

As a consumer I am concerned with the merger of AOL and Time Warner, We have already seen the power Time Warner has with it blockage of Disney Channel in Eastern Markets this year. AOL is a predatory content provider, and you are being to see the effect it is already having on the marketplace with it's keyword campaign on television. As an independent internet user, I am concern that this merger will limit the access I have to information on the internet and television. Please require that they be completely and 100% open to all content and users, whether they be corporate or a single person. We need to stop this companies from telling us what we need. It is tiem they ask us what we want. Thank you.
