

# Wildfires 2007

Chris R. Hinshaw, ENP  
Vice President, CPRA

# Regional Communications System GOAL

**“We must be able to talk to  
whoever we need  
to talk to in order to complete  
our mission.”**

Chief Dennis Van Der Maaten  
Carlsbad Fire Department,  
Chairman, RCS Board of Directors  
1995-2000

- **To provide SEAMLESS wireless communications for public safety and public service agencies throughout San Diego and Imperial county's.**
  - ***SEAMLESS means COMPATIBLE***
  - ***COMPATIBILITY means law, fire, EMS and others are able to talk readily with each other to coordinate their responses, resulting in saving lives and property.***

# Regional Communications System STRATEGY

- **Goal strategy**
  - *To achieve the goal through selecting wireless systems and equipment that are compatible with those currently in operation, and*
  - *By using policy and technology to make incompatible systems interoperable with the RCS, and*
  - *By influencing the direction and funding for interoperable communications through a successful model*
- **Public safety and public service personnel serving over 3 million people in the two counties using COMPATIBLE wireless public safety communication systems.**

# Regional Communications System

## Benefits of Approach

- **Interoperability between the region's public safety wireless communication networks.**
- **Greater user safety through discrete, secure communications and AVL capability.**
- **Increased efficiency of diminishing resources.**
- **Shared is BETTER!**
  - **Enhanced wireless coverage.**
  - **Enhanced disaster communications capability.**
  - **Economies of scale and scope.**
    - **Discount pricing on equipment**
    - **Shared operational cost**

# Regional Communications System Governance

- Partnering jurisdictions have approved a “Participating Agency Agreement”.
  - *San Diego County Board of Supervisors authorizes RCS Board of Directors to administer system.*
- Each member jurisdiction has seat on RCS Member Board.
  - Member Board approves budget.
- Board of Directors administers the RCS through staff supplied by County of San Diego.
- Board establishes pricing policies and decides who may be a customer/partner.
- RCS staff manages day-to-day operations with the RCS Board of Directors authority.

# Regional Communications System

## PARTIES - COST

- Local, county and state participants
- Agencies may join as partners or may contract for use of the RCS
- Over 200 government agencies/departments on RCS
  - Capacity for over 30,000 users at less than 1% busies
- Initial San Diego County cost - ~ \$83 million
  - ~ \$39 million wireless backbone and County user equipment
- Imperial County cost - ~ \$12 million
  - Backbone and user equipment
- Estimated system life is more than 15 years

# Regional Communications System

## FUNDING - IMPLEMENTATION

- **San Diego County RCS construction completed on schedule in 1998**
- **Project completed within \$83 million budget**
- **Network Acceptance Test in November, 1997 revealed 96%+ coverage.**
- **Agency implementation began March, 1998.**
  - **Over 7,000 users at start-up**
  - **Currently more than 20,000 users**

# Regional Communications System COVERAGE - TERRAIN

- **Coverage area:**
  - *Two of California's largest counties*
  - *Nearly 10,000 square miles*
  - *Over 185 miles of U. S. - Mexico Border*
- **Terrain:**
  - *Sea level at San Diego*
  - *Over 7,000 feet at Palomar Mountain*
  - *100 feet below sea level in City of Calipatria*

# Regional Communications System TECHNICAL SUMMARY

- **Motorola Smartzone 800 MHz**
- **Trunked, Simulcast**
- **Not Fully APCO 25 compliant**
  - **Mixed Mode Analog/Digital**
  - **3.6 KB/S System**
- **Embassy Switch**
- **IMBE Voice Coder**
- **Digital Encryption capable**
- **Sized for over 30,000 voice users**

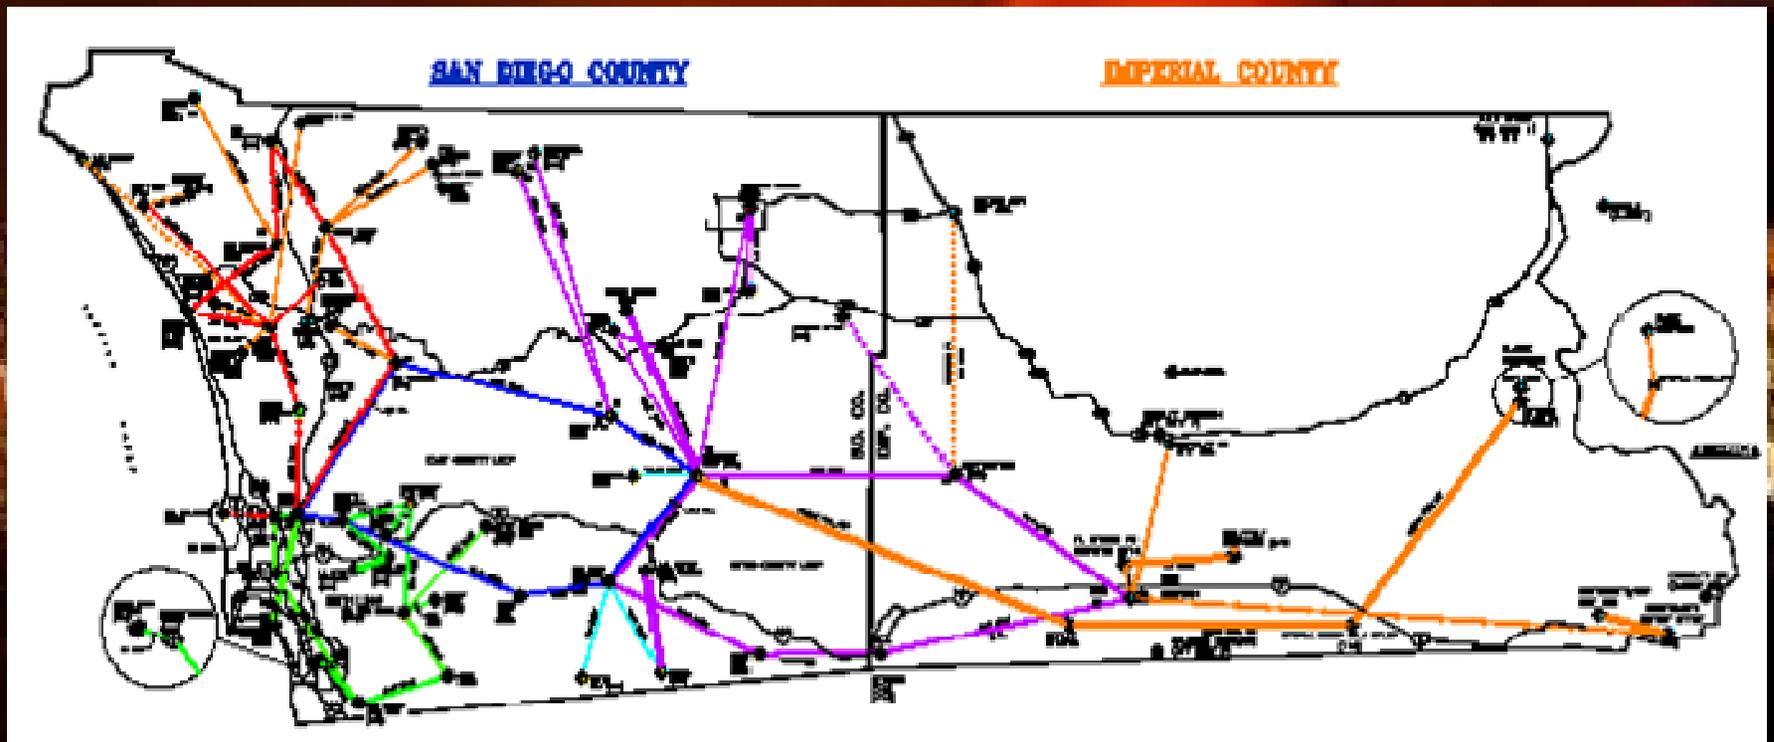

# Regional Communications System TECHNICAL SUMMARY (cont'd.)

- **67 microwave relay sites (both counties)**
- **52 800 MHz repeater sites**
  - **San Diego County** - *45 repeater sites*
    - *Four simulcast cells (32 repeaters)*
    - *13 stand alone, non-simulcast repeaters*
  - **Imperial County** - *7 stand alone repeater sites*
- **186 frequency pairs (POWER OF SHARING)**
  - *12.5 KHz, 821 MHz (NPSPAC)*
  - *25 KHz, 806 MHz*
- **95% Coverage performance requirement**

## The San Diego County – Imperial County Regional Communications System

- Sized for 30,000 Users
  - Currently 21,000 User IDs, 264 Agencies
    - All disciplines
    - All levels of government
- Average month:
  - 3.2 Million requests for channel assignment (“calls”)
  - 1950 delayed channel assignments (“busies”)
    - 450 typical in Simulcast Zones
    - 1500 typical in IR sites

# San Diego-Imperial County Regional Communications System

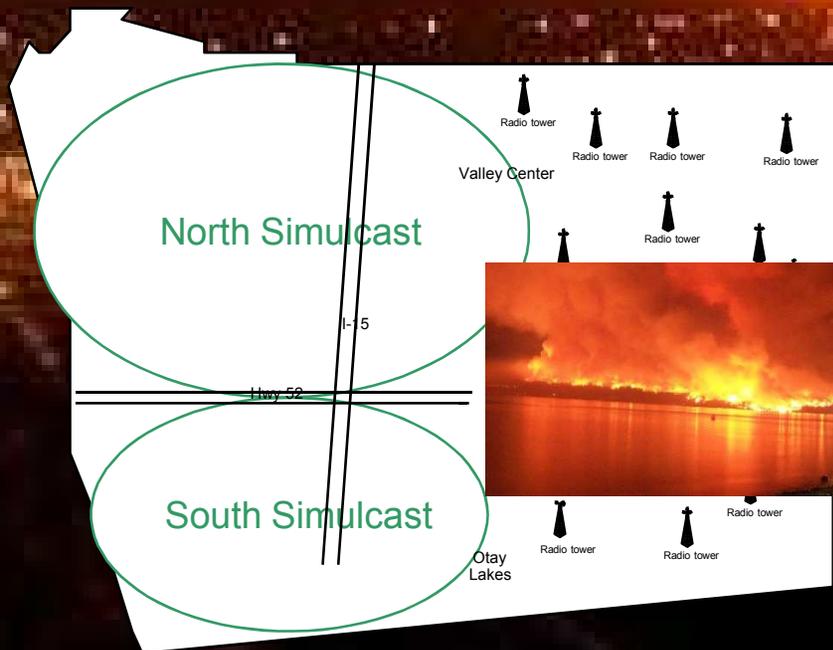

# RCS 2003/2007 Comparisons

## Cedar Fires 2003

265,355 PTT's 9% of 1 month's normal traffic

104,605 busies 19.1 sec

2003

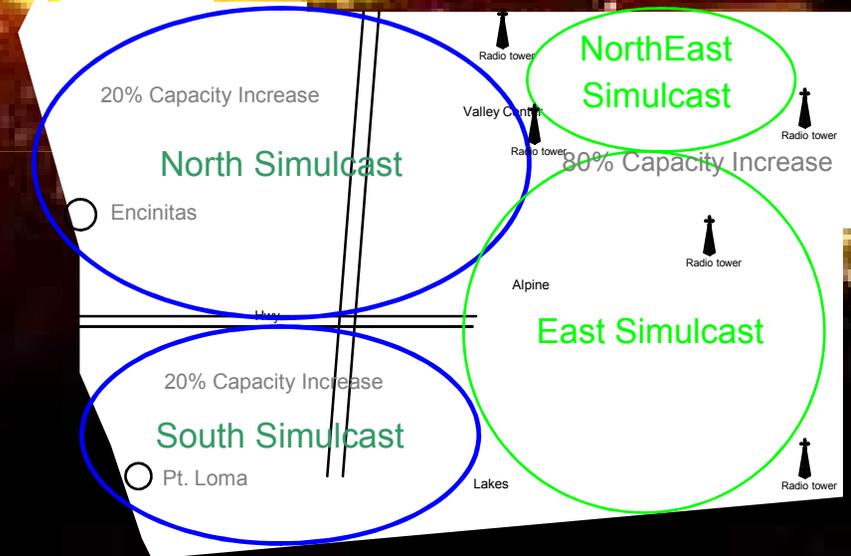

## 2007 Wildfires

264,048 PTT's 8% of 1 month's normal traffic

33,021 busies 5.6 sec

2007

## Angel Fire June 2007

4 busies in Simulcast

1100 busies on Banner IR

# Wildfires 2007

## *The COMC Perspective*

- October 21, 2007, 0920 hrs at home monitoring fire channels
- Predicted high winds are blowing, 30-40 with gusts of 60, humidity levels in low teens, fuel moisture non-existent after 3 years of drought conditions
- 0930 The Harris fire starts from downed power lines. 30-40 mile an hour winds, light to medium fuel, rapid rate of spread, imminent structure exposure
- Emery Hill radio site in direct line of encroachment, self dispatch to check site

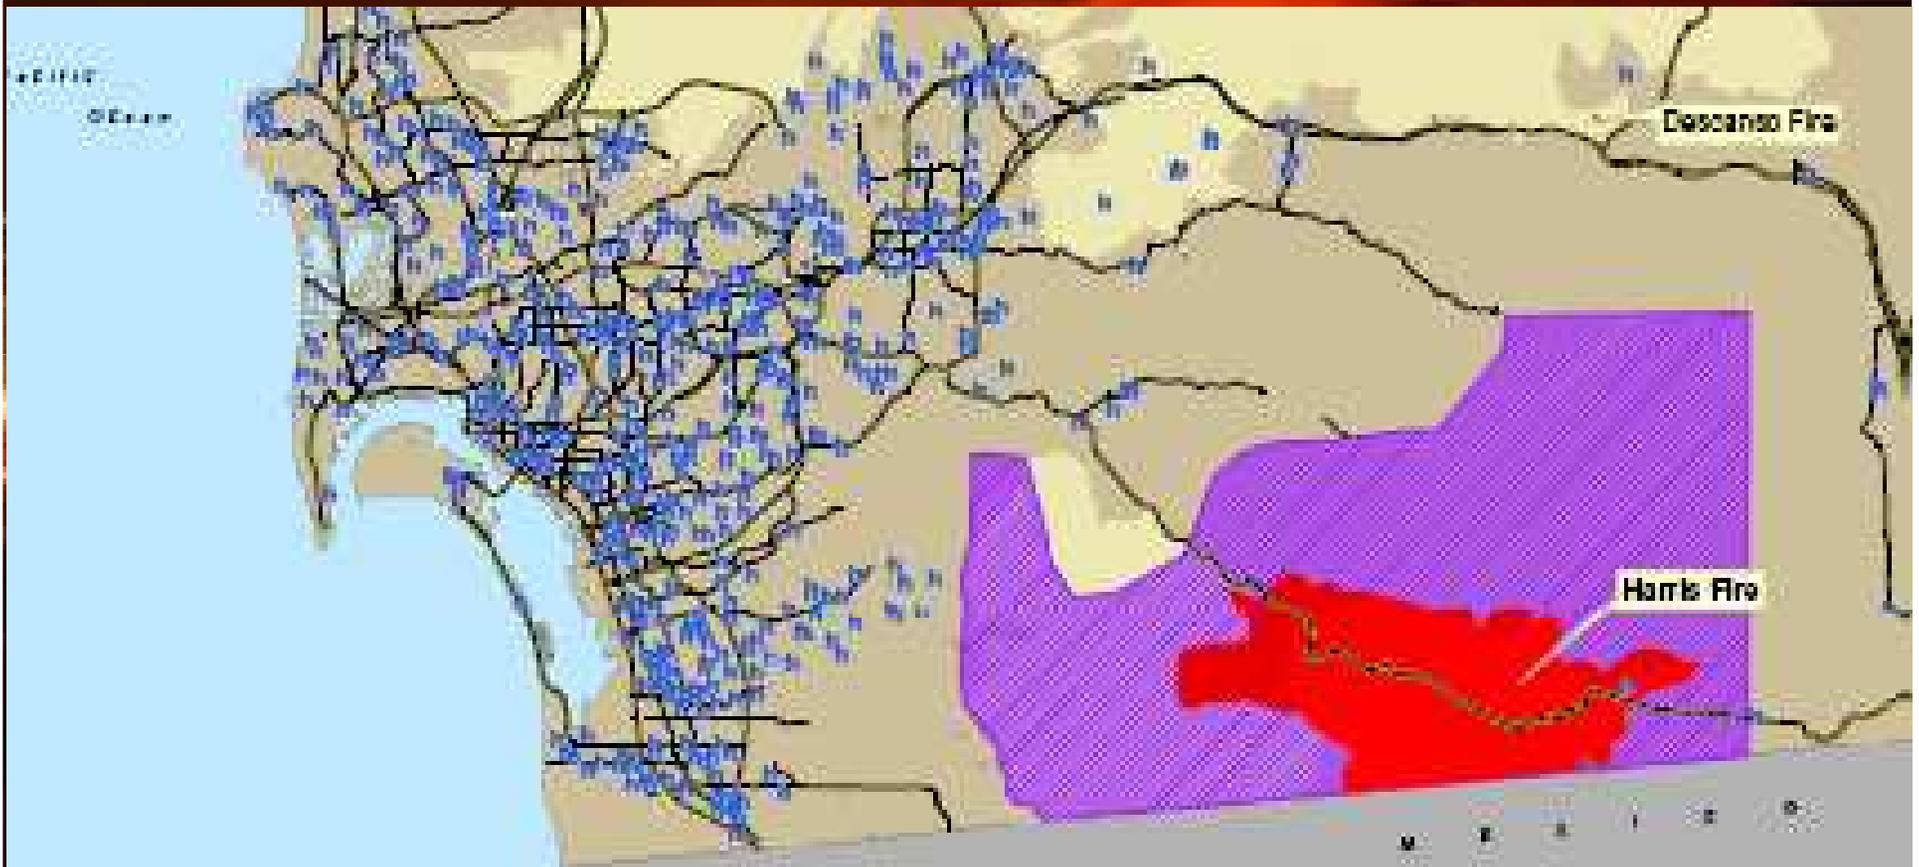

# Wildfires 2007

## *The COMC Perspective*

- 0950 at scene in Potrero, Emery Hill site secure, fire burned around site, on generator
- CalFire Engine burned over, 4 injuries
- Highway 94 cutoff by fire, Tecate on the US side in imminent danger
- 1235 Witch Fire starts
- Respond to County EOC to activate the Interoperability Communications Coordinator position (new to EOC in 2007)

# Wildfires 2007

## *The COMC Perspective*

# Wildfires 2007

## *The COMC Perspective*

- In accordance with California Mutual Aid protocol all wild land fires in the State use VHF Hi-band for command and tactical communications
- In San Diego all Public Safety agencies use 800MHz RCS for daily operations, fire have both VHF and 800MHz radios
- CHP use both RCS and VHF lo-band, CBP use VHF hi-band Federal channels
- Potential for communications interoperability issues

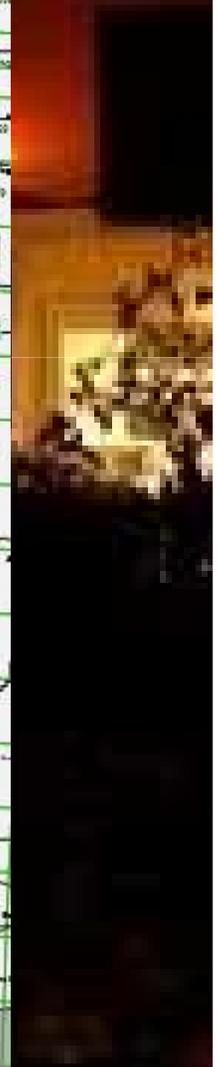

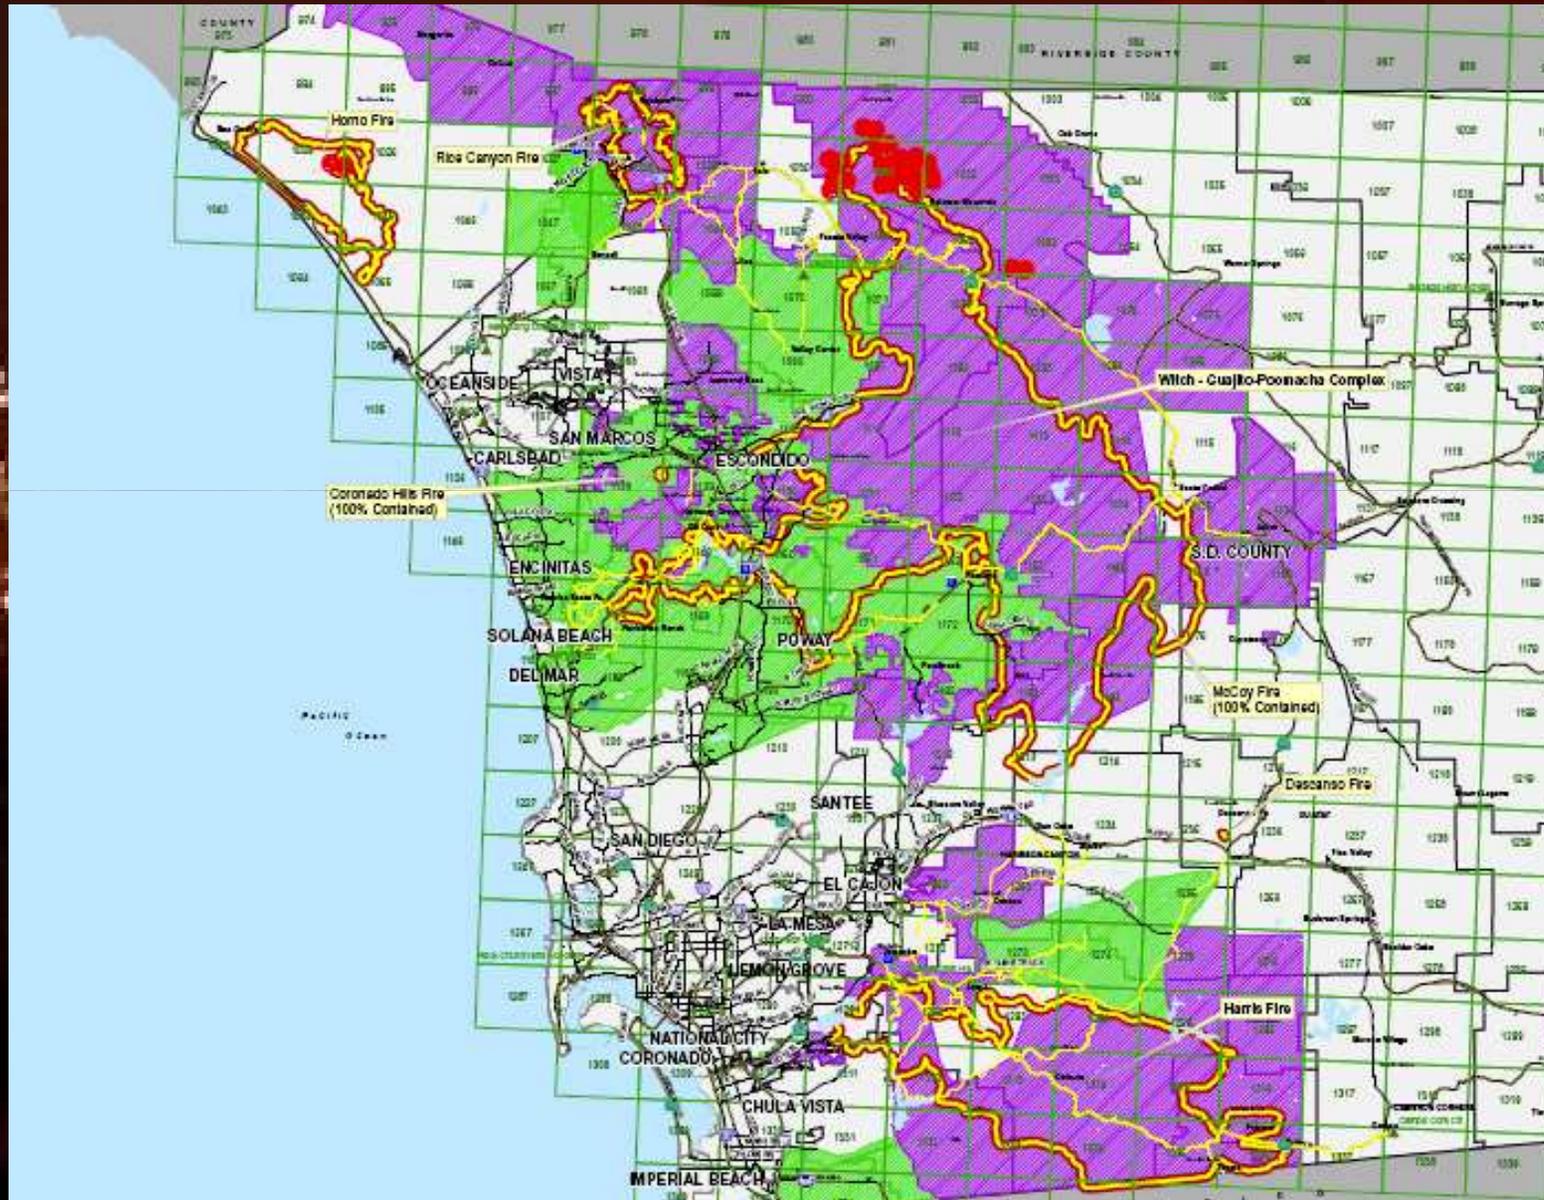

# Wildfires 2007

## *The COMC Perspective*

- 10/22/08 0146 hrs Coronado Hills fire starts near San Marcos
- Rice Canyon fire starts 10-22-08 at 0416 hrs
- 10/23/08 0630 Poomacha Fire starts from a structure on the La Jolla Indian Reservation
- 10/23/08 0920 Pendleton Complex Ammo fire starts on Camp Pendleton

# Wildfires 2007

## *The COMC Perspective*

# Wildfires 2007

## *The COMC Perspective*

- **2007 Fires (Oct 21<sup>st</sup> to 26<sup>th</sup>):**
  - **1,226,678** calls (38% of a normal month in 6 days)
    - **Single Busiest Day 264,048** calls (10/22/07)
  - **33,021** busies (average busy duration of **5.6** seconds) (1950 average busies per month)

# Wildfires 2007

## *The COMC Perspective*

⇒ SDG&E reports 80,000 customers lost power.

- 1,880 poles, 290 transformers and about 35 miles of overhead electrical wire replaced.
- Restoration completed 11/12/07

⇒ AT&T estimates:

- more than 2,000 poles, 1.5 million feet (~284 miles) of copper and 500,000 feet (~95 miles) of fiber were destroyed in San Diego County alone, surpassing damage from the 2003 fires.
- Restoration 11/30/07

# Wildfires 2007

## *The COMC Perspective*

- What do you do when you run out of resources?
- How do you interface with Communications Unit Leaders (COML) on three major incidents?
- How do you address interoperability with 4 major radio systems in use?
- How do you order resources with two ordering points? (Monte Vista for Fire and EOC for everyone else)

# Wildfires 2007

## *The COMC Perspective*

- Primary importance is to be at the decision making center.  
That could be at;
  - ICP (Incident Command Post)
  - DOC (Department Operations Center)
  - EOC (Emergency Operations Center)
  - Expanded Dispatch
- Be a decision maker in the Logistics Branch

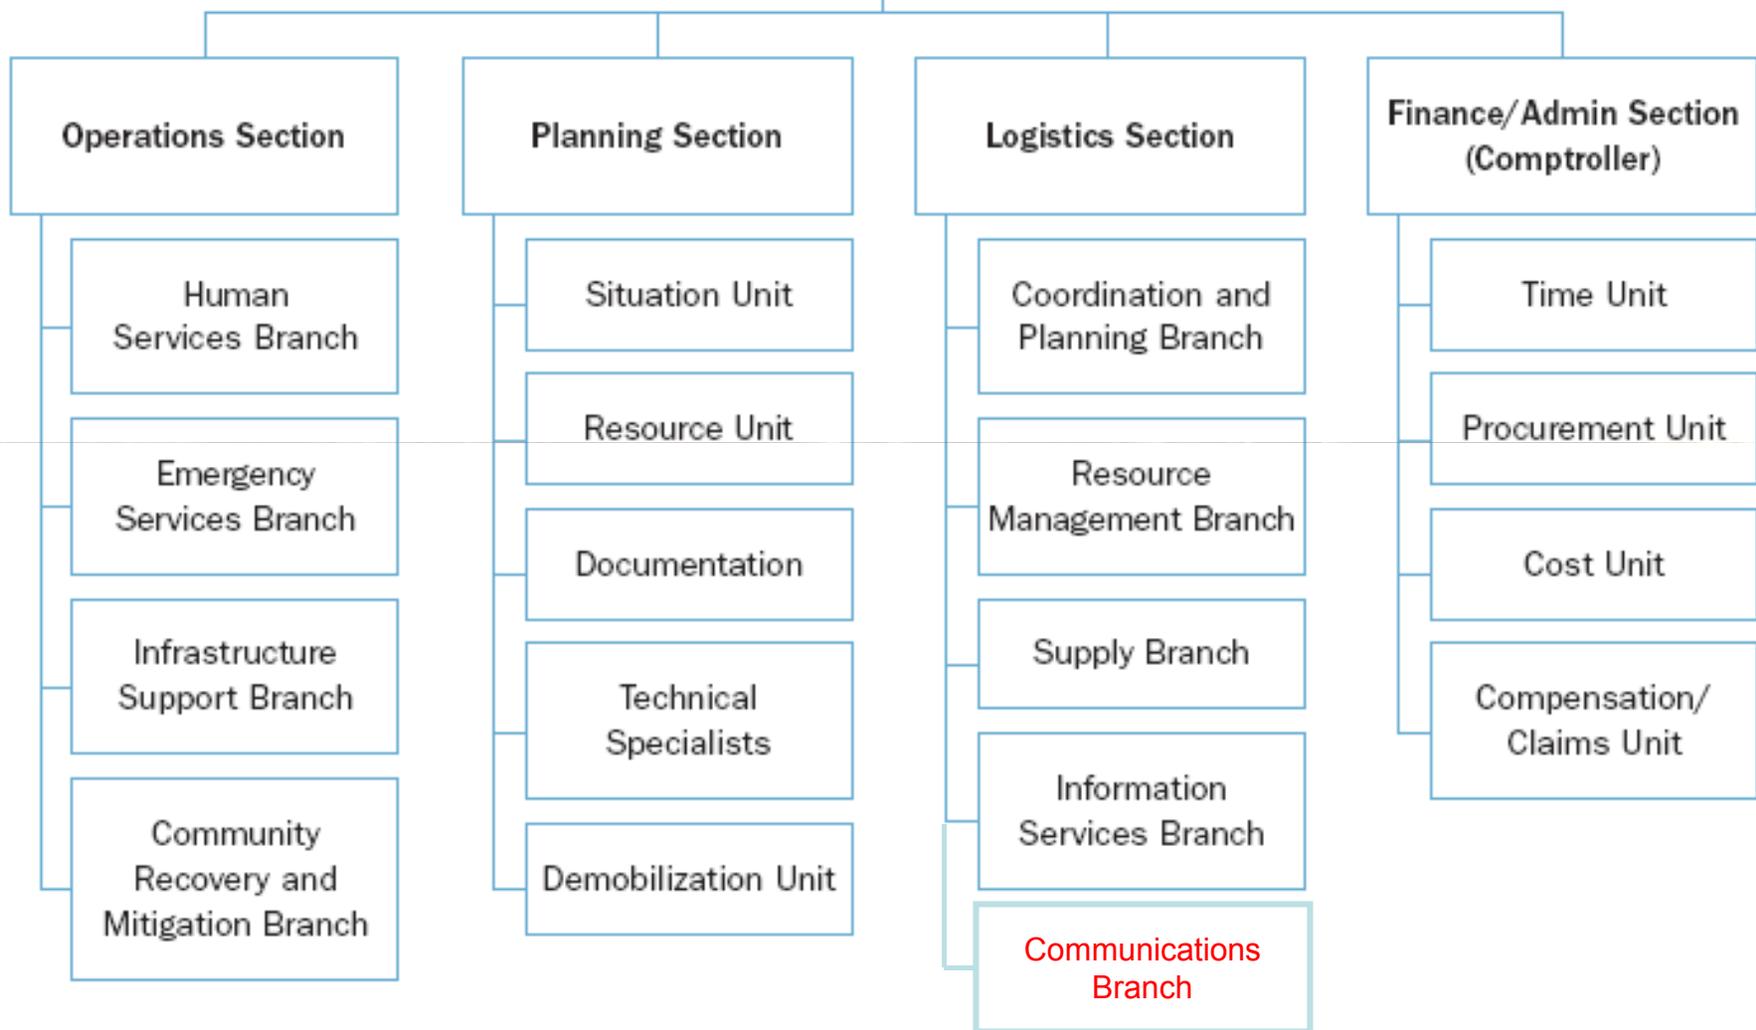

# Wildfires 2007

## *The COMC Perspective*

- Know where you fit into the picture
- Practice your role so the other players know where you fit and what you provide to the incident
- Be able to support 24 hour operations for 72 hours without assistance

# Wildfires 2007

## The COMC Perspective

# Wildfires 2007

## The COMC Perspective

December 2004

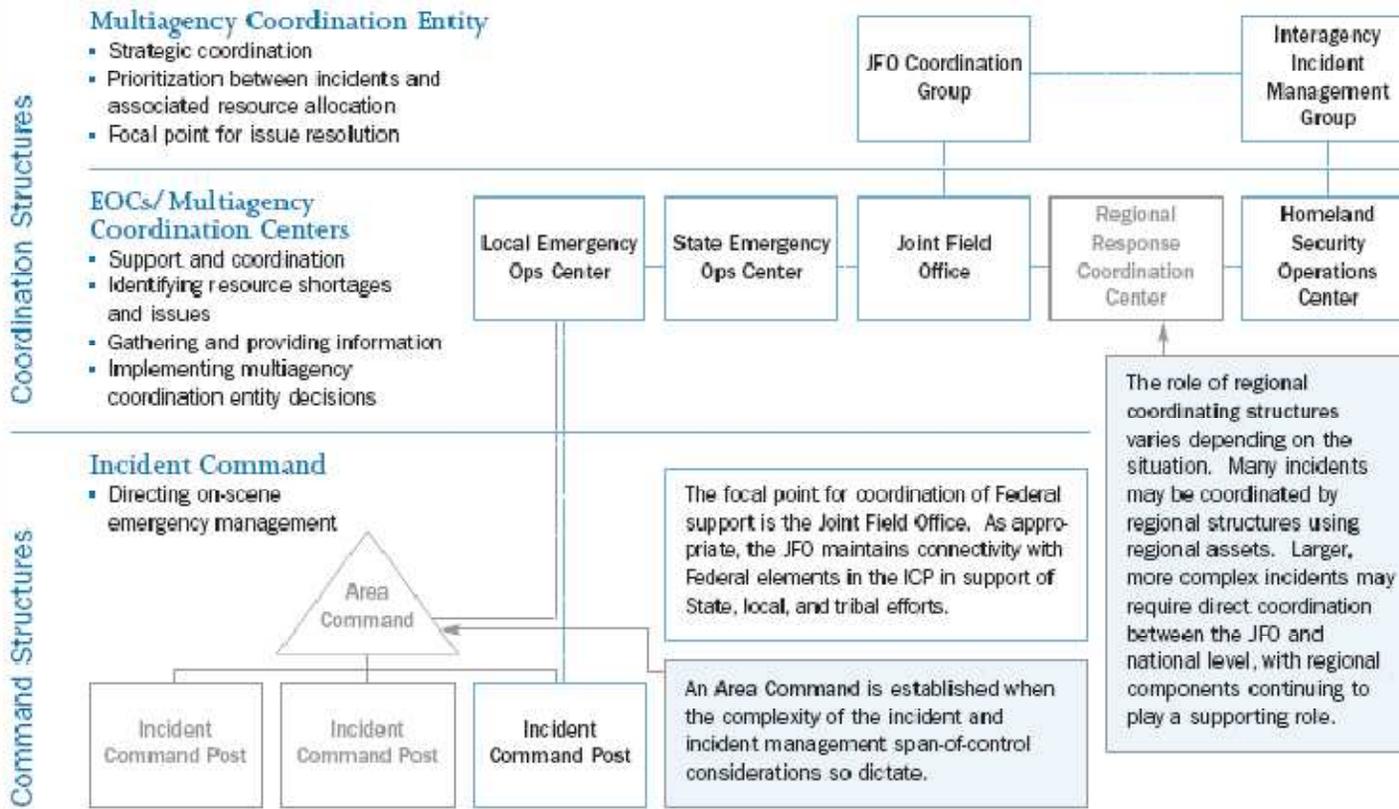

National Response Plan

FIGURE 3. Structure for NRP coordination

### NIMS Framework

The structure for NRP coordination is based on the NIMS construct: ICS/Unified Command on-scene supported by an Area Command (if needed), multiagency coordination centers, and multiagency coordination entities.

Field Level | Regional Level | National Level

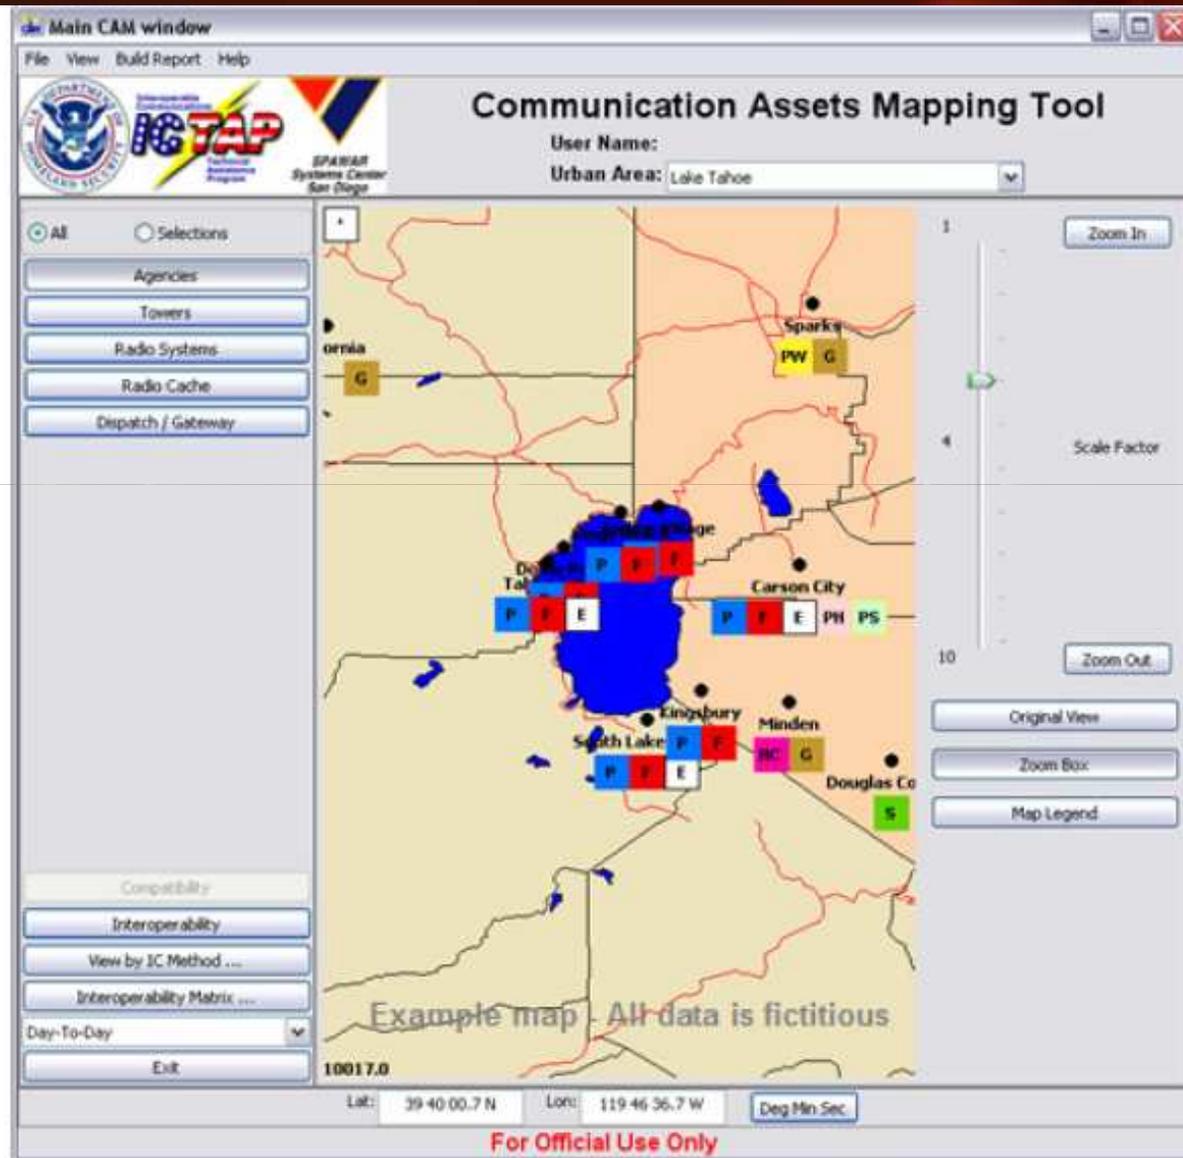

# Wildfires 2007

## *The COMC Perspective*

- Know your resources
  - You can't provide what you have if you don't know what you have, where it is, how to get at it at 0-dark-30, and how to account for it
  - Use your Tactical Interoperability Communications (TIC) Plan, it's a great resource if you put the time into doing it right
  - Use CASM, it's a great tool for assessing interoperability capabilities IF you and your counterparts have populated it.

Example Popup - All Data is Fictitious

Prev Done

[CAM Popup Example]

# Wildfires 2007

## *The COMC Perspective*

- Support supplied by COMC at the EOC
  - VHF frequencies and infrastructure for command and tactical operations (Red2, Grey, Yellow)
  - Logistical support to the Witch base camp
  - Material support to Sheriff's ICP's and Fire ICP's
  - Ordered communications material via the EOC
    - Extra radios
    - Batteries
    - Satellite communications trailers

# Wildfires 2007

## *The COMC Perspective*

- San Diego has 10 sites with conventional 800 MHz / VHF I/O resources
  - Riverside County sent 104 deputies with 800MHz radios to assist with security of evacuated areas in the Rice fire area
  - Two conventional 800 MHz repeaters inter-tied to allow Riverside staff coordination and dispatch services

# Wildfires 2007

## *The COMC Perspective*

- 386 portable radios dispersed
  - 136 From cache and spares
  - 250 rental from Motorola over-night from Schaumburg
- 386 radios recovered – 1 broken – 1 radio carry case missing
  - Be sure you ordered thru channels so the INCIDENT pays for the broken/missing equipment and rentals

# Wildfires 2007

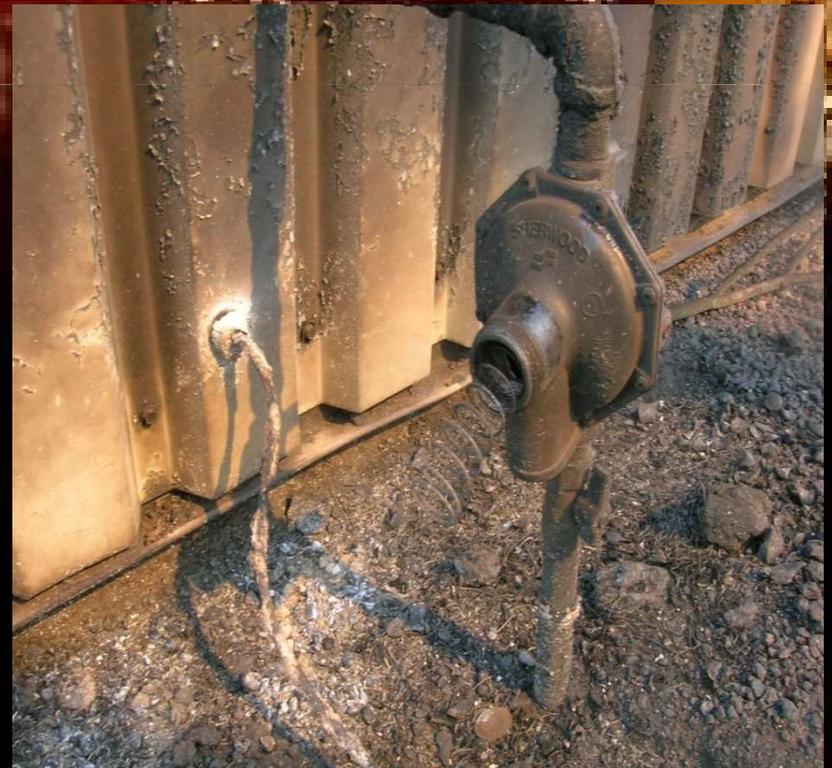

## *The COMC Perspective*

- 6 Public Safety Communications Sites were burned over
  - All 6 sites remained on the air
  - 5 RCS sites, 1 State of CA / Federal site
    - Two sites received retardant “pretreatment”
    - Some radome, antenna, and feed line damage at RCS sites
    - 1 propane regulator damaged

# Wildfires 2007

## *The COMC Perspective*

- 19 RCS Communications Sites on Generator
  - Power to last site restored 11/12/07
  - Generators will be replaced at two sites

# Wildfires 2007

## *The COMC Perspective*

# Wildfires 2007

## *The COMC Perspective*

- Coordinating gas deliveries to generators not just for YOUR generators but everyone else on the same hilltop, USFS, CalFire, municipal, others.
- Check sites on generator daily, once again not just YOUR site but your neighbors.

# Wildfires 2007

## *The COMC Perspective*

# Wildfires 2007

## *The COMC Perspective*

Lyons Peak: 10/24/07 @ 09:30 (Burn over + 3 hours)

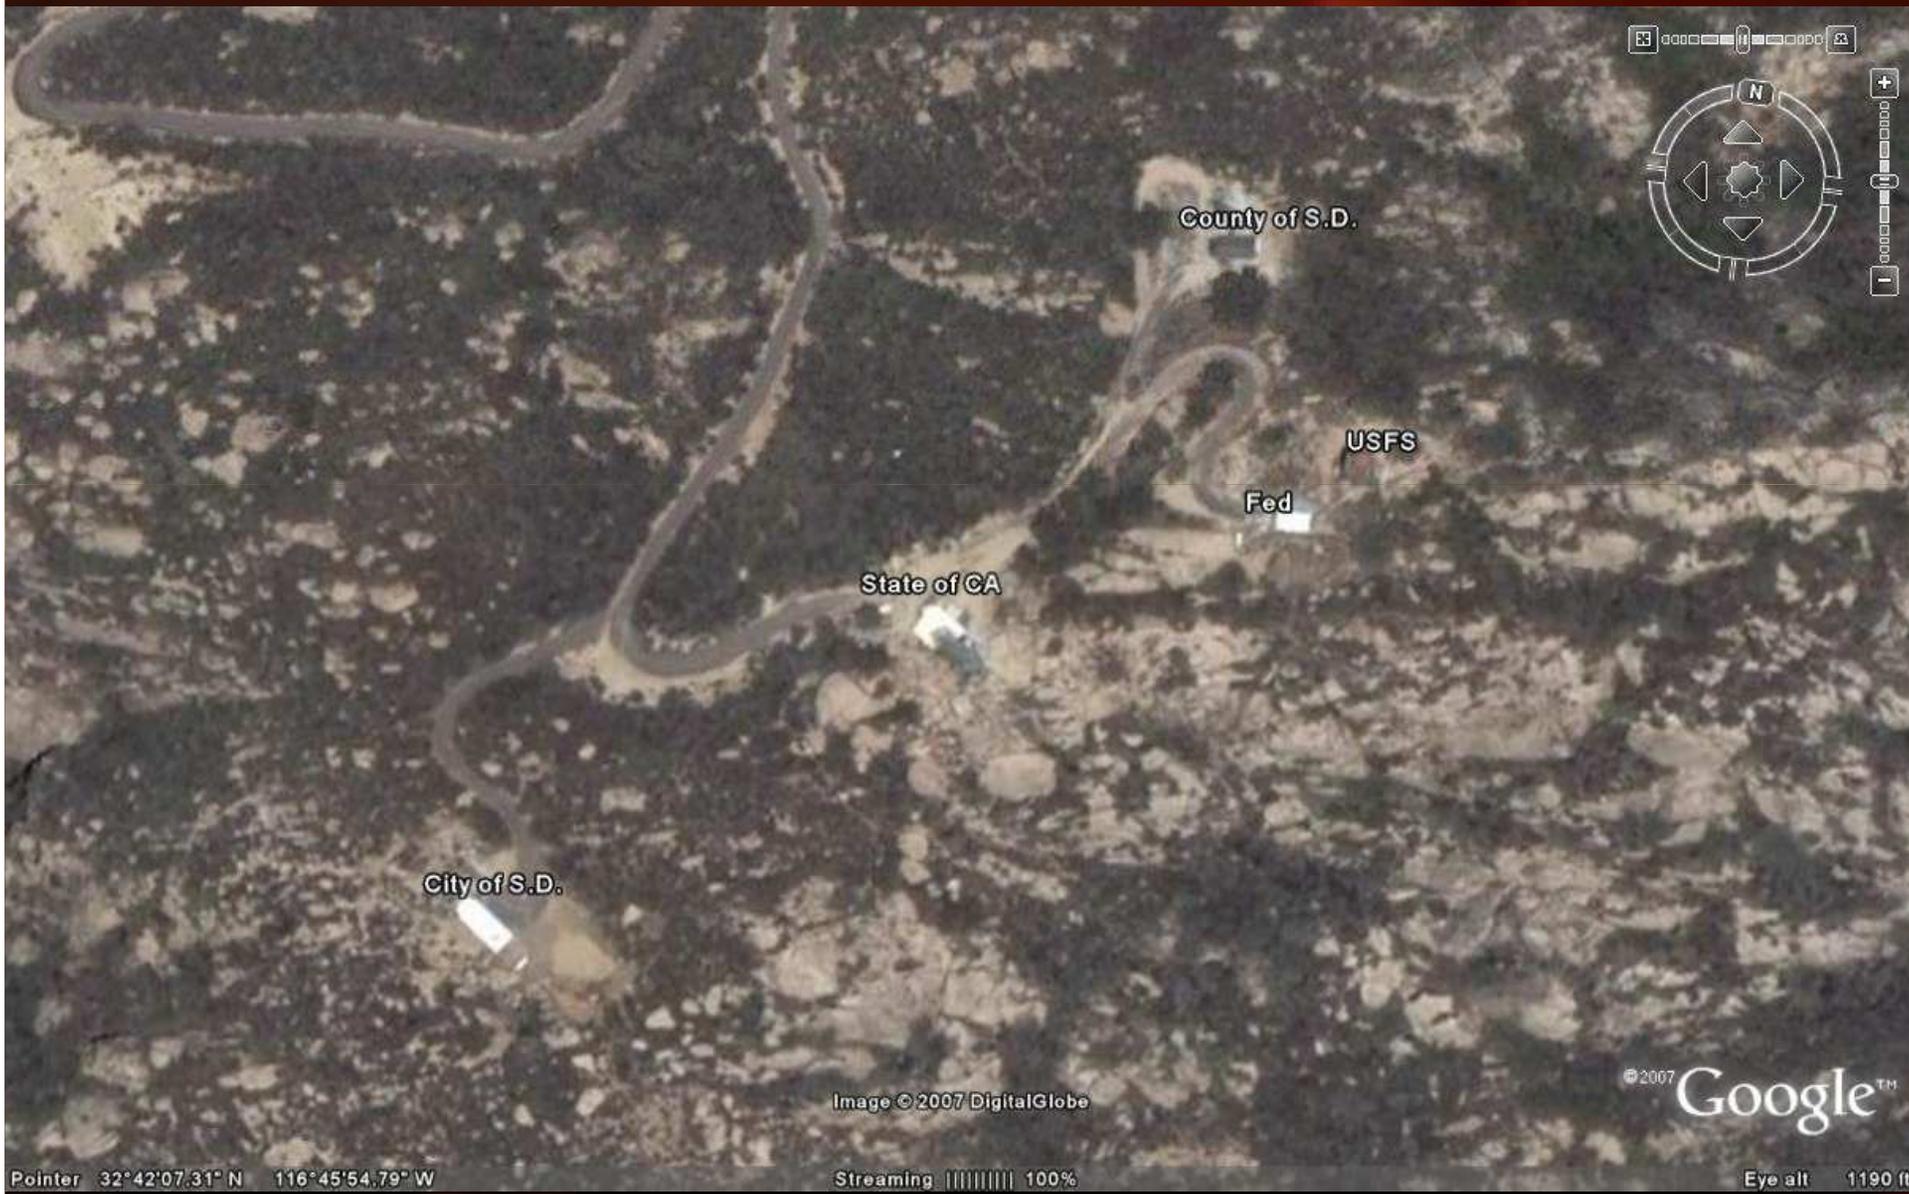

# Wildfires 2007

## *The COMC Perspective*

# Wildfires 2007

## *The COMC Perspective*

# Wildfires 2007

## *The COMC Perspective*

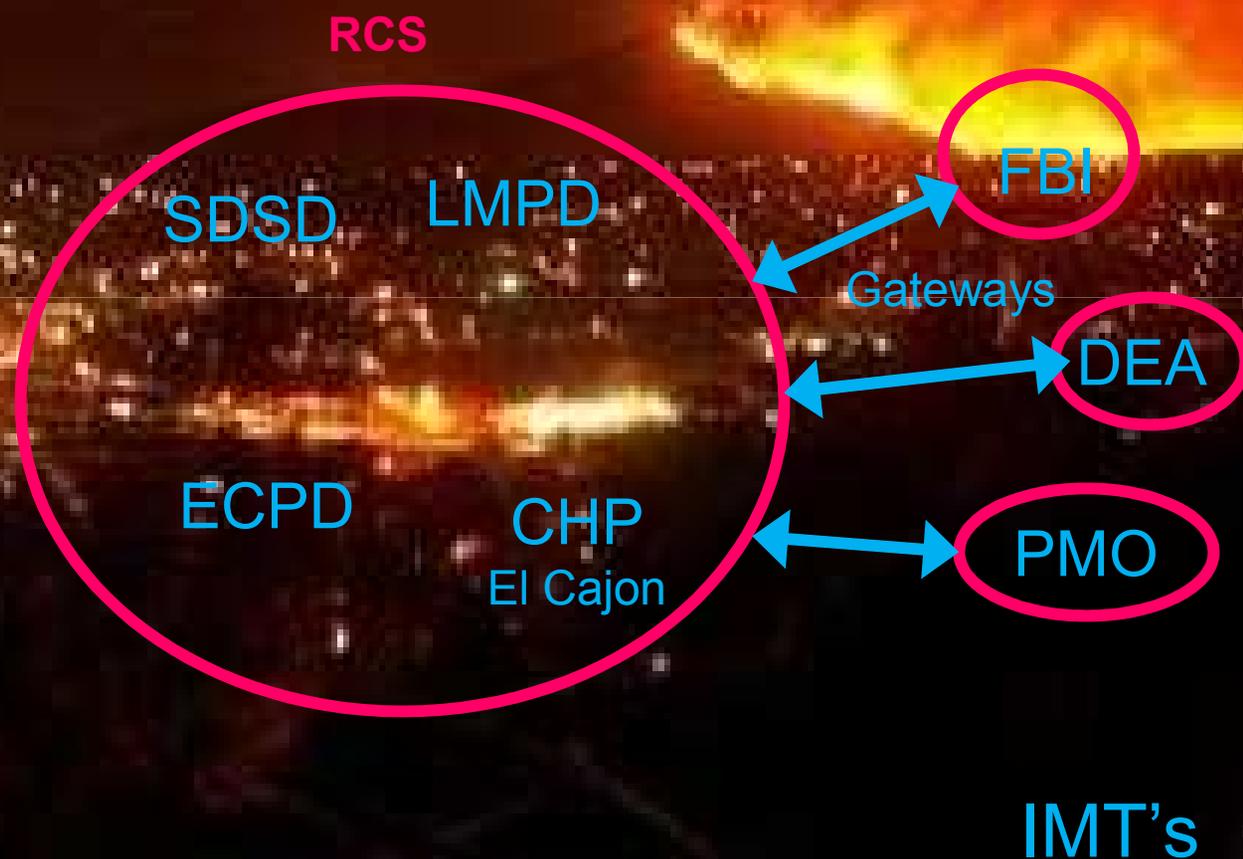

- Your staff must be equipped, trained and exercised on operations in hazardous environments.

# Wildfires 2007

## We Do It Too Good

NIMS, DHS,  
ICS  
management  
and control  
structures have  
not caught up  
to our ability to  
interoperate.  
This has  
resulted in  
conflict.

# Wildfires 2007

## Communications Response Teams Management and Control

- ICS – Logistics – Communications Unit
  - Led by the COML
  - Provides incident communications management
  - Operates in conjunction with national incidents
- Strongly managed and controlled by DHS and NWCG

# Wildfires 2007

- The purpose of CRT's is to get home based people certified to operate communications on major incidents
  - They know the local systems
  - They know the local sites
  - They know the local issues and players
  - Heck, they probably have a pre-planned system in a box somewhere!!

# Wildfires 2007

- By treating communications issues as a system there is a spectrum of support.
- Coordinated, managed response
  - Reduces the time to provide full communications support
  - Pre-designates personnel to respond
  - Allows for management of personnel certification by local agencies

# Wildfires 2007

- Pre-designation of response personnel provides for training and identification of resources immediately available in the response area
  - CRT members will have intimate knowledge of resources in the area
  - CRT members will have specific knowledge of assets that need to be stationed locally and those to be cached for extended operations
  - CRT members will be the subject matter experts

# Wildfires 2007

- COML (Communications Unit Leader)
  - Comms Boss on an incident
  - Manages incident Communications Systems
  - Interfaces cooperatively with local infrastructure
  - Prepares ICS 205's
  - Reports to Logistics Chief

# Wildfires 2007

- INCM (Incident Communications Manager)
  - Incident Comm Center Manager
  - Supervises Incident Dispatch operations
  - Interfaces cooperatively with local agency dispatch operations
  - Reports to COML

# Wildfires 2007

- COMT (Communications Technician)
  - Gerfunken mit der switchen
  - Establishes and maintains incident specific communications systems
  - Interfaces cooperatively with local communications system infrastructure
  - Reports to COML

# Wildfires 2007

- INDI (Incident Dispatcher )
  - Just what it says, California only at this time
  - Performs incident dispatch operations
  - Interfaces cooperatively with local dispatch centers
  - Reports to the INCM

# Wildfires 2007

- RADO (Radio Operator)
  - Bottom of the totem pole, usually no/little experience
  - Differs from INDI in experience and skill level
  - Reports to the INCM

# Wildfires 2007

- Each Team will consist of 1 COMML, 1 INCM, 2 COMT, 3 INCD/RADO
- Certification of CRT personnel will ensure requisite knowledge to deploy local assets
  - Local assets catalogued in CASM and OES manuals
  - State and NIFC cache assets

# Wildfires 2007

- Where do you get certification?
- COML, COMT, INCM, INDI, RADO
  - National Wildfire Coordination Group (NWCG)  
[www.nwcg.gov](http://www.nwcg.gov)
- All Risk COML Type III
  - SAFECOM Program, Office of Emergency Communications (OEC), Department of Homeland Security (DHS).  
[www.safecomprogram.gov](http://www.safecomprogram.gov)

# Wildfires 2007

- The CRT will identify a standard equipment package to be deployed with the team
  - Mobile Communications Center
    - Type IV units on immediate response
    - Type II and III units on delayed response
  - Portable Radio Cache
    - Local, State, Regional capabilities
    - May be contained on the Mobile Communications Center
  - System Recovery/Enhancement equipment
    - Portable repeaters, mobile IntelliRepeater (trunked), Satellite downlink, combination of infrastructure equipment
    - May be stored on the Mobile Communications Center

# Wildfires 2007

- CRT's will provide a full spectrum response
  - Incident Systems planning and design COML/COMT
  - Technical setup and maintenance COMT
  - Operations; dispatch, message center CRT's respond with equipment and manpower for 72 hours INCM/INDI
  - Type 4 Comm Vehicles for immediate response
  - Type 2 and 3 Stand-by Comm units

# Wildfires 2007

## *The COMC Perspective*

- Keep good notes and document all transactions
  - Lessons learned are as important, if not more so than getting the job done
  - Comparing apples to apples from incident to incident shows progress and justifies funding and vision

# Wildfires 2007

## *The COMC Perspective*

- Proper analysis of traffic loading is critical
  - Examine after each major event and work to fill gaps
- Proper construction of sites to survive known risks is critical
- Hardened backup power and backhaul is critical
  - 24 hour generation fuel is not “hardened”

# Wildfires 2007

## *The COMC Perspective*

- Meet with your partner network managers after the incident to go over the lessons learned
- **IMPLEMENT THE LESSONS LEARNED** into the daily operational plans of the region
- Take the issues needing study to ICTAP or academia for assistance

# Wildfires 2007

*The COMC Perspective*

- REWARD THE CREW
  - Reward the Crew
    - Reward the Crew
      - Reward the Crew

# Wildfires 2007
