Representative Channel Line-Up Card For Indianapolis Division
1. If you have trouble with your TV picture, first check other channels. Trouble on one and not all channels can be the TV station's difficulties.

2. Make sure TV set is tuned to Channel 3.

3. Check all connections to converter box and TV. Make sure they are tight and the TV and converter (connected to your TV) are plugged into an electrical outlet.

4. Try adjusting your fine tuning knob on your TV. If you turn the knob too far in one direction, the color will disappear, or on a black and white set, the picture "softens." Turning the knob too far in the other direction results in wavy lines. Proper adjustment is in between these two positions.

For these conditions, the problem might be your TV set:

- Screen dark, no sound
- Screen dark, sound OK
- Picture OK, no sound
- Picture rolls, sound OK
- Picture out of focus
- Images distorted or misshaped

For these and other conditions or outages, please call Time Warner Cable at 972-9700:

- Snowy screen, hissing sound
- Snowy picture, sound OK
- Flashing in picture
- Certain channels missing
- Lines on most channels

Note: We are not authorized to repair TV sets, only cable related problems.

Gov't/Educational Access and WCLJ: If you have a "cable ready" TV set, Gov't/Educational Access and WCLJ will appear on a channel other than channels 98 and 99, depending on the manufacturer of the TV set. Please refer to your television owner's manual to find the location of A-1 and A-2. If you have questions, please call customer service at 972-9700.
