

Hi I am all for the merger IF it is what Charlie Ergn says it is My only doubt is that once there is only one sat provider the prices will keep on going up. Directv only raised their prices once since 1994 from 29.95 to 31.99 and just now lowered most bills by up to 5.00 a month where dish net just raised prices for the third year in a row while promising to keep prices down. Now whose leg are they pulling? Give careful thought to this merger as us citizens will end up paying thru the nose if you dont do the right thing.
