

Are you aware that the NRTC / Pegasus distributors of Directv in rural America are charging more for Directv programing that Directv charges the big city customers? Pegasus charges us rural customers \$3.00 more per month for the same programing Directv sells the big city customers. The only reason the NRTC is against the merger is because they will not be allowed to overcharge us anylonger. Check it out for yourself. Call Pegasus and ask them what they charge, then call Directv and ask them what they charge. Directv said that they can't control what the government lets Pegasus and the NRTC charge us. Please help stop the overcharging. This merger will put an end to this and will benifit all parties concerned.
