A.   Introduction

This document contains details on the specific procedures to be followed when submitting FCC Report 43-01, the ARMIS Annual Summary Report, to the Commission.

B.   General Information

1.   FCC Report 43-01 was adopted by the Commission in the ARMIS Order, Automated Reporting Requirements for Certain Class A and Tier 1 Telephone Companies (Parts 31, 43, 67, and 69 of the FCC's Rules), CC Docket No. 86-182, 2 FCC Rcd 5770 (1987). This report has been revised in accordance with the 1998 Biennial Review Orders, CC Docket No. 98-81 and CC Docket No. 98-117 (dated June 30, 1999). The report is prescribed for each incumbent local exchange carrier (ILEC) with annual operating revenues for the preceding year equal to or above the indexed revenue threshold. See Memorandum Opinion and Order DA 95-1488 (June 30, 1995) and Order and Notice of Proposed Rulemaking CC Docket No. 96-193 (September 12, 1996).

2.   In the aforementioned 1998 Biennial Review Orders, the Commission granted the option of reduced reporting requirements for mid-size ILECs starting with the 1999 reporting year. Mid-size ILECs electing to report at this reduced level would file Part 32 Accounts at the Class B account level and only certain tables within the ARMIS USOA (43-02) Report.

3.   Affected carriers shall file by April 1 for the previous calendar year.

4.   The report shall be filed on a study area (jurisdiction) basis.

5.   Carriers seeking proprietary treatment for some data must provide two versions of each paper and automated report. The Confidential Version must contain all the required information (Confidential Treatment Tables/Data Records are provided to identify confidential data). The Public Version should not include data for which the carrier is seeking proprietary treatment. The carrier should **prominently** label the paper report and the diskette containing information subject to a claim of confidentiality to prevent inadvertent disclosure.

6.   Carriers not seeking proprietary treatment for any data should provide only one version of each paper report and diskette, and the paper report and diskette should be labeled the Unrestricted Version.

7.   The Confidential Treatment Tables/Data Records are to be included in all reports but are not a substitute for applying for confidential treatment with this Commission following established Commission procedures.

8. Each report and diskette must be clearly labeled to include the report number, company, study area, period, COSA code, version and submission number. The report number is 43-01, which identifies the filing as the ARMIS Annual Summary Report. The period identifies the year covered by the data. See the attached COSA Code Table (CO = Company, SA = Study Area) for a list of companies and their respective COSAs. The version refers to whether the filing is the Confidential, Public or Unrestricted Version. The submission number is defined as follows: submission 0 is for test data purposes only; submission 1 is the first submission of a year's data. If there is a change in the data in either the automated or the paper report, the carrier must resubmit both. A higher number (2, 3, etc.) and a new data entry date must be used each time a change occurs to denote a new submission. The automated report and paper report submission numbers must be the same. When correcting format errors, a new submission number is not required; however, the data entry date must be changed to reflect the date of the format change.

9. All correspondence and pleadings shall identify the proceeding as CC Docket 86-182.

10. Each reporting carrier must validate its data by using the most recent edit check program(s), provided by the Commission, for the reporting year. When an error is detected, the carrier must correct the error prior to submitting the report to the Commission. Once the carrier corrects its data so that the edit check program identifies no errors, the carrier should submit the ARMIS report along with a copy of the edit check printout to the Commission verifying that the program did not identify any errors.

C.   Data Items That Are "Not Available" or Are "Withheld"

1. The term "Not Available" is used below to refer only to those items which the Commission has ruled are not applicable to a particular row/column or are not required for a particular filing entity. The Confidential Version must contain values for all of the data items except those items which are "Not Available." If, in addition to the required study area reports, a carrier submits a report which combines data for more than one study area, and this report includes a field such as a sum, a ratio, or a percentage that cannot be computed completely and accurately because it relies on another item which the Commission has ruled is a "Not Available" item, then that field is also considered to be "Not Available."

2. The term "Withheld" is used below to refer only to those items for which the carrier has applied for confidential treatment with the Commission and is only applicable to the Public Version. If a field such as a sum, a ratio or a percentage relies on an item or items which have been withheld and that field is not also withheld, then it must include the withheld amount. For example, a carrier could withhold the individual values for two of three numbers, which are totaled. If the carrier does not also apply for confidential treatment for the total, then that total must be the sum of all three numbers, not just the one, which was not withheld. The Public Version must contain values for all

of the data items except those items which are "Not Available" or those items which have been "Withheld."

3.   See the Automated Report Specifications and the Paper Report Specifications for data entry conventions for these items.

D.   Where to File

1.   Carriers submitting FCC Report 43-01 should consult the schedule below which details the number of copies required and the location to which those copies should be delivered.

2.   Carriers are reminded that they must serve a copy of either the Unrestricted Version or the Public Version of both the paper report and the automated report (diskette) on the FCC's contractor for public records duplication.

E.   Footnotes

1.   If any data for the current period differ materially from those for the previous period and the difference is not self-explanatory but was caused by unusual circumstances, the carrier must include footnote text to explain the specific circumstances.

2.   If the reporting carrier does not follow the procedures described in the row and column instructions of the attached Report Definition, it must explain any deviations from those procedures in an explanatory footnote.   Such footnotes must provide detailed explanations of the procedures actually used by the carrier and its specific reasons for deviating from procedures prescribed by the Commission's Rules. This provision should not be interpreted to mean that deviations from the prescribed rules will automatically be approved by the Commission.

EXAMPLES:

Do <u>not</u> say, "Data are compiled using a more inclusive process than in previous filing."

Do say, "Data are compiled using a process that includes xxx, which was not included in previous filings. The impact of including xxx in this row inflates this number by x% over the previous reporting period."

Do <u>not</u> say, "This value was not calculated pursuant to the instructions."

Do, say "This value was calculated using the xxx method rather than the method described in the instructions because..."

Do <u>not</u> say, "Corrected Data."

Do say, "$xxxx is changed to $xxxx because ...".

Do <u>not</u> say, "Waiver" or Waiver Granted."

Do say, "Waiver of Part xx.xxx was granted in CC Docket No. xx-xxx, X FCC, xxxx (1992) to allow Any Company to ....because...."

3.   The footnote text must be included in the Footnote Text Records and the Footnote Table as specified in the Automated Report Specifications.

F.   <u>Errata</u>

1.   Carriers are under a legal obligation to correct any erroneous data discovered in FCC Report 43-01. Submissions containing corrected data must include references to indicate which data items were corrected since the previous submission. These references must be included in the Erratum Records and the Erratum Table as specified in the Automated and Paper Report Specifications. In addition, the carrier must include in the transmittal letter a brief statement indicating the reason for the errata.

G.   <u>Certification</u>

1.   Carriers must certify the accuracy of the data submitted in FCC Report 43-01 by including a certification statement, signed by a corporate officer, as the last page of the paper report.

2.   The text of the certification statement is included in the attached report definition.

H.   Waivers

1.   If a carrier determines that it will be unable to provide data required by FCC Report 43-01, it must file an application for waiver with the Commission following established Commission procedures. All such requests from a carrier should be included in a single application. The application must demonstrate good cause for reporting a different or lower level of detail and indicate how these deficiencies will be corrected.

2.   Carriers should not act upon requests for waiver until waivers are granted. It is important that carriers be aware that waivers are not in effect until they are granted, in writing, by the Commission or under delegated authority.

3.   Omission of individual data items or entries, without request for waiver, is unacceptable. One reason that compliance with the full requirements is so important is that omission of any single data entry by any carrier will jeopardize the accuracy of aggregate industry information.

I.   Extension of Filing Time

1.   Requests for extensions of filing time must be made in a timely manner. Requests received less than 72 hours prior to a filing date are prima facie unreasonable.

J.   Public Information

1.   The Public or Unrestricted Versions of the paper reports filed as Report 43-01 may be examined by the public at the FCC Reference Information Center (RIC), 445 Twelfth Street, S.W., Washington, D.C. Parties should contact RIC at (202) 418-0270.

SUMMARY

Estimated Average Burden Hours Per Response: 135 hours

This document provides the Report Definition for FCC Report 43-01, the ARMIS Annual Summary Report, and lists revenue, revenue requirement, and demand data, which must be provided annually by study area. It contains the following:

All monetary figures must be rounded to the nearest thousand dollars. All rates of return and percentage amounts (Rate of Return and Rate of Return including Refund) must be entered in percent and must be rounded to 2 decimal places. All minutes of use figures must be rounded to the nearest thousand; all access line figures must be provided to the nearest whole number.

Items which need not be reported because they do not apply are designated by N/A. DO NOT override N/As. If a reporting carrier should wish to apply data to a field containing a N/A, the carrier should enter the amount(s) and an explanation as a footnote to the field. The amount(s) must not be entered in a N/A'd field. All other fields must be populated. If there are no data applicable to an open field, enter zero.

When an errata occurs, carriers must include in the transmittal letter a brief statement indicating the reason for the errata. Other explanatory notes must be included in the footnote section of the filing.

NOTICE: The ARMIS Annual Summary Report collects highly aggregated financial data reflecting the results of accounting, rate base, and cost allocation requirements prescribed in Parts 32, 64, 65, 36 and 69. This report also includes a demand analysis table containing interstate access demand data. The ARMIS Annual Summary Report specifies information requirements in a consistent format and is essential for the FCC to monitor revenue requirements, rate of return, jurisdictional separations and access charges. Your response is mandatory.

Public reporting burden for this collection of information is estimated to average 135 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden to the Federal Communications Commission, Office of Managing Director, Washington, DC 20554.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid control number.

A.   Introduction

This document contains the detailed automated data processing (ADP) specifications for the automated report to be filed as FCC Report 43–01, the ARMIS Annual Summary Report.

B.   General Format and Media

1.   All data must be submitted on 3.5 inch double–sided high density IBM–PC compatible diskettes.

2.   All files must be coded in ASCII.

3.   See sections B and C on pages 1 and 2 of the Reporting Procedures for a discussion of the Confidential Version, the Public Version, and the Unrestricted Version of this report and for a definition and discussion of data items that are "Not Available" or are "Withheld."

4.   The file name for each file has six components:

a.   the four letter COSA code (CO = Company, SA = Study Area, see the COSA Code Table for a list of companies and their respective COSAs).
b.   the last two digits of the year which is covered by the data.
c.   the letters "AS".
d.   a decimal point.
e.   the letter "P", "C", or "U" to indicate whether this is the Public version, the Confidential version, or the Unrestricted version.
f.   two digits (zero filled) for the submission number: Submission 00 is for test data purposes only; Submission 01 is for the first submission of a year's data. If there is a change in the data in either the automated or paper report, the carrier must resubmit both. A higher number (2, 3, etc.) and a new data entry date must be used each time a change occurs to denote a new submission. The automated and paper report submission numbers must be the same. When correcting format errors, a new submission number is not required, however, the data entry date must be changed to reflect the date of the format change.

For example, the file name for the Unrestricted Version of the initial Annual Summary Report data file to be submitted by Illinois Bell to cover the calendar year 1999, would be LBIL99AS.U01:

LBIL   COSA for Illinois Bell
99   Data for calendar year 1999
AS   Annual Summary Report data file

.   Decimal point
U   Unrestricted version
01   First submission of this year's data

5.   A separate file must be prepared for each report. More than one file can be placed on the same diskette, as long as they cover the same period, version, and submission number.

C.   Data Entry Conventions

1.   Give each record a unique record number, beginning with 1001 and incrementing by one, with no numbers skipped.

2.   Begin each data record in column 1 and make each record the proper length as specified in the record layouts. Commas are used as delimiters between fields. All numeric fields are right justified and space filled, e.g. use ____123, NOT 123. All non–numeric fields are enclosed in double quotation marks and are left justified and space filled within these quotation marks, e.g. use "John Doe ".

3.   If an entry is to be a subtraction, indicate so by placing a minus sign in the column, immediately preceding the numeric data, e.g., use –4, NOT – 4 or (4).

4.   Do NOT include "$", "%", embedded commas, decimal points, quotes or other formatting characters in any numeric data fields, except for row numbers and percentage fields, which will include a decimal point but not a percent sign.

5.   In any numeric data field designated by N/A, enter –99999. If a "Public Version" diskette is filed, enter –88888 in any numeric data field for which data are "Withheld" to indicate that confidential treatment has been requested. **DO NOT** override N/A. These entries must be formatted according to the format rules for the particular data field; e.g., in the percentage fields, –99999 would be entered as – 99999.00.

6.   If a reporting carrier wishes to apply data to a field containing a N/A, the carrier should enter as a footnote to the field, the amount(s) and an explanation. The amount(s) must not be entered in the N/A field. All other fields must be populated. If there are no data applicable to an open field, enter zero.

D.   Rounding Conventions

1.   As specified in the Report Definition, all monetary figures must be rounded to the nearest thousand dollars.

2.   All minutes of use (MOU) data to be provided in the Demand Analysis Table must be rounded to the nearest thousand.

3.   All access line data (Single Line Business CPT, Residence CPT Lifeline, etc.) to be provided in the Demand Analysis Table must be reported in whole numbers.

4.   All rate of return and other percentage amounts (Rate of Return, Rate of Return including Refund) must be entered as in the following example and rounded to 2 decimal places.

Example: 23.70561 percent must be entered as 23.71

E.   Footnotes

1.   If any data for the current period differs materially from those for the previous period and the difference is not self-explanatory but was caused by unusual circumstances, then include footnote text to explain the specific circumstances.

2.   If the reporting carrier does not follow the procedures described in the row and column instructions of the Report Definition, it must explain any deviations from those procedures in an explanatory footnote. Such footnotes must provide detailed explanations of the procedures actually used by the carrier and its specific reasons for deviating from procedures prescribed by the Commission's Rules.   This provision should not be interpreted to mean that deviations from the prescribed rules will automatically be approved by the Commission. See Section E of the Reporting Procedures for examples of valid footnotes.

3.   Footnotes must be included in the footnote text record(s) of the automated report.

F.   Errata

1.   Carriers are under a legal obligation to correct any erroneous data discovered in FCC Report 43–01. Submissions containing corrected data must include references to indicate which data items were corrected since the previous submission. These references must be included in the Erratum Records of the automated report. In addition, the carrier must include in the transmittal letter a brief statement indicating the reason for the errata. See Section B of the Reporting Procedures for the use of submission numbers when an erratum occurs.

G.   Data Validation Programs

    1.   Each reporting carrier must validate its data by using the most recent edit check program(s), provided by the Commission, for the reporting year. When an error is detected, the carrier must correct the error prior to submitting the report to the Commission. Once the carrier corrects its data so that the edit check program identifies no errors, the carrier should submit the ARMIS report along with a copy of the edit check printout to the Commission verifying that the program did not identify any errors.

H.   Data Record Descriptions

The eight data record types are described below. Unless otherwise indicated, report the same number of records per record type, for both Class A and Class B account level reporting. See pages 6 through 18 for record layouts. The automated file will consist of the following record types:

    1.   Record Type H1 – Header Record
        One Type H1 record per file. The first record of each file. Contains identifying data. See page 6 for record layout.

    2.   Record Type L2 – Label Record
        One Type L2 record per file. The second record of each file. Contains report number, accounting level reporting (Class A or Class B), carrier name, study area name, etc. See page 7 for record layout.

    3.   Record Type R4 – Revenue Requirement Data Record
        73 Type R4 records per file for Class A account level reporting. 65 Type R4 records per file for Class B account level reporting. One record for each of the rows shown on pages 3 through 16 of the Report Definition. Each record contains data values for a particular revenue or revenue requirement element broken out by the cost categories and access elements. See pages 8 through 10 for record layout.

    4.   Record Type D1 – Demand Analysis Data Record
        12 Type D1 records per file. One record for each of the 12 rows of demand analysis data (end of year view) shown on page 17 of the Report Definition. Each record contains yearly details of minutes of use data. In addition, the last six records contain access line data. See page 11 for record layout.

    5.   Record Type C2 – Confidential Treatment Record
        Optional. Zero or more Type C2 records per file. Contains information to identify the data for which the carrier is seeking confidential treatment. See pages 12 & 13 for record layout.

6.   <u>Record Type F1 – Footnote Record</u>
Optional. Zero or more Type F1 records per file. Contains explanatory footnote text. See pages 14 & 15 for record layout.

7.   <u>Record Type E2 – Erratum Record</u>
Zero Type E2 records in the first submission of a year's data. One or more Type E2 records per file in revisions filed to correct that year's submission. Each time an erratum occurs, a carrier must use a new submission number. The same submission number must be used for the automated report and the paper report. Contains information to identify the data which was corrected in the submission. See pages 16 & 17 for record layout.

8.   <u>Record Type T1 – Trailer Record</u>
One Type T1 record per file. The last record of each file. Contains contact person, etc. See page 18 for record layout.

A.   Introduction

This document contains the page layout and detailed specifications for the paper report to be filed as FCC Report 43–01, the ARMIS Annual Summary Report.

B.   General Instructions

    1.   See sections B and C on pages 1 and 2 of the Reporting Procedures for a discussion of the Confidential Version, the Public Version, and the Unrestricted Version of this report and for a definition and discussion of data items that are "Not Available" or are "Withheld."

    2.   The paper report must be printed on 8 1/2 inch by 11 inch paper. For ease of preparation, an original may be produced on larger paper and reduced to this size for submission. Copies filed must be legible and permanent, in black ink. The report may be printed in portrait mode (8 1/2 inches across the top of the page) or landscape mode (11 inches across the top of the page). In portrait mode, the printing should not be smaller than 17 characters per inch and 8 lines per inch; in landscape mode, the printing should not be smaller than 15 characters per inch and 10 lines per inch.

C.   Data Entry Conventions

    1.   If an entry is to be a subtraction, indicate so by placing a minus sign in the column immediately preceding the numeric data, e.g., use –4, NOT – 4 or (4).

    2.   Items that need not be reported because they do not apply are designated by N/A. If a "Public Version" report is filed, enter W/H in any numeric data field for which data are "Withheld". **DO NOT** override N/As. If a reporting carrier should wish to apply data to a field containing an N/A, the carrier should enter the amount(s) and an explanation as a footnote to the field. The amount(s) must not be entered in an N/A field. All other fields must be populated. If there are no data applicable to an open field, enter zero.

D.   Rounding Conventions:

    1.   As specified in the Report Definition, all monetary figures must be rounded to the nearest thousand dollars.

    2.   All minutes of use (MOU) data to be provided in the Demand Analysis Table must be rounded to the nearest thousand.

3.   All access line data (Single Line Business CPT, Residence CPT Lifeline, etc.) to be provided in the Demand Analysis Table must be reported in whole numbers.

4.   All rate of return and other percentage amounts (Rate of Return, Rate of Return including Refund) must be entered as in the following example and rounded to 2 decimal places.

Example: 23.70561 percent must be entered as 23.71

E.   Footnotes

1.   If any data for the current period differs materially from those for the previous period and the difference is not self-explanatory but was caused by unusual circumstances, then include footnote text to explain the specific circumstances.

2.   If the reporting carrier does not follow the procedures described in the row and column instructions of the Report Definition, it must explain any deviations from those procedures in an explanatory footnote. Such footnotes must provide detailed explanations of the procedures actually used by the carrier and its specific reasons for deviating from procedures prescribed by the Commission's Rules. This provision should not be interpreted to mean that deviations from the prescribed rules will automatically be approved by the Commission. See Section E of the Reporting Procedures for examples of valid footnote text.

3.   Footnotes must be included in the footnote table(s), not on individual table pages.

F.   Errata

1.   Carriers are under a legal obligation to correct any erroneous data discovered in FCC Report 43–01. Submissions containing corrected data must include references to indicate which data items were corrected since the previous submission. These references must be included in the Erratum Table(s) of the paper report.   In addition, carriers must include in the transmittal letter a brief statement indicating the reason for the errata.   See Section B of the Reporting Procedures for the use of submission numbers when an erratum occurs.

G.   Data Validation Programs

1.   Each reporting carrier must validate its data by using the most recent edit check program(s), provided by the Commission, for the reporting year. When an error is detected, the carrier must correct the error prior to submitting the report to the Commission.   Once the carrier corrects its data so that the edit check program

identifies no errors, the carrier should submit the ARMIS report along with a copy of the edit check printout to the Commission verifying that the program did not identify any errors.

A.   Page Layouts

1.   The page layout for this report is illustrated in the Form Section of the Report Definition. There is a separate "table view" for Class A account and Class B account filing levels. Depending upon the account level used, the carrier should submit only the "table view" that applies.

2.   The following note must appear at the bottom of all pages, where applicable. THE COMPANY HAS REQUESTED CONFIDENTIAL TREATMENT FOR SOME DATA ON THIS PAGE. SEE THE CONFIDENTIAL TREATMENT TABLE FOR SPECIFIC INFORMATION.

3.   The Paper Report will consist of the following pages:
