

This makes sense. These folks have competed head to head for years now inching out ground but never competing against cable. Give consumers a choice. This merger will finally do that. If Charlie Ergen says he'll bring satellite tv, local station availability, broadband internet, and one price across the nation then IT will happen. Look after your constituents for a change, help the little guy. Put pressure on the Wild Powell. We need competition in the broadcast TV arena and in phone service. Please help us! Approve this merger.
