DA 17-862
Released September 7, 2017

PUBLIC SAFETY & HOMELAND SECURITY BUREAU ANNOUNCES THE EXTENSION OF THE DISASTER INFORMATION REPORTING SYSTEM TO ALL OF PUERTO RICO AND THE US VIRGIN ISLANDS

Disaster data collection has been extended to include all of Puerto Rico for Hurricane Irma.

On September 6, 2017, the Federal Communications Commission (FCC or Commission) activated Disaster Information Reporting System (DIRS)¹ to receive information on the status of communications equipment in 44 counties in Puerto Rico and the US Virgin Islands.² The FCC in coordination with DHS is extending data collection to include all counties within Puerto Rico and the US Virgin Islands.

The Commission requests that communications providers that provide service to any areas listed below expeditiously submit and update information through DIRS regarding, *inter alia*, the status of their communications equipment, restoration efforts, and power (*i.e.*, whether they are using commercial power or back-up power). Communications providers can accomplish this by accessing DIRS at <https://www.fcc.gov/nors/disaster/>. Providers that have not previously done so will be asked to first provide contact information and obtain a User ID when they access DIRS. There is a link on the login page that will allow them to obtain the User ID and password. If a user does not remember his/her password, he/she should use the forgotten password link on the login page.

Communications providers are reminded that for providers that participate in DIRS, the separate Network Outage Reporting System (NORS) obligations are suspended for the duration of the DIRS activation with respect to outages in the counties where DIRS has been activated. **Reports are requested beginning at 10:00 a.m. on September 8, 2017, and every day after that by 10:00 a.m. until DIRS is deactivated.**

Communications providers that serve an area listed below and that have already provided contact information in DIRS will be sent an e-mail requesting that they provide the above-

¹ DIRS is a voluntary, web-based system that communications providers, including wireless, wireline, broadcast, cable and Voice over Internet Protocol providers, can use to report communications infrastructure status and situational awareness information during times of crisis

² *Public Safety & Homeland Security Bureau Announces the Activation of the Disaster Information Reporting System in Response to Hurricane Irma*, Public Notice, DA 17-850 (rel. Sept. 6, 2017)

referenced status information through DIRS. For any communications providers that have not already logged onto DIRS to input their contact information, the Commission encourages them to do so as soon as possible.

COUNTIES OF INTEREST FOR THIS ACTIVATION INCLUDE:
