

# Module Panel Discussion

Today's Panel:

- Dave Case
- Greg Czumak
- Nicolas Desmarais
- Len Knight
- Robert Paxman
  - TCB Module Workgroup Recommendation
- Praveen Rao

# Discussion Questions

- Module Grantee's Roles:
  - ✓ What are grantee's responsibilities to provide adequate Integration Instructions: labelling, trace antenna layout, RF engineering guidance, notice of overall compliance?
  - ✓ Are there additional responsibilities to consider & test in a typical host (irrelevant of type: stand-alone or limited).
- Module Granting TCB Roles:
  - ✓ What are TCBs responsibility to review and determine the adequacy of the Integration Instructions?
  - ✓ What are the TCBs responsibility for reviewing and approving a certified host intended to also use modules.
- Host Integrator Test Lab Roles:
  - ✓ If everything is tested individually, what is the composite test looking for?
  - ✓ Do all modes, modulations, bands need to be investigated?
  - ✓ What is the frequency range off investigation as a composite?
- Host manufacture (integrator) Roles:
  - ✓ What are the Integrators final product responsibilities including the module transmitters-and is this shared with the grantee?
  - ✓ What are the retention of records requirement for composite testing (SDoC/Certification +Module(s))
