

I am a Dishnetwork subscriber and have been waiting quite awhile,
to receive my LOCAL stations.

They have the technology to do it now, let's get on with it!

Get the merger of Echo star and Direct TV going and let's get into the 21
Century!

I have listened to Mr. Ergen of Dishnetwork, and they do need the SPACE,
for all they want to do.

I believe it will be a good thing for Dishnetwork and Direct TV customers, city
and rural, to have this merger happen.

Why should cable be the only ones to carry the LOCAL stations?

Why should I have to put up an over the air antenna(20th century) and mix the
signals?

Thank you for reading my email.
