

## Dial 211 for Essential Community Services

In many states, dialing “211” provides individuals and families in need with a shortcut through what may be a bewildering maze of health and human service agencies’ phone numbers. By simply dialing 211, those in need of assistance are referred, and sometimes connected, to appropriate agencies and community organizations.

Dialing 211 helps the elderly, the disabled, those who do not speak English, those who are having a personal crisis, those who have limited reading skills, or those who are new to their communities, among others, by providing referrals to, and information about, health and human services organizations and agencies.

2-1-1 reaches approximately 270 million people (90% of the total U.S. population), covering all 50 states (including 41 states with 90%+ coverage), the District of Columbia, and Puerto Rico. Yet millions of Americans still need to be connected. To find out whether 211 services are offered in your area and to obtain more information, visit [www.211.org](http://www.211.org).

### How 211 Works

211 works a bit like 911. Calls to 211 are routed by the local telephone company to a local or regional calling center. The 211 center’s referral specialists question callers, access databases of resources available from private and public health and human service agencies, match the callers’ needs to available resources, and link or refer them directly to an agency or organization that can help.
