Subject: LightSquared pending applications

Kathryn,

It was good speaking with you. As I mentioned, SkyTerra 1 is expected to be launched in November and there are some FCC authorizations that we believe are necessary prior to the launch date. At your suggestion, I'm attaching a chart which lists all the applicable satellite/earth station applications we have pending and have highlighted in green those applications that we believe need to be granted prior to the launch and in yellow those applications that we believe do not need to be granted prior to launch (although we would certainly welcome such grants). All of the green applications have already been placed on public notice and there were no comments filed. I'm looking into the issue of LEOP and IOT testing and will get back to you on this.

Feel free to contact me if you have any questions about the chart, including our classifications, or these matters generally. As I mentioned, we have put in a request for a meeting with the International Bureau to provide a status update on SkyTerra 1 and were told it would be scheduled for the week of October 25th. 

As we discussed, I'm adding Stephen and Paul to the email thread because they may find the chart helpful as well.

Tony
