

**ZoomSafer**  
We don't let friends drive distracted

Patented software for smart phones that solves the distracted driving problem.

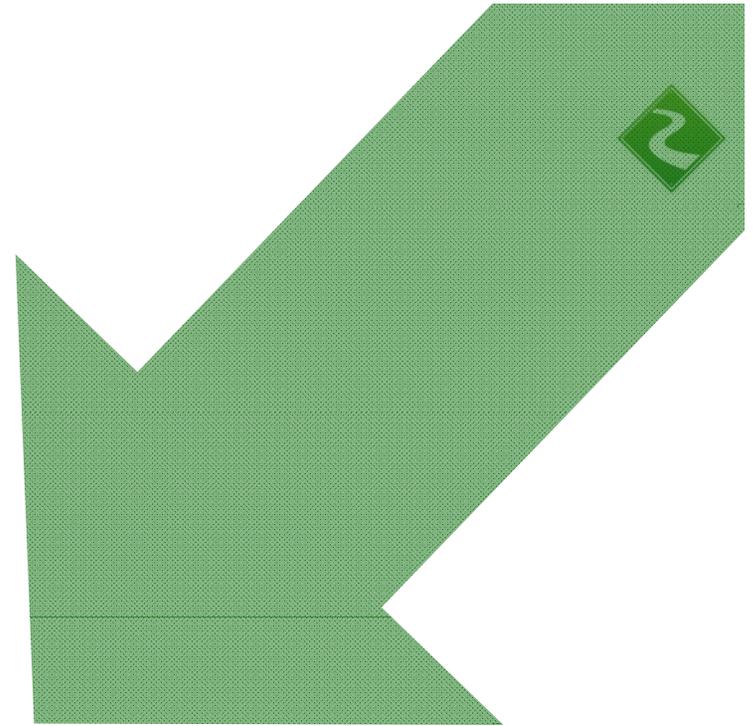

Available now for Blackberry's and in Dec for Windows Mobile phones.

Individuals and corporations use ZoomSafer to ensure safe and legal use of mobile phones while driving.

Simple over  
the air  
installation.

When you start driving, ZoomSafer auto activates, locks your keypad and prevents TWD and EWD.

Custom safety announcements can remind **YOU** to...

*“please drive safely”*

Hands-free dialer to make out-bound calls.

Prioritize inbound calls and answer them hands-free (via bluetooth headset, car kit, bud or speaker).

# Inbound calls audibly announced...

**“703-555-1212”**

# Auto replies to inbound text, emails and unanswered calls...

Activates when you start to drive and stays on (even at stop lights) until you reach your destination and turn-it off.

Passengers can exit ZoomSafer by using the snooze-control – which deactivates the service for a specified period of time.

In 1Q-10, ZoomMate will enable drivers to send/receive text and emails with their hands on the wheel and eyes on the road.

**ZoomSafer**  
We don't let friends drive distracted

**Thank You!**
