

I will be for any thing that will allow me to view network ch's on my dish again like the cable users have,I live in a rural area and my reception is very poor and because of the FCC ruling placing my zip code in in the area that should pick up local tv I'm blocked from viewing network ch's,I have petitioned the local ch's and Direct tv has also but always the same answer pointing back to the FCC ruling.With the customer stuck in the middle.so if this merger gets past that I'm for it....
