

**SPECIAL ACCESS DATA COLLECTION**  
**January 9, 2015**

Below is an inventory of the changes made to the database container. You will need to replace your existing SPADC folder on your c:\ drive with the SPADC folder contained in the new database container .zip file downloaded from the FCC’s website. To ensure a smooth operation of the updated database container, we recommend that you “drop” the spadc user in Oracle and re-perform certain technical steps in creating the table structure, see step 3.3.3 in the Technical Manual v1.3.
