

Reference Architecture

- Two layers of encryption to government enterprise for classified
- Can be modified for unclassified, so first responders have interoperability and some security services
- Mobility Management Services (MDM/MAS) implemented in government enterprise.

Outer Encryption: FIPS / IPsec / Suite B / AES-256, X.509v3

Inner Encryption for VoIP: FIPS / Suite B / SRTP/SDES

Inner Encryption for Data: FIPS / IPsec / Suite B / AES-256, X.509v3
