

I concur with the merger between Echo-Star and Direct TV.

My issue is the current law which still places Cable TV at an advantage over Satellite TV. I live in Vacaville CA, if I had Cable TV I can receive BOTH the San Francisco and Sacramento locals, it has been that way for years. However Congress authorized Satellite to carry the locals and all of a sudden Sacramento says we can only get the Sacramento stations.

That is a bunch of crock. It is time AT&T and others in the Cable world be placed on the same playing field.

Either Cable be restricted to Sacramento only, or let the Satalitte folks receive both Sacramento and San Francisco.
