

Dear Sir or Madams:

I am at a lost of words, for what the F.C.C is going to allow AOL and Time Warner to do. I cannot believe the country which I thought was base on the idea of freedom would turn it backs on it's own people. How in the world would you allow AOL and Time Warner to set a useable policy that is unfair to every user in the United State of America? I cannot believe you are going to ALLOW AOL and Time Warner to stop people from uploading to WebPages, posting message of public message boards, just because it eats too much bandwidth!

However I am sorry to say, till you or AOL & Time Warner start paying my access fee, then you have NO right to tell my what I can do. As long, as I am not breaking to law or take the right of freedom, and happiness from someone else in the world. However as mad as you have made me, we the people of the Internet will now allow this to happen... If you do, you will incite every hacker in the world to take action against them to keep our freedom.. I am not trying to start a fight or threaten (spell check) you that I am going to do this... I just know that we the people will not stand for this.
