

i am writing to tell you to approve the merger of echostar and direct tv .for 5 plus years now we in md have waited for local baltimore channels and w/this merger this will finally take place for echostar customers as baltimore has been bypassed more times than i have fingers and toes, this is an important matter to me as satellite id far cheaper and has far more variety than cable, please heed this letter and do maryland a huge favor as we did win the superbowl and still no local channels and all baltimore stations that i have contacted support being up on satellite and will support this merger, thank you for your attention to this important domestic issue as we are a free prople and i chose dbs for my television provider.
