

EXCHANGE OF NOTES (OCTOBER 24, 1962) BETWEEN THE GOVERNMENT OF CANADA  
AND THE GOVERNMENT OF THE UNITED STATES OF AMERICA  
CONCERNING THE COORDINATION AND USE OF RADIO FREQUENCIES  
ABOVE THIRTY MEGACYCLES PER SECOND

I

*The Chargé d'Affaires, a.i. of the United States Embassy in Canada  
to the Secretary of State for External Affairs*

EMBASSY OF THE UNITED STATES OF AMERICA

Ottawa, October 24, 1962

No. 107

Dear Sir:

I have the honour to refer to discussions which have taken place between representatives of the Government of Canada and the Government of the United States of America relating to the coordination and use of radio frequencies above thirty megacycles per second. In the course of these discussions, the sovereign right of each country to regulate its use of radio frequencies was acknowledged. Also, the desirability of providing for adequate spectrum space to meet equitably the requirements of the radio services of both Canada and the United States, now and in the future, was recognized. In addition, the representatives recognized that it was the mutual advantage of both countries to avoid harmful interference to each other's radio services and they noted the major developments that have taken place and are taking place in both countries in that part of the radio frequency spectrum allocated internationally by the International Telecommunication Union from thirty megacycles per second (30 Mc/s) up to forty gigacycles per second (40 Gc/s).

In the interest of efficient spectrum management the representatives have made the following proposals and drafted the attached Technical Annex which constitutes a part of them:

- (1) The two countries will continue to recognize those frequency arrangements already in effect for bands above 30 Mc/s as described in the Technical Annex;
- (2) They will establish, where mutually determined as being feasible and desirable, arrangements for the coordination of radio frequency assignments in those bands above 30 Mc/s for which there are no existing procedures;
