

Barry Schuler
President, Interactive Services Group
America Online, Inc.

Barry Schuler, a pioneer in the application of computer technology for graphic arts and visual communications, is President, Interactive Services Group at America Online, Inc. He is responsible for the flagship AOL Service, Netscape Communications, CompuServe, and the AOL Devices group, which is currently developing non-PC connected products such as AOLTV. Mr. Schuler is regarded by the industry as a leader in developing interactive multimedia products for the home and workplace.

Working with computers, graphics and video since 1977, Mr. Schuler was CEO and co-founder of Medior Inc. prior to its acquisition by AOL in 1995.

Recognized as a leader in developing interactive multimedia products for the home and workplace, Medior pioneered the use of interactive multimedia for such applications as electronic commerce, entertainment products, and corporate information systems, and was acclaimed for its work in user interface design. In fact, the company created the navigation and design that helped AOL become the number one consumer online service.

Prior to co-founding Medior in 1989, Schuler served as President and CEO of Cricket Software, an early developer of Macintosh graphics software, where he oversaw breakthroughs in the development of software for business presentations and color imaging. He joined Cricket after 10 years at CMP Communications, a high-technology marketing and communications company, which he also co-founded.

Schuler's work has received many awards for his work, including a Golden Reel Special Achievement Award in computer animation from the International Television Association.
