

**APPENDIX F:**

---

<sup>1</sup> "Licensees of cellular systems may use alternative cellular technologies and/or provide fixed services on a co-primary basis with their mobile offerings, including personal communications services . . . on the spectrum within their assigned channel block." 47 CFR § 22.902(d).

<sup>2</sup> The terminology of fixed wireless technology is still being developed, and operators and equipment manufacturers often use generic terms in a proprietary way. AT&T, for example, refers to its fixed wireless technology as "Fixed Wireless Service." Nortel refers to its technology as "Fixed Wireless Access."
