

I am writing to petition for the approval of the proposed merger. As a current cable TV subscriber, I am one of many who are very disappointed in what has become an overwhelming cost for a terrible service with little functionality. This merger should hopefully provide a legitimate competitor to cable. It's apparent that there is very little keeping my cable provider from charging me \$70 per month for what is the basic service plus 2 movie channels. It is absurd, but we have little choice, until satellite becomes more mainstream, which this merger should do.

Thank you.
