

FIRE PREVENTION IN TELECOMMUNICATIONS FACILITIES

**James A. Eibel
Vice President - Sales and Service
Illinois Bell
225 West Randolph
Floor 28B
Chicago, Illinois 60606
(312) 220-2012**

CONTENTS

1. Executive Summary	1
2. Background	1
3. Team Membership	1
4. Data Collection and Analysis Process	2
4.1 Development of the Questionnaires	2
4.2 Compilation of Industry Response	2
4.3 Data Analysis Process	2
4.4 General Fire Data	2
5. Types and Causes of Fires	3
5.1 Seven Root Cause Categories	3
5.2 Analysis of each Root Cause	3
6. Countermeasures and "Best Practices"	4
6.1 Root Cause #1 - Within Equipment and Peripheral Equipment	4
6.2 Root Cause #2 - Power Equipment	5
6.3 Root Cause #3 - Vendor/Contractor Initiated	7
6.4 Root Cause #4 - Telco Personnel Initiated	8
6.5 Root Cause #5 - Natural	8
6.6 Building External	8
6.7 Building Systems	8
6.8 Fire Prevention Planning, Strategies and Future Development	9
7. Risk Assessment - A Management Tool for Fire Prevention Strategies	9
8. Detection	12
9. Fire Alarms	14
10. Smoke Management Systems for the Telecommunication Industry	15
11. Arc Detection/De-Powering Strategy	19
12. Suppression System Status	25

13. Measuring Improvements	27
14. Maintenance of this Focus Groups Effort	28
14.1 Probability Versus Potential of Service Affecting Fires	28
14.2 What Makes an Acceptable Reporting System	28
14.3 Recommendations	28
15. Conclusions	29
16. Acknowledgments	29
17. References	30
18. "Best Practices" References	30
19. Exhibits	31
