

I currently live in Cheyenne, Wyoming. Although I only live 6 miles from town, I can only get t.v thru satellite. I can not receive cable service. I am ALL FOR a merger of Direct tv and Echostar. I would like to see satellite tv be able to compete with the big cable companies. I would like to be able to receive an affordable high speed internet service. I am now connected at 21,000bps, if I am lucky, I can connect at 24,000bps. Thank you for your time, and please do the right thing and let Echostar and Direct TV compete against the cable companies.
