Cybersecurity: Why it Matters

Vision for the Nation's Cyber Workforce

The Foundation for our Nation's Cyber Workforce

The National Cybersecurity Workforce Framework

- ▶ 7 Categories, 30+ Specialty Areas
- ▶ Baselines knowledge, skills, and abilities & tasks
- ▶ Support for strategic workforce development

Creating a Strong Cybersecurity Team

The Cybersecurity Workforce Development Toolkit equips you with resources to:

- ✓ **PREPARE** for workforce development
- ✓ **PLAN** your cybersecurity workforce
- ✓ **BUILD** a high-performing cybersecurity team
- ✓ **ADVANCE** cybersecurity staff with career development opportunities

Available online at niccs.us-cert.gov/

Prepare for Workforce Planning

Assess Your Workforce Planning Readiness

- ✓ Establish a vision for your cybersecurity workforce
- ✓ Use the Cybersecurity Workforce Planning Capability Maturity Model (CMM) to assess your organization's workforce planning readiness

3 Workforce Planning Maturity Levels

LIMITED

PROGRESSING

OPTIMIZING

Plan for Your Cybersecurity Team

How to Plan for Your Team

- ✓ Understand your cybersecurity risk exposure and tolerance using the Cybersecurity Workforce Planning Diagnostic
- ✓ Inventory your cybersecurity workforce
- ✓ Determine and address gaps

Characteristics of High-Performing Cybersecurity Teams

Build a High-Performing Cybersecurity Team

What Should a Cybersecurity Team Look Like?

- ✓ Align positions to the Workforce Framework
- ✓ Learn non-technical traits of cybersecurity professionals
- ✓ Use the recruitment checklist to hire top talent

Template – Align Positions to Workforce Framework

Position Title	<i>[Fill in Position Title]</i>
Primary Specialty Area(s)	<i>[Fill in Specialty Area(s)]</i>
Secondary Specialty Area(s)	<i>[Fill in Specialty Area(s)]</i>
<i>Current Tasks Performed</i> (i.e., specific job duties) – see general role examples in Workforce Framework Employer User Guide for sample wording	
<i>Additional Tasks</i> recommended by Specialty Area	

Advance Your Staff

Develop Your People

- ✓ Take steps to retain staff at every level
- ✓ Develop career paths to help your staff navigate their careers
- ✓ Discover continuous development opportunities

Customize Sample Career Paths Based on Level (e.g., Beginner, Intermediate, Expert)

CAREER PATH: BEGINNER LEVEL		
Suggested Experience & Credentials	Competencies and Sample Skills / KSAs	Suggested Training & Development Activities
Bachelor's Degree from an accredited program in a Computer Science-related OR 2 years relevant work experience	Technical Competencies & Sample KSAs <ul style="list-style-type: none"> • Vulnerabilities Assessment <ul style="list-style-type: none"> ○ Skill in the use of penetration testing tools and techniques • Information Security/Assurance <ul style="list-style-type: none"> ○ Skill in performing damage assessments General Competencies <ul style="list-style-type: none"> ○ Critical Thinking & Analytical Skills ○ Written & Oral Communication 	Sample Development Activities <ul style="list-style-type: none"> • University Programs (e.g., George Mason University; Stevens Institute of Technology; Carnegie Mellon) • Government agency courses (e.g., IRM-NDU, NSA, DoD, Dept. of State DSTC, DHS certifications)

Advanced Data Warehousing

Learning Objectives | Availability | Framework

Register Now!

Overview

This 3—day course introduces experienced students to best industry practices for dealing with difficult data warehouse data structures, databases and processes. This class is for experienced data warehouse architects and database designers. If you already have hands—on experience and want to refine your data warehousing skills, this is the class for you. The class will describe the most challenging data warehouse design problems the world of data warehousing has faced. You also have the opportunity to share experiences gained on previous projects with other attendees. This class is intense and fast—paced.

Overall Proficiency Level: 2 - Intermediate

Course Prerequisites: An understanding of data modeling, especially entity—relationship modeling.

Training Purpose: Skill Development

Specific Audience: All

Learning Objectives

- Data Warehouse Architectures
- Analytical Modeling Primer
- Dimensions
- Keys
- Time and History
- Changing dimensions
- Dimensions and Hierarchies
- Value Banding
- Aggregation
- Operational Data Store (ODS)

FedVTE

DHS offers free cybersecurity training for U.S. government and veterans!

- ✓ Available to Federal, State, Local, Tribal, and Territorial government and US veterans!
- ✓ Courses ranging from beginner to advanced levels
- ✓ 55,000+ active users
- ✓ 42 courses and growing. Popular courses include certification preparation for the following exams:
 - Network +
 - Security +
 - Certified Information Systems
 - Security Professional
 - Certified Ethical Hacker
