

Please support the merger of Dish Network and DirectTV. They provide excellent service that can only be enhanced by this merger.

I am a current Dish Network subscriber but I am also forced to use the cable company for broadband access. The cable company in our area is horrible. The chance to have all the services these merged companies could provide would be wonderful for our family as consumers.

In the interest of allowing them to provide improved service to even more Americans - please support this merger.

Free us from Cable!
