- 913591 Band-edge measurements
- 558074 DTS Measurements and Procedures

Referencing Test Data

● **DRAFT KDB Publication 484596 *Referencing Test Data***

- Applicable to separate FCC IDs using the same printed circuit board layout
- Compliance test performed on reference device that is fully populated
- Explanation exhibit
 - Identify FCCID being referenced
 - Explain Differences
 - Spot Check Data – No degraded emissions
 - Reference Section
- Not currently applicable for SAR considerations

KDB Inquiries

- Inquirers should submit as much information as possible to included proposed solutions
 - Helpful to provide applicable rule parts or KDB guidance that is in question or unclear
- Inquirers should make an effort to choose the correct categories
 - Administrative categories are frequently selected for technical questions
- TCBs ensure that KDB inquiry numbers are not included in public exhibits i.e. test reports, cover letters; review these documents for conflict with confidentiality requests
