

this merger would not be good for the public aol does not care about it's customers you call with a problem they are rude hang up in you. i have a virus problem which caused aol to suspend my account for 30 days even though this was not my fault part was due to an employee at aol, they said to bad we don't care i have written aol ceo steve case 20 or 30 times with no response or comments. this has caused me to lose money with web based bus. making them bigger would be wrong. PLEASE DON'T ALLOW THEM TO TAKE OVER AND CONTROLL. even now after the 30 day suspension they still will not reactivate my account and hang up on me when i call. this is just one letter i have sent them.again i urge you not to allow this merger to happen, they are will only make thigs worse for the public when they have more power.

thank you
