

Wireless Power Transfer Applications

**TCB Workshop
October 2013**

Laboratory Division
Office of Engineering and Technology
Federal Communications Commission

KDB Guidance

- KDB680106 only applies to low-power, non-portable consumer devices
- We are starting to see a greater variety of wireless power transfer applications
 - Portable “Sleeves” with self-contained batteries
 - Medium Power (>15 watt) power transfer at distance
 - High Power (>1 kW) automotive chargers

KDB Guidance

- Test Labs and TCBs should seek guidance for all devices not covered under KDB680106
- We are currently reviewing guidance, policy, and procedures related to authorization of wireless power transfer applications
- We plan to publish updated general guidance in the coming months and will be seeking input from involved parties

Questions and Answers

Thanks!
