLC.
- 53/ WorldxChange Corp. d/b/a Acceris Communications' 2005 section 43.61(a) submission was filed as Acceris Management and Acquisition LLC, d/b/a Acceris Communications ("AMA").

### The following companies requested confidential treatment pertaining to their calendar year 2005 section 43.61(a) submission:

- |   |  |
|---|--|

**2005 Section 43.61 International Traffic Data**  
**Traffic Measures Used For Miscellaneous Service Tables \***

Company / Service **	Traffic Measure #1	Traffic Measure #2
<b>Facilities-Based and Facilities-Resale Providers of Miscellaneous Services</b>		
Cinergy VOIP Services	Messages	Minutes
France Telecom Virtual Private Line	Leases	Voice Equivalent Circuits
Level 3 Communications, Inc. Occasional Television	Hours	
Sprint Frame Relay/ATM	Circuits	64 KBPS
UniPlex Telecom Technologies, Inc. VOIP Services	Messages	Minutes
Verizon Communications, Inc./MCI, Int'l. Packet Switching	Kilo Segments	

\* Traffic measures are specified in the Manual for Filing Section 43.61 Data, June 1995.

\*\* In 2006, recognizing the de minimis nature of associated revenues and burden to file, the Commission granted MCI's request not to report its other miscellaneous international telex and telegraph services. The Commission, however, did require the carrier to retain the data for telex and telegraph services for two years from the date of the Commission's response to the carrier's waiver request (*i.e.*, until July 31, 2008). Other carriers that previously reported providing telex or telegraph service explained that they had either sold or discontinued their international telex and telegraph operations. As a result, there are no data reported for other miscellaneous international telex and telegraph services in year 2005.

Note: Carriers provide pure resale services by switching traffic to (and reselling the switched services of) underlying U.S. carriers. The underlying carriers control the circuit that carries the traffic to the international point, arrange for termination of the traffic and report the traffic on a country-by-country basis. Reporting underlying U.S. carriers' country-by-country data are available in Section A: Switched Services Telephone of this annual publication, International Telecommunications Data.

2005 Annual Section 43.61 International Traffic Data for All U.S. Points: All Settlement Arrangements

Table E: Market Shares Message Telephone Service Billing Types Covered: 1, 2, 3, 4, 5, 11, 12, 14, 15

Carrier 1: IDT Corporation Carrier 2: Reliance Communications, Inc. Carrier 3: Sprint Nextel Corporation Carrier 4: Verizon Communications Inc./MCI Int'l, Inc.

International Point	Traffic Billed in the United States						Traffic Billed in Foreign Countries										U.S. and Foreign Billed Traffic
