

The Dangers of Distracted Driving

The popularity of mobile devices has had some unintended and sometimes deadly consequences. An alarming number of traffic accidents are linked to driving while distracted, including use of mobile devices while driving, resulting in injury and loss of life. The most recent national statistics are sobering.

- Approximately nine people are killed and more than 1,000 injured daily in the United States in incidents reported as involving a distracted driver, [the CDC reports](#).
- According to [the National Highway Traffic Safety Administration](#), there were 3,477 people killed and an estimated additional 391,000 people injured in motor vehicle crashes involving distracted drivers in 2015 alone.
- During daylight hours across America, approximately 660,000 drivers are using cell phones or manipulating electronic devices while driving, the NHTSA reports.
- Handheld cell phone use continues to be highest among 16-24 year old drivers, according to [the National Occupant Protection Use Survey](#).

What you can do to help

Give clear instructions – Give new drivers simple, clear instructions not to use their wireless devices while driving. Before new drivers get their licenses, discuss the fact that taking their eyes off the road – even for a few seconds – could cost someone injury or even death.

Lead by example –No one should text and drive. Be an example for others and if you need to text or talk on the phone, pull over to a safe place. Set rules for yourself and your household regarding distracted driving.

Become informed and be active –Tell family, friends and organizations to which you belong about the importance of driving without distractions. Take information to your kids' schools and ask that it be shared with students and parents.

State laws

Currently there is no national ban on texting or using a wireless phone while driving, but a number of states have passed laws banning texting or wireless phones or requiring hands-free use of wireless phones while driving. As of June 2017:

- 15 states, the District of Columbia, Puerto Rico, U.S. Virgin Islands and Guam ban drivers from hand-held phone use.
- 38 states and D.C. ban all cell phone use by novice drivers, and 20 states and D.C. prohibit it for school bus drivers. 47 states, the District of Columbia, Puerto Rico, U.S. Virgin Islands and Guam ban texting while driving.

Some localities have additional regulations on distracted driving.
