

Please approve the merger of dish network and direc tv as soon as possible. Here in Jacksonville our cable service is terrible. They have no real competition because they have the Jacksonville networks that satelite does not. With the merger we will have a fair choice between this cable company and satelite as satelite will then have our networks as well. This cable company here recieves hundreds of complaints every day because of poor customer service, which I have experienced myself. Yet they dont care and have refused to change anything because they have no real competition. This merger will make this cable company wake up, it will benefit everyone here in Jacksonville, whether they have cable or satlite. At least people will have a choice. Thank you for your time.
