

I ask you to support the EchoStar-DIRECTV merger on behalf of constituents like myself who have too long been subjected to the one market one cable-provider tragedy. I welcome the competitive pricing that is sure to result from such approval. I welcome the improved customer service both the cable and satellite providers will necessarily bring to the table in an effort to win me over. I believe that broadband internet access to the common man regardless of locale is good for the country. Again, please vote yes on the EchoStar-DIRECTV merger. Thanks will be demonstrated at the polls come election day. Take care.
