

All I have heard for years is there should be more competition to cable.
I had cable for years and it was terrible! Picture quality, outages, price
increases. I have been a dish subscriber now for 6 years and love it.
REMEMBER.. YOU WERE HARPING ABOUT NO COMPETITION TO CABLE AT THE SAME TIME YOU
WERE ALLOWING CABLE COMPANIES TO MERGE!
You cannot look at this as one entity.
This is just another source of program delivery.
You have C-band, airwaves, other dish suppliers, and cable.
Of all the millions of rural homes that have not purchased satellite, do you
really think they care about which company has what. Some of my friends got
satellite, and didn't even know about the other company.
This is about a product to compete with cable. No different than AOL/Time
Warner or ATT/Comcast.
Allow this merger to go through!!!
It will be good for the consumer!!!
THANK YOU
