FEDERAL COMMUNICATIONS COMMISSION
1919 M STREET, N.W.
WASHINGTON, D.C. 20554

DA 98-97

News media information 202/418-0500 Fa-On-Demand 202/418-2830 Interne: <http://www.fcc.gov> <ftp.fcc.gov>

Released: January 21, 1998

800 MHz SMR Auction

APPLICATIONS ACCEPTED FOR FILING Auction Event No. 16

After preliminary review, the FCC long-form applications (Form 601), for the upper 200 channels of the 800 MHz Specialized Mobile Radio (SMR) service, listed in Attachment A, are ACCEPTED for filing.¹ Upon further examination, the Commission may return or dismiss any of these applications found to be defective or not in conformance with the Commission's Rules. *See* 47 C.F.R. § 90.161(b)(6). In addition, applications listed in Attachment A that are pending with associated petitions for waiver or requests for confidentiality are accepted conditioned on resolution of such requests.

Petitions to deny the applications listed in Attachment A must be filed no later than thirty (30) days after the date of this Public Notice (February 20, 1998). *See* 47 C.F.R. §§ 1.2108(b), 90.163(a)(4). Oppositions to petitions to deny must be filed no later than ten (10) days after the date on which the petition to deny was filed. *See* 47 C.F.R. §§ 1.2108(c), 1.45(a). Replies to the opposition must be filed no later than five (5) days after the time for filing oppositions has expired. *See* 47 C.F.R. §§ 1.2108(c), 1.45(b).

No application listed herein will be granted sooner than thirty-one (31) days after the date of this Public Notice (February 21, 1998). *See* 47 C.F.R. §§ 1.2108(b), 90.163(a)(4). All winning bidders will be required to pay the balance of their winning bids in a lump sum payment within ten (10) business days following the conditional grant of the license. *See* 47 C.F.R. § 90.907(b). Applicants are reminded that the final grant of the license is conditioned upon the full and timely payment of the winning bid. *See* 47 C.F.R. § 90.909(a).

The applications listed in Attachment A are available to the public for electronic viewing. Instructions for obtaining and using the Commission's Universal Licensing System ("ULS") are contained in Attachments B, C, and D of this Public Notice. All applications listed in Attachment

¹ Disposition of Form 601 applications for 800 MHz SMR licenses which are not listed in Attachment A will be addressed by future public notice.

are available to the public in Room 5608, 2025 M Street, N.W., Washington, D.C., during the regular hours of the FCC's Public Reference and Information Branch (Monday through Thursday, 9 a.m. to 4 p.m., and Friday, 9 a.m. to 2 p.m.). Copies of applications may be obtained from:

International Transcription Service, Inc.
1231 20th Street, N.W.
Washington, D.C. 20036

Phone: (202) 857-3800

Please note the Following:

- ◆ Amendments to Form 601 applications may be made electronically.
- ◆ For technical assistance in using ULS for applications, contact the FCC Technical Support Hotline at (202) 414-1250. The FCC Technical Support Hotline generally will be available Monday through Friday, from 9 a.m. to 6 p.m. ET. *All calls to the FCC Technical Support Hotline are recorded.*
- ◆ Those persons seeking answers to *legal questions* should call Wilbert Nixon, Yanic Thomas, or Chris Gacek at 202/418-7240.

This document contains the following attachments:

- Attachment A: Applications Accepted for Filing
- Attachment B: Instructions for Searching for Applications listed in Attachment A
- Attachment C: Accessing the FCC Network Using Windows 95
- Attachment D: Accessing the FCC Network Using Windows 3.1 or 3.11

**INSTRUCTIONS FOR SEARCHING ACCEPTED APPLICATIONS:
LISTED IN ATTACHMENT A (FOR AUCTION NO. 16)**

These instructions provide the public with directions as to how they can electronically search the FCC Network for a specific, accepted application or applications now on file. The following instructions pertain only to long-form applications (FCC Form 601) accepted for filing after the conclusion of Auction No. 16 (*see* Attachment A).

To search the FCC Network for an application, you must first connect to the FCC Network.
Note the following:

- " Attachment C describes how Windows 95 users can connect to the FCC Network using the Dial-Up Networking features of Windows 95.
- " Attachment D describes how Windows 3.1 and Windows for Workgroups 3.11 users can connect to the FCC Network using a PPP Dialer application that is available for downloading.

Performing an Application Search

Once you have connected to the FCC Network, follow the procedures below to search for an application. *You may click on the Help button at anytime for additional information on using Application Search.*

- " In the *Location* (Netscape) or *Address* (Internet Explorer) field of the web browser screen, type **WTBWWW05.FCC.GOV**. Then press the Enter key. Entering this address will access the Universal Licensing System main page.
- " On the Universal Licensing System main page, click on the Application Search button, located on the left side of the page. The Application Search screen appears. This screen contains several data entry fields used for specifying search criteria.
- " On the Application Search screen, specify the search criteria necessary to locate the desired application. Please refer to the following Basic Guidelines for Specifying Search Criteria for more information.
- " If you are searching for a new application filed for Auction 16, click on *New* in the Purpose field and *16* in the Auction ID field.

Basic Guidelines for Specifying Search Criteria:

- " You must specify search criteria in at least one field. You do not have to specify search criteria in all of the search fields. Enter search criteria into as many fields as you wish.
- " To specify search criteria in a search field containing a menu of options, click on the desired option from the menu. Use the scroll bars to view all options in a menu. You can select multiple options from a menu by pressing the Ctrl key while you click on the menu options.
- " Click on <All> to undo a menu selection and search for all options in the menu.
- " Click on the Reset button to clear entries from all of the search fields.
- " The Application Search System restricts the number of rows returned in a search to 1000.

Click on the Help button for a definition of each search field available on the Application Search screen.

- " After you have specified the desired search criteria, click on the Search button. The system will scan the database for any applications matching the search criteria. The matching application files will be listed on the Search Results screen. The Search Results screen will identify the file number, licensee name, application purpose, application status, radio service code, and receipt date for each application returned in the query.

A message on the Search Results screen will indicate if no matches were found for the specified search criteria. Click on the New Search button and specify the new search criteria.

- " To view an application, click on its file number link. To navigate through the data on the Application screen, use the scroll bar or click on the links at the top of the screen. *Click on the Help button for information regarding specific functions available on this screen.*
 - O To re-access the Search Results screen, click on the down arrow end of the Other Options field to obtain the drop-down menu of options. Click on *Search Results* and then click on the Go button.
 - O To begin a new search, click on the down arrow end of the Other Options field to obtain the drop-down menu of options. Click on *New Search* and then click on the Go Button.

INSTRUCTIONS FOR SEARCHING FOR APPLICATIONS FILED FOR AUCTION 16

Following are instructions for electronically searching the FCC Network for a specific application or applications on file with the Commission. The following instructions relate specifically to searching for applications filed in response to Auction 16.

To search the FCC Network for an application, you must first connect to the FCC Network. Note the following:

- " Attachment D describes how Windows 95 users can connect to the FCC Network using the Dial-Up Networking features of Windows 95.
- " Attachment E describes how Windows 3.1 and Windows for Workgroups 3.11 users can connect to the FCC Network using a PPP Dialer application that is available for downloading.

Performing an Application Search

Once you have connected to the FCC Network, follow the procedures below to search for an application. *You may click on the Help button at anytime for additional information on using Application Search.*

1. In the *Location* (Netscape) or *Address* (Internet Explorer) field of the web browser screen, type **WTBWWW05.FCC.GOV**. Then press the Enter key. This will access the Universal Licensing System main page.
2. On the Universal Licensing System main page, click on the Application Search button, located on the left side of the page. The Application Search screen appears. This screen contains several data entry fields used for specifying search criteria.
3. On the Application Search screen, specify the search criteria necessary to locate the desired application. Please refer to the following Basic Guidelines for Specifying Search Criteria for more information.

If you are searching for an application filed for Auction 16, click *16* in the Auction ID field.

Basic Guidelines for Specifying Search Criteria:

- " You must specify search criteria in at least one field. You do not have to specify search criteria in all of the search fields. Enter search criteria into as many fields as you wish.
- " To specify search criteria in a search field containing a menu of options, click on the desired option from the menu. Use the scroll bars to view all options in a menu. You can select multiple options from a menu by pressing the Ctrl key while you click on the menu options.
- " Click on <All> to undo a menu selection and search for all options in the menu.
- " Click on the Reset button to clear entries from all of the search fields.
- " The Application Search System restricts the number of rows returned in a search to 1000.

Click on the Help button for a definition of each search field available on the Application Search screen.

4. After you have specified the desired search criteria, click on the Search button. The system will scan the database for any applications matching the search criteria. The matching application files will be listed on the Search Results screen. The Search Results screen will identify the file number, licensee name, application purpose, application status, radio service code, and receipt date for each application returned in the query.

A message on the Search Results screen will indicate if no matches were found for the specified search criteria. Click on the New Search button and respecify search criteria.

5. To view an application, click on its file number link. To navigate through the data on the Application screen, use the scroll bar or click on the links at the top of the screen. *Click on the Help button for information regarding specific functions available on this screen.*
 - " To re-access the Search Results screen, click on the down arrow end of the Other Options field to obtain the drop-down menu of options. Click on *Search Results* and then click on the Go button.
 - " To begin a new search, click on the down arrow end of the Other Options field to obtain the drop-down menu of options. Click on *New Search* and then click on the Go button.

Technical Support

For technical assistance in searching the ULS for applications, contact the FCC Technical Support Hotline at (202) 414-1250. The FCC Technical Support Hotline generally will be available Monday through Friday, from 9 a.m. to 6 p.m. ET. *All calls to the FCC Technical Support Hotline are recorded.*

ACCESSING THE FCC NETWORK USING WINDOWS 3.1 OR 3.11

This attachment describes how to access the FCC Network from a system that is running the Microsoft Windows 3.1 or Windows for Workgroups 3.11 operating system. This involves using the FCC-supplied PPP Dialer.

This attachment summarizes the hardware and software required for the PPP Dialer, then describes the procedures for performing the following tasks:

- " Downloading the Dialer files from the Internet or the FCC Bulletin Board
- " Extracting the Dialer from the downloaded files
- " Installing the Dialer application
- " Configuring PPP
- " Establishing a PPP connection

The attachment also describes how to troubleshoot and uninstall the PPP Dialer application, and tells how to get help from the FCC.

Hardware and Software Requirements

Applicants who want to connect to the FCC Wide Area Network using the FCC PPP Dialer will need the following hardware and software.

Hardware Requirements

- " CPU: Intel 80486 or above
- " RAM: 8 MB RAM (more recommended if you intend to open multiple applications)
- " Hard Disk: 10 MB available disk space
- " Modem: v.32bis 14.4-kbps Hayes compatible modem
- " Monitor: VGA or above
- " Mouse or other pointing device

Software Requirements

- " Internet Web Browser software (Netscape Navigator 3.0.1 and Microsoft Internet Explorer 3.0 were used during testing)
- " Microsoft Windows 3.1 or Microsoft Windows for Workgroups v3.11

Note: If you are running Windows in a networked environment, check with your local network administrator for any potential conflicts with the FCC PPP (Point-to-Point Protocol) Dialer. This usually includes any TCP/IP installed network protocol.

The FCC PPP Dialer will establish a point-to-point connection from your PC to the FCC Network. *This point-to-point connection is not routed through the Internet.*

Downloading the Dialer Software

Applicants who wish to use the FCC PPP Dialer must first download the dialer software from either the Internet or the FCC Bulletin Board System. Applicants must download the following compressed files to install the software:

fccdial1.exe
fccdial2.exe
fccdial3.exe

Download Method 1: Internet Access

You may use your Internet browser to download the compressed files from *www.fcc.gov* or *wtbwww01.fcc.gov*, as described in the following sections.

- " Downloading from *www.fcc.gov*
 1. Connect to your Internet service provider and start your Internet browser.
 2. In the *Location* (Netscape) or *Address* (Internet Explorer) field of the web browser screen, enter the following location: *http://www.fcc.gov*. Then press the Enter key.
 3. Click the *Auctions* link.
 4. In the Auctions section to the right, click *Completed*. Then click *800 SMR (Up. 200)*.
 5. Click Universal Licensing System.

6. Click the *FCC PPP Dialer* button, located on the left side of the page.
7. Scroll down to the Download the Dialer section of the page. Download the following files by clicking on their respective filename links: **fccdial1.exe**, **fccdial2.exe**, **fccdial3.exe**

" **Downloading from *wtbwww01.fcc.gov***

1. Connect to your Internet service provider and start your Web browser.
2. In the *Location* (Netscape) or *Address* (Internet Explorer) field of the web browser screen, enter the following location: *http://wtbwww01.fcc.gov*. Then press the Enter key.
3. Click the Dialer link.
4. Download the following files by clicking on the corresponding icons: **fccdial1.exe**, **fccdial2.exe**, **fccdial3.exe**

Download Method 2: Dial-In Access to the FCC Auction Bulletin Board System (BBS)

The FCC Auction Bulletin Board System (BBS) provides dial-in access for the FCC PPP Dialer. To access the FCC Auction BBS, use a communications package that can handle at least Xmodem protocol (such as PcAnyWhere, Procomm, or Microsoft Terminal in Windows 3.x) to dial in to (202) 682-5851. Use the settings of 8 data bits, no parity, and 1 stop bit (8,N,1).

Once your computer is connected to the Auction BBS, do the following:

1. To create an account:
 - a. Enter your first name.
Note: Throughout these instructions, "enter" means to type the appropriate information and then press the Enter key.
 - b. Enter your last name.
 - c. When asked whether you want to create an account, enter **Y**.
 - d. When prompted, enter a password.

The password can be from four to ten characters long, where the characters can be either letters or numbers.

- e. To confirm the password, enter it again.
- f. When prompted for contact information, enter your voice phone number, including area code.

For example, you might enter **202-555-1234**.

- g. Enter your company name.
2. On the Welcome screen, enter **C** for Continue. (You may also enter **c**, the program accepts either case.)

Since **C** is the default (automatic) selection, you can also just press Enter to continue.

3. When asked whether you want to view the bulletin menu, enter **Y** for Yes. Then press Enter to obtain the FCC Auction BBS Main Menu.
4. Enter **A** (for Auction Menu) to obtain the Auction Library Menu.

The top options on this menu provide a range of numbers to represent the available auctions.

5. To select Dialer, enter **D**.

The list of available files appears. These files are sorted by date, with the most recent files at the beginning of the list.

6. To scroll downward to the next screen of file names, either press Enter or enter **C** for Continue. To scroll upward to the preceding screen of file names, enter **P** for Previous.

Note that on each screen, file names are numbered separately, starting with 1.

7. To select one or more files for downloading or viewing, mark the files you want. The program marks a file by preceding its name with an asterisk (*).

You can do the following:

- To mark an individual file, enter its line number.
- To mark a range of files, enter **M** (for Mark) and then enter the range of files in response to the prompt.

For example, to mark files 1 through 3, enter **1-3** at the prompt.

- To unmark a file, enter its number again.

You can also use Mark to unmark a range of files.

Use any of these techniques to mark the following files: **fccdial1.exe, fccdial2.exe, fccdial3.exe**

8. When you have finished marking files, download them as follows:
 - a. Enter **D** for Download.

The program displays a list that summarizes the download operation. The Time column lists the download time for each file; the Total Time column lists a running total of the download times.

- b. Enter **D** to proceed.
 - c. Select the file transfer protocol that has been specified in your terminal emulation software (e.g., Xmodem or Zmodem).

When the download operation has finished, the list of files reappears.

9. Enter **X** to leave the BBS.

Extracting the FCC PPP Dialer

The FCC PPP Dialer files are downloaded in a self-extracting, compressed file format. When you have downloaded the compressed files, you must extract the FCC PPP Dialer from each file.

To extract the software, start File Manager in the Main Program group, open the file folder where you downloaded the files, and double-click each file (**fccdial1.exe, fccdial2.exe, fccdial3.exe**). A message will appear listing the default directory to which the software will extract. If this directory does not exist, it will be created automatically. Click Unzip to begin extracting the software from the compressed files.

When the extraction is complete, a message will appear listing the number of files that were unzipped. Click OK to automatically start the setup program.

Installing the FCC PPP Dialer

After you extract the software from *all* of the compressed files, go to File Manager, locate the directory to which you extracted the software, and double-click **setup.exe**.

To begin, the setup program shows a screen listing the default directory to which the software will install. Click the Install button, then click OK to install to the specified directory. If the directory does not exist, the setup program will create it automatically.

When the installation is complete, a message may appear asking you to restart Windows so that the changes made by the installation can take effect. Click Restart to restart Windows or click Stay Here to restart at a later time. Do not use the FCC PPP Dialer until you have restarted Windows.

You will now have a new Program Manager group called FCC PPP Dialer with icons labeled Configure PPP, PPP Dialer, and Uninstall.

Running the Configure PPP Program

Before establishing a PPP connection, you must run the Configure PPP program. If desired, you may also adjust the configuration settings.

To start the Configure PPP program:

1. Double-click the icon labeled Configure PPP.

The communications setup window will appear.

2. Under the box labeled Modem, select the COM port to which your modem is connected.
3. Under the box labeled Speed, select the maximum DTE rate of your modem.

For 14.4-kbps and 28.8-kbps modems, you can generally select a speed of 38400 or 57600.

4. In most cases, carrier detect should not be checked and flow control should be checked. If you experience problems getting the modem to respond, experimenting with these settings may help.
5. The DNS should be set to 192.104.54.1.

The remainder of the screen has default values which should provide optimal performance.

6. Click the Script button to bring up the Script Setup screen. This screen gives you the ability to issue specific commands to the modem.
7. Click the box labeled Selected Modem and choose the entry from the list that most closely matches the modem installed on your PC.

If your modem does not appear in the list, select a generic modem string by entering either **ATZ** (for 14.4-kbps modems) or **AT&F** (for 28.8-kbps modems) in the *Reset Modem String* box.

8. It may be necessary to change the command in the box labeled *Modem Dial Prefix* to accommodate how you make calls.

For example:

No dialing prefix used: ATDT

Dialing prefix of 9 used: ATDT9

Dialing prefix of 9 used, add a *l* before dialing the 800 number: ATDT9l

Turn off call waiting, add a *l* before dialing the 800 number: ATDT*70,1

9. If you use a dialing suffix, enter it in the box labeled *Dial Suffix*.
10. The default settings provided in Configure PPP should be compatible with most systems. If you experience problems connecting to the FCC Network, refer to the *Troubleshooting* section for possible solutions.
11. When you have finished using the Configure PPP program, click the OK button. You may now start the FCC PPP Dialer.

Establishing a PPP Connection

Once you have run the Configure PPP program, you can establish a PPP connection. Do the following:

1. To start the PPP Dialer, double-click the PPP Dialer icon in the FCC PPP Dialer program group.

The dialer will attempt to dial the toll-free 800 number automatically.

2. When the PPP Dialer establishes a connection, you will gain access to the PPP Dial Up screen. You may switch to the PPP Dial Up screen by pressing Ctrl-Esc and double-clicking *PPP Dial Up in the Task List*.

The screen will display the current status of the PPP connection.

3. To refresh the status of the PPP connection, select the *Dial / Refresh Status* menu option.
4. Select the *Window / Minimize* menu option to minimize the PPP Dial Up screen.
5. To test the status of the PPP connection, select the *Dial / Test Connection* menu option. This option allows you to ping the FCC Network. The ping process sends a signal to the FCC Network; if the signal returns, you have established a good connection.

The Hostname box will show 192.104.54.1.

6. Under the *Number* menu option, choose the number of pings you wish to send (one, continuous, or a user-specified number). Under the *Specifications* menu option, you can customize the type of request (e.g., icmp echo request), the interval between pings, and the timeout setting; the default settings should suffice.

If you change any of the settings and would like to save them, select the *File / Save Settings* menu option.

7. Click the Start button.

The status and packets boxes will display information concerning whether the pings were returned.

8. If necessary, click the Stop button, to end the ping process. Click the Exit button to exit the Ping program.

Disconnecting the PPP Connection

To disconnect from the FCC Network, switch to the PPP Dial Up screen and select the *Dial | Disconnect* menu option.

Troubleshooting

Following are problems you may encounter and possible solutions for resolving or isolating them.

Modem does not respond

1. Check the COM port setting.
2. Make sure that you have selected the appropriate modem in the Selected Modem list.

If your modem does not appear in the list, select a generic modem string by entering either **ATZ** (for 14.4-kbps modems) or **AT&F** (for 28.8-kbps modems) in the *Reset Modem String* box.

3. Check your modem for IRQ conflicts.
4. Check the physical connections.
5. Change Carrier Detect.
6. Change Flow Control.

Modem connects but does not return an IP address

1. Check that you have selected the appropriate modem in the Selected Modem list.
2. Verify the DNS is set to 192.104.54.1.
3. Verify the MRU and MTU are set to 1500.
4. Turn off VJ Compression.
5. Change timeout to 15.

This is found on the Script Setup screen in Configure PPP.

6. Check your modem for IRQ conflicts.
7. Unload network drivers.

SQLSERVER errors

1. Turn off VJ Compression.
2. Unload network drivers.
3. Check for the existence of multiple winsock.dll files on your PC.
4. Test the PPP connection with the Ping program.

Errors may be caused by having multiple winsock.dll files on your PC. To search for conflicting winsock.dll files, start File Manager, open the directory for the root of the hard drive you want to search (usually c:\) and select the *File / Search* menu option. In the *search for:* box, enter **winsock.dll**, make sure *select all subdirectories* is checked, and click OK.

Make sure that any other winsock files are not in your path. To check this, go to the DOS prompt and type **path**. If any directory containing another winsock.dll file appears in the path, do either of the following:

- " Edit the autoexec.bat file to remove the reference to that directory, then save and reboot the PC. If you need to use the other PPP software package, reinsert the appropriate directory reference, save, and reboot.
- " Temporarily rename the conflicting winsock.

Uninstalling the FCC PPP Dialer Application

To uninstall the FCC PPP Dialer, double-click the Uninstall icon in the FCC PPP Dialer program group. Click Start to uninstall the software.

Technical Support

For technical assistance in installing or using the FCC PPP Dialer, contact the FCC Technical Support Hotline at (202) 414-1250. This hotline is generally available Monday through Friday, from 8 a.m. to 6 p.m. ET. *All calls to the FCC Technical Support Hotline are recorded.*
