

I am writing this letter to ask you to stop the merger of Direct TV and Dish Network if the following does not transpire:

Dish Network in the extreme near future accepts to put the YES Network on its line-up especially in the NY Metro Area. I am current Dish customer who has received little or no satisfaction from the statements coming from the Dish people when I have requested the YES Network be placed on its system. I fear even if and when I switch to Direct that the people in charge of Dish will use us, the customers as pawns like Cablevision does to its customer base. My hope is that Dish did not fully understand its actions when it has yet to provide us with the Yes network and they will soon see the error of their way. If Dish does not take serious the requests from us, the customers, I feel they can't handle with any such responsibility a large organization with virtually zero competition
