**I. Voice grade lines in service at end of quarter.**

**A. Lines you used to provide service to end users.**

1. Lines you owned.

2. Lines you leased.

3. Total lines you provided to end users.

**B. Lines you provided to other communications carriers.**

4. Lines you owned that you provided under a UNE loop arrangement, defined in 47 U.S.C. §251.

5. Lines you owned that you provided under a wholesale (Total Service Resale) arrangement, defined in 47 U.S.C. §251.

6. Lines you owned that you provided under other resale arrangements, such as centrex provided at retail rates for resale.

7. Lines that you leased that you in turn provided under UNE, wholesale, or other resale arrangements.

8. Total lines that you provided to other communications carriers.

C. Total voice grade lines.

10. Contact Person:

11. Contact Telephone #:

15. Lines you owned. 4/

16. Lines you leased. 4/

17. Total lines you provided to end users. [Line 15 + Line 16]

18. Total lines that you provided to other communications carriers.

19. Total high capacity lines you provide. [Line 17 + Line 18]
### IV. Lines and channels that you used to provide service to your end users at end of quarter, categorized by technology:

- 20. T1.
- 22. Up to T1 equiv. xDSL.
- 23. Greater than T1 equiv. xDSL.
- 24. Up to T1 equiv. coaxial (including fiber-fed).
- 25. Greater than T1 equiv. coaxial (including fiber-fed).
- 27. Up to T1 equiv. electrical power line.
- 28. Greater than T1 equiv. electrical power line.
- 29. Up to T1 equiv. satellite fixed.
- 30. Greater than T1 satellite fixed.
- 32. Up to T1 equiv. terrestrial wireless fixed.
- 33. Greater than T1 terrestrial wireless fixed.
- 34. Terrestrial wireless mobile.
- 35. Other -- up to T1 equiv.
- 36. Other -- greater than T1 equiv.
V. Lines and channels that you used to provide service to your end users at end of quarter, categorized by technology:

37. T1.
38. T3.
39. Up to T1 equiv. xDSL.
40. Greater than T1 equiv. xDSL.
41. Up to T1 equiv. coaxial (including fiber-fed).
42. Greater than T1 equiv. coaxial (including fiber-fed).
43. Optical carrier.
44. Up to T1 equiv. electrical power line.
45. Greater than T1 equiv. electrical power line.
46. Up to T1 equiv. satellite fixed.
47. Greater than T1 satellite fixed.
48. Satellite mobile.
49. Up to T1 equiv. terrestrial wireless fixed.
50. Greater than T1 terrestrial wireless fixed.
51. Terrestrial wireless mobile.
52. Other -- up to T1 equiv.
53. Other -- greater than T1 equiv.
VI. Voice grade mobile telephony service subscribers \( \frac{1}{9} \) served at end of quarter:

<td></td>
</tr>
</tbody>
</table>
Purpose: Data from this survey will be used to describe competition in the local exchange market and to gather information about the deployment of broadband services. In addition, the data will be used to identify how much of the competition is provided on a facilities vs. a resale basis. Carriers should file separate data for voice grade and for higher capacity lines. For the voice grade part of the market, carriers should file separate data for residential, non-residential, and special access and UNE loop service.

Use of the term "lines": Interpret "lines" to mean either physical lines or wireless channels whose function is similar to lines. In categorizing lines as voice grade vs. high capacity (Sections I and III) and by type of broadband technology deployment (Section IV and V), base your response on the portion of the line or channel that connects to the customer’s premise. Count only lines that are in service, including lines that you provide to end users (all Sections) and lines that you provide to another carrier (Sections I, II, III and VI).

1/ Include vs. exclude: Report in Section I, Section II and Section III all lines and channels that connect directly to an end-user premises at one end and, at the other end (directly or indirectly), to a carrier switch or to a network that carries traffic to the public switched telephone network. For example:

Include:
- UNE loops provided to other communications carriers even if those carriers were not using those lines to provide service to end users.
- fixed wireless channels.
- symmetric and asymmetric xDSL lines that carried customer voice and data to internet protocol, ATM based, or circuit switched networks whence traffic reached the public switched telephone network.
- dedicated lines that connected to an end user at one end, passed through your switch or switching center, and thence connected to another communication carrier’s switch or network that carries traffic to the public switched telephone network.

Exclude:
- lines provided to carriers that were used for interoffice trunking.
- private lines that connected one customer location directly to another.
- lines not in service even if the lines were on order.
- company official lines.
- mobile satellite, cellular & PCS telephone service. [Report mobile telephony service subscribers in Section VI.]
- transport lines between your switching center and internet protocol, ATM or circuit switched networks, where you already are reporting the portion of the line between the end user and your switching center, even if you multiplexed those lines and provided higher capacity lines between your switching center and those networks.
- lines that customers cannot use to place calls to subscribers of ordinary telephone service. For example, exclude dedicated lines that customers use for internet access unless the lines are also used for exchange telephone service.

Report in Section IV (all customers) and V (residential) all lines and channels used to provide broadband service to end-user customers. For example:

Include:
- all end-user lines reported as high capacity lines in Section III.
- lines that you use to provide internet access or internet services to end-user customers, including internet access provided via cable modem service over cable systems.

Exclude:
- broadcast cable television service and other multi-channel video programming.
- video-on-demand type service unless it is bundled with internet-type access.

Report in Section VI voice grade mobile telephone services. For example:

Include:
- mobile satellite, cellular, and PCS telephone service & other terrestrial mobile services.

Exclude:
- fixed wireless services provided using PCS or satellite facilities.
- paging and other one-way services.
- all services with data rates of 200 kbps or greater in one direction.
- all dedicated internet services.
**2/ Voice grade vs. high capacity:** Count as one voice grade equivalent line: traditional analog POTS lines, Centrex-CO extensions, and Centrex-CU trunks. Count a UNE loop as a single voice grade equivalent line unless it is specifically provided and equipped as a high capacity line. Classify high capacity lines/channels as T1/T3 vs. all other. Include DS1 and DS3 lines as T1/T3 lines/channels. Include xDSL, coaxial, optical carrier, electrical power, terrestrial fixed wireless and satellite fixed lines/channels as other lines/channels. In completing Section III, report actual line counts and capacity. For example, count eight 1/4 T1 circuits as eight physical lines and as two 1.544 mbps equivalents of capacity. Similarly, count one optical carrier (SONET) OC-1 line as one physical line and as twenty eight 1.544 mbps equivalents. Count a T3/DS3 line as one physical line and as twenty eight 1.544 mbps equivalent lines. Count a PRI ISDN line as one 1.544 mbps equivalent line. Classify other digital lines as follows:

<table>
<thead>
<tr>
<th>Reporting of Digital Lines/Channels</th>
<th>Upstream Data Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Downstream Data Rate</td>
<td></td>
</tr>
<tr>
<td>Less than 48 kbps</td>
<td>do not report</td>
</tr>
<tr>
<td>48 kbps or more but less than 96 kbps</td>
<td>do not report</td>
</tr>
<tr>
<td>96 kbps up to 200 kbps</td>
<td>do not report</td>
</tr>
<tr>
<td>More than 200 kbps</td>
<td>one-way broadband</td>
</tr>
</tbody>
</table>

* As noted above, digital lines are reported as voice grade lines only if they connect directly to an end-user premises at one end and, at the other end, to a carrier switch or to a network that carries traffic to the public switched telephone network. For example, Basic Rate ISDN lines are reported as two voice grade lines.

**3/ End-user vs. carrier:** In Section I, separate lines provided to end users from lines provided to other communications carriers under resale or UNE arrangements. In Section III, separate high capacity lines that are connected to end users into two categories: lines that you provided to end users; and lines that you provided to other communications carriers. Do not include the same high capacity line more than once in lines 15, 16 and 18. Include as end-user lines in Section I-A and Section III-A lines billed or marketed by your agents. For example, include as end-user lines all lines provided through traditional marketing agency arrangements, as well as lines furnished to shared tenant service providers. In Sections IV and V, only report broadband services provided to end users. Broadband lines provided to internet service providers for resale to end users should be classified as resale, not as end-user.

**4/ Own vs. lease:** Only one filer should report that they own any specific line. Count as lines you own all lines that you actually owned as well as lines obtained from entities that are not communications carriers and that you used as part of your own system. Count as lines you lease all lines that you obtained from another reporting communications carrier including lines obtained under UNE loop, wholesale (Total Service Resale), or other resale or lease arrangements. For example, if you take a voice grade UNE loop and use it to provide switched access service to a residential customer, report that line in Line 2, column (a).
5/ Residential vs. non-residential vs. special access and UNE loop: Classify lines as residential only if the line terminates with a residential end user. Exclude lines that terminate with business, government, education, shared tenant system, institutional and pay telephone customers. In Section I, classify all lines provided under UNE loop arrangements in column (c). Count a UNE loop as in service if it has been provided to and is being billed to the competing carrier regardless of whether that carrier has the line in service. Classify lines provided for resale as residential vs. non-residential according to the tariff/price list under which the service is provided. If the tariff/price list does not distinguish residential vs. non-residential service, estimate a split based on the demographics of the area in which the lines are provided. Include local private lines connecting an end user with a carrier in column (c). For reporting voice grade lines, classify as special access all dedicated lines connected to an end user at one end, passed through your switch or switching center, and thence connected to another communication carrier's switch or network, even if these were provided under private line rather than special access tariffs. Report high capacity lines in Section III without any separate breakout for switched vs. special access vs. private line. In Section V, include lines that connect to residential end users including lines billed to residential end users that connect the customer to an internet service provider, but not lines billed to the internet service provider.

6/ A switching center is a location containing one or more switches. Do not consider separate three-digit telephone prefixes as separate switching centers. Consider a remote as a separate switching center if a competing carrier could obtain a UNE loop only at the remote switch rather than at the host switch. Note: this definition of a switching center is different from wire center based definitions of switching centers which include all remote switch locations as switching centers. If collocation occurs only at a remote switch, report lines served from that switch on Line 12 and report other lines served by the host or other remote switches on Line 13.

7/ One-way vs. full broadband: Classify a line/channel as full broadband if it provides the customer the capability of simultaneously sending and receiving information at a rate greater than 200 kbps. Classify an asymmetric line/channel as one-way broadband if it provides the customer the capability of sending or receiving information at a rate greater than 200 kbps in one direction but 200 kbps or less in the other direction. For packet switched-based services, use the customer's authorized maximum usage to classify the line/channel as full broadband or one-way broadband. As noted in footnote 1, broadband does not include broadcast cable TV service or other exclusively one-way services, but does include internet access using cable modem service over cable systems.

8/ Up to vs. greater than T1 equiv. broadband: In Sections IV and V, classify xDSL, coaxial, electrical power, satellite fixed, wireless fixed and other lines/channels as greater than T1 equivalent if they provide the end user with the capability of transmitting or receiving greater than 1.544 mbps in one direction. Classify other broadband lines/channels as up to T1 equivalent.

9/ Mobile wireless telephony subscriber counts by state should be based on billing addresses.

Company

State
Instructions for electronic filing

1) Enter the data for one state, save the spreadsheet, and then reload FORM5XX.XLS to create a file for the next state.

2) If you meet the filing threshold for more than one type of operation (CLEC, ILEC, Mobile Wireless / Satellite Service Provider, Cable TV, or Other) then you will file separate data in separate worksheets for each type of operation in each state.

3) Use the following naming convention for file names:

   First letter = "C" for CLEC operations in state; "I" for ILEC operations; "M" for Mobile Wireless / Satellite operations; "V" for cable TV operations; or "O" for other operations in the state.

   Next character is the last digit of the year. For example:
   
   1999 9
   2000 0

   Next three letters = entity name (company) abbr. For example:
   
   Allegiance Telecom ALG
   ALLTEL ALL
   Ameritech AMR
   e.spire Communications ESP

   Next character is the numeric value of the quarter of the filing. Specifically:
   
   first quarter 1
   second quarter 2
   third quarter 3
   fourth quarter 4

   Next two characters = state abbr.
   
   Alabama AL
   Alaska AK
   Arizona AZ
   Arkansas AR
   California CA
   Colorado CO
   Connecticut CT
   Delaware DE
   District of Columbia DC
   Florida FL
   Georgia GA
   Hawaii HI
   Idaho ID

   OMB NO: 3060-xxxx

Examples:

Ameritech ILEC operations in Michigan (fourth quarter, 1999)  I9AMR4MI

GTE CLEC operations in Florida (second quarter, 2000)  C0GTE2FL
4) Do not insert or delete rows or columns or move cells in the worksheet.

5) Enter data into the cells indicated.

6) Enter numeric data as numbers, not as labels. Enter all digits, even if a number has been estimated or rounded. Thus, enter 21.7 million as 21,700,000.

   Enter quarter as a numeric value
   1 = first quarter (i.e., data as of March 31)
   2 = second quarter (i.e., data as of June 30)
   3 = third quarter (i.e., data as of September 30)
   4 = fourth quarter (i.e., data as of December 31)

   Enter the year as a numeric, 4-digit value. For example: 2001

7) Enter any comments or explanatory notes in the space provided at the bottom of the worksheet, below the footnotes. Enter the section and/or question number in column F and your comment in column I.

8) Enter the identical company name in the space provided at the top of FCC Form 5xx for each state for which the entity files data for a particular type of operation (e.g., CLEC). Use the name under which the company does business, not the abbreviation used for naming the data files.

   Enter the state abbreviations shown above in the indicated cell under the company name.

9) Enter an "x" or an "X" in the appropriate check box to indicate CLEC; ILEC; Mobile Wireless / Satellite Service Provider; Cable TV; or Other.

10) Entering responses: Do not leave entries blank.
    Use the number "0" (zero) for items that are not applicable or for those values which are known to be zero.

11) Contact Ellen Burton or Jim Zolnierek for clarifications at (202) 418-0940.
12) To submit the individual data files, either:

   a) Attach files to an e-mail directed to:
      localcomp@fcc.gov

      Include in the message part of the e-mail
      - The name of the company providing the data
      - The number of files attached to the message
      - The 3-character company abbreviation used
         as part of the file names.

   or b) Mail diskettes to:

      Local Competition Survey
      Mail Stop 1600F
      Federal Communications Commission
      445 12th Street, S.W.
      Washington, D.C. 20554

      Include in the cover letter transmitting the diskettes:
      - The name of the company providing the data
      - The number of diskettes and data files transmitted in the package
      - The 3-character company abbreviation used
         as part of the file names.

      Note: more than one file can be included on a diskette.
