This document provides the instructions for FCC Report 43-06, the ARMIS Customer Satisfaction Report, which was adopted in CC Docket No. 87-313. The instructions consist of the following five sections.

1. **Reporting Procedures** - details on the specific procedures to be followed when submitting this report to the Commission.

2. **Report Definition** - illustration of the rows and columns to be reported and their definitions.
   a. **Summary** - description of the form.
   b. **Form** - illustration of the rows and columns to be reported.
   c. **Row Instructions** - instructions for completing the rows to be reported.
   d. **Column Descriptions** - description of the columns to be reported.
   e. **Certification** - illustration of the certification page.

3. **Automated Report Specifications** - detailed automated data processing (ADP) specifications for the automated report to be filed.

5. **COSA Code Table** - the list of four letter COSA codes (CO = Company, SA = Study Area).
A. **Introduction**

This document contains details on the specific procedures to be followed when submitting FCC Report 43-06, the ARMIS Customer Satisfaction Report, to the Commission.

B. **General Information**

2. Affected carriers shall file by April 1 for the previous calendar year.

3. The report shall be filed at the study area (jurisdiction) and holding company levels.

4. Each report and diskette must be clearly labeled to include the report number, company, study area, period, COSA code, version and submission number. The report number is 43-06, which identifies the filing as the ARMIS Customer Satisfaction Report. The period identifies the year covered by the data. See the attached COSA Code Table (CO = Company, SA = Study Area) for a list of companies and their respective COSAs. The version refers to whether the filing is confidential, public or unrestricted. The submission number is defined as follows: submission 0 is for test data purposes only; submission 1 is for the first submission of a year’s data. If there is a change in the data in either the automated or paper report, the carrier must resubmit both. A higher number (2, 3, etc.) and a new data entry date must be used each time a change occurs to denote a new submission. The automated and paper reports submission numbers must be the same. When correcting format errors, a new submission number is not required; however, the data entry date must be changed to reflect the date of the format change.

5. All correspondence and pleadings shall identify the proceeding as CC Docket No. 87-313.

6. Each reporting carrier must validate its data by using the most recent edit check program(s), provided by the Commission, for the reporting year. When an error is detected, the carrier must correct the error prior to submitting the report to the Commission. Once the carrier corrects its data so that the edit check program identifies no errors, the carrier should submit the ARMIS report along with a copy of the edit check printout to the Commission verifying that the program did not identify any errors.
C. **Data Items That Are “Not Available” or “Irretrievable”**

1. The term “Not Available” is used below to refer only to those items which the Commission has ruled are not applicable to a particular row/column or are not required for a particular filing entity. If this report includes a field such as a sum, a ratio, or a percentage that cannot be computed completely and accurately because it relies on another item which the Commission has ruled is a “Not Available” item, then that field is also considered to be “Not Available.”

2. Items that are not being reported because the filing carrier has a waiver or has applied for a waiver are designated as “Irretrievable.”

3. See the Automated Report Specifications and the Paper Report Specifications for data entry conventions for these items.

D. **Where to File**

1. Carriers submitting FCC Report 43-06 should consult the schedule below which details the number of copies required and the location to which those copies should be delivered.

2. Carriers are reminded that they must serve a copy of both the paper report and the automated report (diskette) on the FCC’s contractor for public records duplication.

E. **Footnotes**

1. If any data for the current period differ materially from those for the previous period and the difference is not self-explanatory but was caused by unusual circumstances, the carrier must include detailed footnote text to explain the specific circumstances. Certain items require accompanying footnotes and those items are specified in the appropriate sections of the instructions for filing the 43-06. Such footnotes are mandatory and must be entered in the Footnote Text Records and Footnote Table.

2. If the reporting carrier does not follow the procedures described in the row and column instructions of the attached Report Definition, it must explain any deviations from those procedures in an explanatory footnote. Such footnotes must provide detailed explanations of the procedures actually used by the carrier and its specific reasons for deviating from procedures prescribed by the Commission’s Rules. This provision should not be interpreted to mean that deviations from the prescribed rules will automatically be approved by the Commission.

**EXAMPLES:**

Do not say, “Data are compiled using a more inclusive process than in previous filing.”
Do say, “Data are compiled using a process that includes xxx, which was not included in previous filings. The impact of including xxx in this row inflates this number by x% over the previous reporting period.”

Do not say, “This value was not calculated pursuant to the instructions.”
Do, say “This value was calculated using the xxx method rather than the method described in the instructions because...”

Do not say, “Corrected Data.”
Do say, “$xxxx is changed to $xxxx because ...”.

Do not say, “Waiver” or “Waiver Granted.”
Do say, “Waiver of Part xx.xxx was granted in CC Docket No. xx-xxx, X FCC, xxxx (1992) to allow Any Company to ....because....”

3. Footnote entries must provide detailed explanations for only those items reported in the current submission. Footnotes from prior submissions should be included only if they remain applicable. In other words, when a resubmission nullifies an existing footnote, remove the footnote.

4. The footnote text must be included in the Footnote Text Records and the Footnote Table as specified in the Automated Report Specifications and the Paper Report Specifications.

F. **Errata**

1. Carriers are under a legal obligation to correct any erroneous data discovered in FCC Report 43-06. See Section B of the Reporting Procedures for use of submission numbers when an erratum occurs.

2. Submissions containing corrected data must include references to indicate which data items were corrected since the previous submission. If the data items being corrected impact other data items in the report, then those items must also be corrected and referenced. Erratum references should reflect only those items corrected in the new submission. References from prior submissions must not be included in the new submission.

3. These references must be included in the Erratum Record(s). In addition, carriers must include in the transmittal letter, a brief statement indicating the reason for the errata.

G. **Certification**

1. Carriers must certify the accuracy of the data submitted in FCC Report 43-06 by including a certification statement, signed by a corporate officer, as the last page of the paper report.

2. The text of the certification statement is included in the attached Report Definition.
H. **Waivers**

1. If a carrier determines that it will be unable to provide data required by FCC Report 43-06, it must file an application for waiver with the Commission following established Commission procedures. All such requests from a carrier should be included in a single application. The application must demonstrate good cause for reporting a different or lower level of detail, must establish the duration of the waiver requested, and must indicate how these deficiencies will be corrected.

2. Carriers should not act upon requests for waiver until waivers are granted. It is important that carriers be aware that waivers are not in effect until they are granted, in writing, by the Commission or under delegated authority.

3. Omission of individual data items or entries, without request for waiver, is unacceptable. One reason that compliance with the full requirements is so important is that omission of any single data entry by any carrier will jeopardize the accuracy of aggregate industry information.

I. **Extension of Filing Time**

1. Requests for extensions of filing time must be made in a timely manner. Requests received less than 72 hours prior to a filing date are *prima facie* unreasonable.

J. **Public Information**

1. The Public or Unrestricted Versions of the paper reports filed as Report 43-06 may be examined by the public at the FCC Reference Information Center (RIC), 445 Twelfth Street, S.W., Washington, D.C. Parties should contact the RIC at (202) 418-0270.

2. Copies of the Public or Unrestricted Versions of the paper or automated reports filed as FCC Report 43-06 may be obtained from the FCC’s contractor for public records duplication, Qualex International. Parties should contact Qualex International at (202) 863-2893, facsimile (202) 863-2898, or via e-mail qualexint@aol.com.

3. Copies of the detailed reporting procedures for this report may be obtained over the Internet, from the Commission’s web site, at [http://www.fcc.gov/wcb/armis/](http://www.fcc.gov/wcb/armis/).

For further information regarding these procedures, contact:

Barbara Van Hagen  
FCC Wireline Competition Bureau  
Industry Analysis and Technology Division  
(202) 418-0840
SUMMARY

This document provides the Report Definition for FCC Report 43-06, the ARMIS Customer Satisfaction Report which must be provided annually by study area. It contains the following:

PAGE

Table I - Summary Customer Satisfaction Survey
Table I - Row Instructions
Table I - Column Instructions
Certification

All percentage amounts must be entered in percent and rounded to 2 decimal places.

All monetary figures must be rounded to the nearest thousand dollars. All number of offices and customers must be entered in whole numbers.

All fields must be populated. If a data field equals the quantity zero, enter the numeral zero in that field. This is the only proper use of zero in this report. If a filing carrier has a waiver applicable to a certain field, it must treat the data for that field as "Irretrievable" and footnote the reason for that entry (including a cite to the waiver, and a note as to its duration). Items which need not be reported because they do not apply are designated by N/A. DO NOT override N/As. If a reporting carrier should wish to apply data to a field containing an N/A, the carrier should enter the amount(s) and an explanation as a footnote to the field. The amount(s) must not be entered in an N/A’d field.

REMEMBER: Footnotes are mandatory for all “Irretrievable” entries.

When errata occur, carriers must include in the transmittal letter a brief statement indicating the reason for the errata. Other explanatory notes must be included in the footnote section of the filing.

NOTICE: The ARMIS Customer Satisfaction Report collects data designed to capture trends in service quality under price cap regulation and improves and standardizes existing reporting requirements for this purpose. The ARMIS Customer Satisfaction Report specifies information requirements in a consistent format and is essential to the FCC to monitor service quality under price cap regulation.

Public reporting burden for this collection of information is estimated to average 720 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Federal Communications Commissions, Office of Managing Director, Washington, DC 20554.
An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid control number.

Customer Satisfaction Report

Row Instructions

Table I

Table I is a summary report of the results of the responding carriers’ customer satisfaction surveys consisting of generic categories into which the disaggregated categories used by the carriers may be summarized. We chose generic categories in order to maintain the integrity of the individual customer satisfaction surveys, designed by each of the carriers, to suit each carrier’s unique circumstances. Use the rounding conventions specified in the column instructions when entering these data. Footnotes are mandatory for all “irretrievable” entries.

Row 0020 - Reserved

Row 0040 - Installations - In this row enter the number of customers surveyed and the percent dissatisfied with the reporting carrier’s installation services and procedures.

Row 0060 - Repairs - In this row enter the number of customers surveyed and the percent dissatisfied with the reporting carrier’s repair services and procedures.

Row 0080 - Business Office - In this row enter the number of customers surveyed and the percent dissatisfied with the reporting carrier’s business office services and procedures.
Customer Satisfaction Report

Column Descriptions

Table I

Column (ab) - Number of Residential Customers Surveyed - This column represents the number of residential customers surveyed. Enter in whole numbers.

Column (ac) - Percent of Residential Customers Dissatisfied - This column represents the percentage of residential customers surveyed who registered a dissatisfied response. Enter this amount in percent, rounded to two places.

Column (ad) - Small Business Customers Surveyed - This column represents the number of small business customers surveyed. “Small business customer” is defined by the filing ILEC. Enter in whole numbers.

Column (ae) - Percent of Small Business Customers Dissatisfied - This column represents the percentage of small business customers surveyed who registered a dissatisfied response. Enter this amount in percent, rounded to two places.

Column (af) - Number of Large Business Customers Surveyed - This column represents the number of large business customers surveyed. “Large business customer” is defined by the filing ILEC. Enter in whole numbers.

Column (ag) - Percent of Large Business Customers Dissatisfied - This column represents the percentage of large business customers surveyed who registered a dissatisfied response. Enter this amount in percent, rounded to two places.
CERTIFICATION

I certify that I am an officer of __________________________________________; that I have examined the foregoing report ______and that to the best of my knowledge, information, and belief, all statements of fact contained in this report are true and that said report is an accurate statement of the affairs of the above named respondent in respect to the data set forth herein for the period from ________ to ________.

TELEPHONE NUMBER
A. Introduction

This document contains the detailed automated data processing (ADP) specifications for the automated report to be filed as FCC Report 43-06, the ARMIS Customer Satisfaction Report.

B. General Format and Media

1. All data must be submitted on 3.5-inch, high-density IBM-PC compatible diskettes. Each diskette must have a label that displays the report number, the company name, the COSA(s), the reporting period, the version, the submission number, and the date data was submitted to the FCC. Additionally, the label must be placed on the diskette so that it is readable with the metal plate facing down. See page 5 for sample diskette label.

2. All files must be coded in ASCII.

3. The Commission has determined that no confidential treatment shall be granted for Report 43-06 filings.

4. The file name for each file has six components:
   a. the four letter COSA code (CO = Company, SA = Study Area, see COSA Code Table for a list of companies and their respective COSAs).
   b. the last two digits of the year which is covered by the data.
   c. the letters “CS”.
   d. a decimal point.
   e. the letter “U” to indicate this is the Unrestricted version.
   f. two digits (zero filled) for the submission number: Submission 00 is for test data purposes only; Submission 01 is for the first submission of a year’s data. A higher number (2, 3, etc.) and a new data entry date must be used each time a change occurs to denote a new submission. If there is a change in the data in either the automated or paper report, the carrier must resubmit both. The automated and paper report submission numbers must be the same. When correcting format errors (e.g., misplaced or invalid delimiters), a new submission number is not required, however, the data entry date must be changed to reflect the date of the format change.

For example, the file name for the Unrestricted Version of the initial Customer Satisfaction Report data file to be submitted by Illinois Bell to cover calendar year 2001, will be LBIL01CS.U01:

  LBIL  COSA for Illinois Bell
  01    Data for calendar year 2001
  CS    Customer Satisfaction Report data file
5. A separate file must be prepared for each report. More than one file may be placed on the same diskette, as long as they cover the same period and version (different submission numbers are allowed.)

C. Data Entry Conventions

1. Give each record a unique record number, beginning with 1001 and incrementing by one, with no numbers skipped.

2. Begin each data record in column 1 and make each record the proper length as specified in the record layouts. Commas are used as delimiters between fields. All numeric fields are right justified and space filled, e.g., use __123, NOT 123. All non-numeric fields are enclosed in double quotation marks and are left justified and space filled within these quotation marks, e.g., use “John Doe “.

3. If an entry is to be a subtraction, indicate so by placing a minus sign in the column immediately preceding the numeric data, e.g., use -4, NOT - 4 or (4).

4. Do NOT include “$”, “%”, embedded commas, decimal points, quotes or other formatting characters in any numeric data fields, except for row numbers and percentage fields, which will include a decimal point but not a percent sign.

5. In any numeric data field designated by N/A, enter -99999. Enter -77777 in any numeric data field which the reporting carrier designates as “Irretrievable” and footnote the reason for that entry (include a cite to the waiver and a note as to its duration). Filing carriers are NOT permitted to enter additional designators. If a reporting carrier wishes to apply data to a field designated by N/A, the carrier should enter as a footnote to the field, the amount(s) and an explanation. The amount(s) must not be entered in the N/A field. These entries must be formatted according to the format rules for the particular data field; e.g., in the percentage fields, -99999 would be entered as -99999.00.

6. All fields must be populated. If a data field equals the quantity zero, enter the numeral zero in that field. This is the only proper use of zero in this report.

D. Rounding Conventions

1. As specified in the Report Definition, all number of offices and customers must be entered in whole numbers.
2. All percentage amounts must be entered as in the following example and rounded to 2 decimal places.

Example: 23.70561 percent must be entered as 23.71

E. Footnotes

1. If any data for the current period differs materially from those for the previous period and the difference is not self-explanatory but was caused by unusual circumstances, then include detailed footnote text to explain the specific circumstances. Certain items require accompanying footnotes and those items are specified in the appropriate section of the instructions for filing the 43-06. Such footnotes are mandatory and must be entered in the Footnote Records of the automated report.

2. If the reporting carrier does not follow the procedures described in the row and column instructions of the Report Definition, it must explain any deviations from those procedures in an explanatory footnote. Such footnotes must provide detailed explanations of the procedures actually used by the carrier and its specific reasons for deviating from procedures prescribed by the Commission’s Rules. This provision should not be interpreted to mean that deviations from the prescribed rules will automatically be approved by the Commission. See Section E of the Reporting Procedures for examples of valid footnotes.

3. Footnote entries must provide detailed explanation for only those items reported in the current submission. Footnotes from prior submissions should be included only if they remain applicable. In other words, when a resubmission nullifies an existing footnote, remove the footnote.

4. Footnotes must be included in the footnote text record(s) of the automated report.

F. Errata

1. Carriers are under a legal obligation to correct any erroneous data discovered in FCC Report 43-06. See Section B of the Reporting Procedures for use of submission numbers when an erratum occurs.

2. Submissions containing corrected data must include references to indicate which data items were corrected since the previous submission. If the data items being corrected impact other data items in the report, then those items must also be corrected and referenced. Erratum references should reflect only those items corrected in the new submission. References from prior submissions must not be included in the new submission.

3. These references must be included in the Erratum Record(s). In addition, carriers must include in the transmittal letter, a brief statement indicating the reason for the errata.

G. Data Validation Programs
1. Each reporting carrier must validate its data by using the most recent edit check program(s), provided by the Commission, for the reporting year. When an error is detected, the carrier must correct the error prior to submitting the report to the Commission. Once the carrier corrects its data so that the edit check program identifies no errors, the carrier should submit the ARMIS report along with a copy of the edit check printout to the Commission verifying that the program did not identify any errors.

H. Data Record Descriptions

The six data record types are described below. See pages 6 through 14 for record layouts. The automated file will consist of the following record types:

1. **Record Type H1 - Header Record**
   One Type H1 record per file. The first record of each file. Contains identifying data. See page 6 for record layout.

2. **Record Type L2 - Label Record**
   One Type L2 record per file. The second record of each file. Contains report number, carrier classification, carrier name, study area name, etc. See page 7 for record layout.

3. **Record Type S2 - (Table I) Summary Customer Satisfaction Survey Data Record**
   Four Type S2 records per file. One record for each of the 4 rows of summary survey data on customer satisfaction with the performance of the reporting carrier as shown on page 3 of the Report Definition. See pages 8 & 9 for record layout.

4. **Record Type F3 - Footnote Record**
   One or more Type F3 records(s) per file. Contains explanatory footnote text. Certain items require accompanying mandatory footnotes and those items are specified in the appropriate section of the instructions for filing the 43-06. See pages 10 & 11 for record layout.

5. **Record Type E6 - Erratum Record**
   Zero Type E6 records in the first submission of a year’s data. One or more Type E6 records per file in revisions filed to correct that year’s submission. Each time an erratum occurs, a carrier must use a new submission number. The same submission number must be used for the automated report and the paper report. Contains information to identify the data which was corrected in this submission. See pages 12 & 13 for record layout.

6. **Record Type T1 - Trailer Record**
   One Type T1 record per file. The last record of each file contains contact person, etc. See page 14 for record layout.
SAMPLE DISKETTE AND LABEL

Each diskette must have a label that displays the report number, the company name, the COSA(s), the reporting period, the version, the submission number, and the date data was submitted to the FCC. Additionally, the label must be placed on the diskette so that it is readable with the metal plate facing down.

Sample 1: COSAs with the same submission number

- Report: 43-06
- Company: SBC/Ameritech
- COSAs: LBIL, NBIN, MBIN, OBOH, WTWI
- Period: Jan 2001 – Dec 2001
- Version: Unrestricted
- Submission 1
- Date Filed: April 1, 2002

Sample 2: COSAs with different submissions numbers

- Report: 43-06
- Company: SBC/Ameritech
- COSAs: LBIL (Sub 2), NBIN (Sub 3), OBOH & WTWI (Sub 4)
- Period: Jan 2001 – Dec 2001
- Version: Unrestricted
- Date Filed: July 20, 2002
### RECORD TYPE H1 - HEADER RECORD

<table>
<thead>

</tr>
</tbody>
</table>

Note: All fields are separated by commas.

When an errata occurs, carriers must use higher submission numbers and a new data entry date to denote a new submission. If there is a change in either the automated or paper report, the carrier must re-submit both. The automated report and the paper report submission numbers must be the same.

If the data items being corrected impact other data items in the report, then those items must also be corrected and referenced. Erratum references should reflect only those items corrected in the new submission. References from prior submissions must not be included in the new submission.

In addition to including these references in the erratum record(s) of the automated report, carriers must include a brief statement indicating the reason for the errata in the transmittal letter.

A. Introduction

This document contains the page layout and detailed specifications for the paper report to be filed as FCC Report 43-06, the ARMIS Customer Satisfaction Report.

B. General Instructions

1. The Commission has determined that no confidential treatment shall be granted for Report 43-06 filings.

2. The paper report must be printed on 8 1/2 inch by 11-inch paper. For ease of preparation, an original may be produced on larger paper and reduced to this size for submission. Copies filed must be legible and permanent, in black ink. The report may be printed in portrait mode (8 1/2 inches across the top of the page) or landscape mode (11 inches across the top of the page). In portrait mode, the printing should not be smaller than 17 characters per inch and 8 lines per inch; in landscape mode, the printing should not be smaller than 15 characters per inch and 10 lines per inch.

C. Data Entry Conventions

1. If an entry is to be a subtraction, indicate so by placing a minus sign in the column immediately preceding the numeric data, e.g., use -4, NOT - 4 or (4).

2. Items that need not be reported because they do not apply are designated by N/A. If a filing carrier has a waiver applicable to a certain field, treat the data in that field as “Irretrievable” and enter “I/T”. Carriers must footnote the reason for that entry (include a cite to the waiver and a note as to its duration). Filing carriers are NOT permitted to enter additional designators. If a reporting carrier wishes to apply data to a field designated by N/A, the carrier should enter as a footnote to the field, the amount(s) and an explanation. The amount(s) must not be entered in the N/A field.

3. All fields must be populated. If a data field equals the quantity zero, enter the numeral zero in that field. This is the only proper use of zero in this report.

D. Rounding Conventions

1. As specified in the Report Definition, all number of offices and customers must be entered in whole numbers.

2. All percentage amounts must be entered as in the following example and rounded to 2 decimal places.

   Example: 23.70561 percent must be entered as 23.71

E. Footnotes
1. If any data for the current period differs materially from those for the previous period and the difference is not self-explanatory but was caused by unusual circumstances, then include detailed footnote text to explain the specific circumstances. Certain items require accompanying footnotes and those items are specified in the appropriate section of the instructions for filing the 43-06. Such footnotes are mandatory and must be entered in the Footnote Table.

2. If the reporting carrier does not follow the procedures described in the row and column instructions of the Report Definition, it must explain any deviations from those procedures in an explanatory footnote. Such footnotes must provide detailed explanations of the procedures actually used by the carrier and its specific reasons for deviating from procedures prescribed by the Commission’s Rules. This provision should not be interpreted to mean that deviations from the prescribed rules will automatically be approved by the Commission. See Section E of the Reporting Procedures for examples of valid footnotes.

3. Footnote entries must provide detailed explanations for only those items reported in the current submission. Footnotes from prior submissions should be included only if they remain applicable. In other words, when a resubmission nullifies an existing footnote, remove the footnote.

4. Footnotes must be included in the footnote table, not on individual table pages.

F. Errata

1. Carriers are under a legal obligation to correct any erroneous data discovered in FCC Report 43-06. See Section B of the Reporting Procedures for use of submission numbers when an erratum occurs.

2. Submissions containing corrected data must include references to indicate which data items were corrected since the previous submission. If the data items being corrected impact other data items in the report, then those items must also be corrected and referenced. Erratum references should reflect only those items corrected in the new submission. References from prior submissions must not be included in the new submission.

3. These references must be included in the Erratum Table. In addition, carriers must include in the transmittal letter, a brief statement indicating the reason for the errata.
G. Data Validation Programs

1. Each reporting carrier must validate its data by using the most recent edit check program(s), provided by the Commission, for the reporting year. When an error is detected, the carrier must correct the error prior to submitting the report to the Commission. Once the carrier corrects its data so that the edit check program identifies no errors, the carrier should submit the ARMIS report along with a copy of the edit check printout to the Commission verifying that the program did not identify any errors.

H. Page Layouts

1. The page layout for this report is illustrated in the Form Section of the Report Definition.

2. The paper report will consist of the following pages:

   - The Cover Page
     - Illustrated in Paper Report Specs. on Page 18

   - Table I Summary Customer Satisfaction Survey
     - Illustrated in Report Definition Form on Page 3

   - The Footnote Table
     - (at least one page and as many pages as needed)
     - Illustrated in Paper Report Specs. on Page 19

   - The Erratum Table
     - (for submission number 2 or higher, as many pages as needed)
     - Illustrated in Report Definition Form on Page 20

   - The Certification Page
     - 6
FEDERAL COMMUNICATIONS COMMISSION
WASHINGTON, D.C. 20554

ARMIS CUSTOMER SATISFACTION REPORT

For Year End ______

Account Filing Level (Class A or Class B):

Name of Company:

Address of Company:

FCC Report 43-06, the Customer Satisfaction Report, is prescribed for every incumbent local exchange carrier for whom price cap regulation is mandatory. This report reflects the results of customer satisfaction surveys conducted by individual carriers to capture trends in service quality under price cap regulation and improves and standardizes existing reporting requirements for this purpose. The ARMIS Customer Satisfaction Report specifies information requirements in a consistent format and is essential to the FCC to monitor service quality under price cap regulation.

Public reporting burden for this collection of information is estimated to average 720 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Federal Communications Commissions, Office of Managing Director, Washington, DC 20554.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid control number.
